Clarkson University is a nationally ranked research university and the institution of choice for more than 4,000 enterprising, high-ability scholars from diverse backgrounds who embrace challenges and thrive in a rigorous, highly collaborative learning environment. We add value to our students' education by partnering with leading businesses, industries, and thought leaders to bring relevance to the challenges and needs of a modern world in which the boundaries of knowledge, discipline, nations, and cultures blur. We encourage students to question the status quo, push the limits of what is known, and to apply their ingenuity to develop fresh solutions to real-world challenges. For more than 100 years, our graduates have achieved extraordinary professional success, risen to societal challenges, and advanced the global economy ethically and responsibly. Among our 48,000 strong alumni, one in five is in the C-suite, senior executive, or owner of a company.

Founded in 1896 to honor Thomas S. Clarkson, the University's main campus is located in the "college town" of Potsdam, NY on a historic 640-acre wooded homestead in the foothills of the Adirondack Park. With three other universities nearby, Clarkson community members enjoy a constantly changing social and intellectual quality of life largely influenced by our proximity to the north slope of the Adirondacks; easy drives to Lake Placid as well as Ottawa and Montreal, Canada; and a high level of regional camaraderie to encourage innovative partnerships in small business development, arts, tourism, recreation, agriculture and green energy. The University also includes The Capital Region Campus for graduate education in the Capital Region of New York.

Clarkson's educational strengths include:

- rigorous professional preparation
- dynamic, real-world learning
- highly collaborative community
- teamwork that spans disciplines

Changes in Curricula

Information contained in this catalog is current at the time the catalog is posted on our Website, but as courses and curricula undergo changes by official action of the University, occasionally such changes may supersede information found herein. The accuracy of any particular information can be checked through The Graduate School, Student Achievement Services, the Dean of the appropriate School, or academic departments.

Please be aware that the information concerning academic requirements, courses, and programs of study in the catalog does not establish an irrevocable contract between the student and the University. The University can change, discontinue, or add academic requirements, courses, and programs of study at any time, without notice. Although every effort is made to provide timely notice to students in order to help in the planning process, it is the responsibility of the student to confirm that all appropriate degree requirements are met.

All students are encouraged to read the catalog thoroughly. Failure to be familiar with the contents does not excuse a student from the requirements and regulations described herein.

Courses

Typical courses for each department are listed in this catalog, but not all courses are offered each year. Descriptions of courses and terms in which specific courses are offered are accessible in Clarkson's Student Information System. Viewing Clarkson's searchable course catalog will give up-to-date course descriptions, pre- or co-requisites, course attributes, and other information pertaining to all courses offered. Clarkson's browse course catalog may be viewed here:

https://mycu-g.clarkson.edu/psp/guest/EMPLOYEE/SA/c/SA_LEARNER_SERVICES.SS_BROWSE_CATLG_P.GBL?

Course credit is also available for Independent Study and Special Projects.

Accreditation

Clarkson is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104-2680, 215-662-5606.

The David D. Reh School of Business is accredited by the Association to Advance Collegiate Schools of Business (AACSB), an internationally recognized accrediting agency for graduate and undergraduate programs in business administration.

The Healthcare Management MBA is accredited by the Commission on the Accreditation of Healthcare Management Education (CAHME).

The entry level doctor of physical therapy program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) of the American Physical Therapy Association (APTA). The Accreditation Review Committee (ARC-PA) on Education for the Physician Assistant has granted continuing Accreditation to the Physician Assistant Studies Program. The Occupational Therapy Program is fully accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA).

In addition, the University and its curricula are approved by the New York State Board of Regents. All Clarkson degree programs are approved by the New York State Division of Veterans Affairs for the training of veterans and other eligible persons.

Student Retention and Persistence

Retention studies of independent institutions in New York State show on average that 73.7 percent of students who enter as freshmen complete their degrees within six years, and 61.8 percent in four years. At these same schools, the sampling of transfer students shows 67.4 percent completing their degrees in four years and 71.3 percent in six years.

At Clarkson the graduation rate is well above the norm: averaged among those completing degrees over the past three years, 76.2 percent of freshmen completed their studies for a bachelor's degree within six years; 74.4 percent in five years; and 63.6 percent in four years or less. *Among transfer students, 48.4 percent complete their bachelor's degrees in two years and 80.0 percent in four years.

*Under the Student Right to Know Act, the federal government requires the University to publish the six-year graduation rate for students who have enrolled as first-time freshmen. Clarkson operates a unique program known as The Clarkson School, which allows students to begin their college career one year early (see Undergraduate Admission). This program attracts some students who may not intend to remain at Clarkson for four years and inclusion of these students in the total has the effect of making that published rate misleading. The inclusion of Clarkson School students makes the University's six-year graduation rate 72.5 percent.

THE CLARKSON EDUCATION

Clarkson academic programs span boundaries and vary widely in content. However, at the heart of the institution's educational process are fundamental goals and values that define a common learning experience and shape the growth of every Clarkson student. The University has articulated its mission, vision, and values as follows:

Mission of Clarkson University

Clarkson University is an independent, nationally recognized technological university whose faculty of teachers/scholars aspires to offer superior instruction and engage in high-quality research and scholarship in engineering, business, science, health, education, and liberal arts. Our primary mission is to educate talented and motivated men and women to become successful professionals through quality pre-collegiate, undergraduate, graduate, and professional continuing education programs, with particular emphasis on the undergraduate experience. Our community and campus settings enhance the quality of student life and afford students access to and interaction with their faculty. We value the diversity of our University community, and we strive to attune ourselves and our programs to our global, pluralistic society. We share the belief that humane and environmentally sound economic and social development derive from the expansion, diffusion, and application of knowledge.

Vision of a Clarkson Education

The Clarkson University educational experience is designed to provide talented and ambitious students with the knowledge and skills necessary to achieve positions of leadership within their chosen profession. The combination of Clarkson's strong technologically rich curricula and State-of-the-art teaching and research facilities, coupled with an unparalleled commitment to a friendly learning environment and to students' personal development, uniquely prepares Clarkson graduates to excel in their chosen professions and to lead rewarding and creative lives.

In addition to attaining mastery of the core knowledge within his or her field, a Clarkson education is designed to enable students to:

1. Solve real-world, open-ended problems with creativity and risk taking to obtain solutions that are practical and sustainable, including those they encounter in state-of-the-art research under the direction of distinguished faculty;
2. Develop and refine exceptional communication skills with an awareness of potential cultural differences;
3. Lead effectively and work productively within disciplinary and multidisciplinary teams composed of members with diverse interests and backgrounds;
4. Excel in using computing and information technologies;
5. Learn through instruction and guidance by nationally recognized faculty whose commitment to both teaching and research has made Clarkson a nationally ranked university.

A Clarkson student's education is greatly enhanced by a personal and friendly learning environment, within a small, residential, nationally recognized University, which:

1. Places students at the center of the educational process and where all employees have a commitment to creating an environment that contributes positively to students' overall educational experience;
2. Draws undergraduates, graduate students, faculty and staff together into a cohesive and stimulating learning community, wherein an atmosphere of scholarship and spirit of research is cultivated;
3. Use our campus as a living laboratory to improve learning, and uses the wider region to broaden and extend Clarkson's outreach and service;
4. Provides personal advising and interaction with faculty and staff as well as supportive relationships among students;
5. Offers many leadership opportunities through co-curricular groups and activities;
6. Respects and learns from its community of diverse people, backgrounds, and cultures.

Together, these provide a unique educational experience that is directed toward developing the whole person.

Major Values of the Clarkson Community

"Lead by Example and Others Will Follow"

Caring: A positive and friendly atmosphere is created when we care about each other, when we are open to constructive criticism, and when we show appreciation for a job well done.

Diligence: "A workman that needeth not to be ashamed." Initiative and hard work are key ingredients in getting the task done.

Diversity: The mutual appreciation of differences and a plurality of opinions, beliefs, and cultural traditions inform and enrich our lives.

Integrity: Honesty and accountability in one's actions and words form the foundation of our relationships with others.

Growth: Educational experiences in and out of the classroom enliven our minds, broaden our horizons, and facilitate dialogue and consensus. Learning is a lifelong activity.

Service: Offering our time and skills for the good of our fellow citizens leads to the prosperity and environmental health of the community and to the well-being and character development of the individual.

Teamwork: Effective teamwork encourages creativity and self-initiative in our respective roles and partnerships. It is essential in getting the task done and in developing the skills needed to meet the challenges of ensuring sustainability of local and global economic, environmental and social systems.

Vision: Having a vision of a sustainable future helps us prepare for it. Embracing the inevitable changes in our world as opportunities allow us to anticipate, promote, and facilitate change.

ABOUT CLARKSON UNIVERSITY

Clarkson University is a proven leader in technological education, research, innovation and sustainable economic development. With its main campus in Potsdam, N.Y., and additional education and research operations online and in the Capital Region. Clarkson faculty have a direct impact on more than 3,800 students annually through nationally recognized undergraduate and graduate STEM-designated degrees in engineering, business, science and health professions; executive education, industry-relevant credentials and K-12 STEM programs. Alumni earn salaries among the top 2% in the nation; one in five already leads in the C-suite.

Founded in 1896 with a compelling charge to serve the real needs of the American people, Clarkson cultivates an innovative and interdisciplinary research environment focused on rapidly solving real-world problems for a better future. Example signature areas of research include STEM and entrepreneurial education, healthy global solutions, computational and data-enabled discovery, advanced materials development, and next-generation medicine and healthcare. Our external network has more than 380 active partners in industry, government agencies, chambers of commerce and research organizations, affording students access to world-relevant problems to pursue with their professors as well as a direct pipeline to internships and careers after graduation. In addition to an engaged 48,000+ strong alumni community in 87 countries, our global reach extends through our schools, ROTC command, research centers and institutes, and across more than 40 international university exchange partners.

Here is a sample of the external accolades:

1. Clarkson alumni salaries rank in the top 2 percent of highest salaries in the United States, Payscale College Salary Report
2. Best 390 Colleges & Best Value Colleges, Princeton Review
3. Top 250 Colleges 2025, Forbes
4. Top-tier National University & Top 50 Best Values in Higher Education, U.S. News & World Report, America's Best Colleges
5. Top 40 Best Salaries, Wall Street Journal/College Pulse 2025 Best Colleges
6. Best Colleges for Veterans, U.S. News & World Report, America's Best Colleges
7. One of America's Best Colleges and ranked 4.5 out of 5 stars for value, Money's Best Colleges 2025

Clarkson's major organizational units are the Academic Affairs Signature Programs, the David D. Reh School of Business, the Wallace H. Coulter School of Engineering and Applied Sciences, the Earl R. and Barbara D. Lewis School of Health and Life Sciences, the Institute for a Sustainable Environment, the Graduate School, the Institute for STEM Education, Sponsored Research Services, and The Clarkson School, a unique early college program for talented high school age students.

Wallace H. Coulter School of Engineering and Applied Sciences

Representing the highest percentage of student enrollment, the Wallace H. Coulter School of Engineering and Applied Sciences has faculty and staff in the Departments of Chemical & Biomolecular Engineering, Civil & Environmental Engineering, Electrical & Computer Engineering, and Mechanical & Aerospace Engineering, Physics, Chemistry and Biochemistry, Mathematics, Computer Science. Faculty and students also participate in the engineering & management, software engineering and undergraduate interdisciplinary minors.

In spring 2002, Clarkson announced that the Wallace H. Coulter Foundation had made a \$30 million philanthropic gift to the University to support the ongoing excellence in its engineering and science programs. The gift honors the late Wallace H. Coulter, a past trustee and research partner of the University, and reinforces a theme he embraced, “Technology Serving Humanity.”

David D. Reh School of Business

Named in 2017 for David D. Reh '62, H'17, the mission of the Reh School of Business is to combine scholarly research and teaching to create and advance knowledge at the intersection of business, technology and society. With faculty and staff supporting students, the Reh School focuses on areas that span traditional boundaries: global supply chain management, innovation & entrepreneurship, financial information & analysis, business analytics, and business administration. The engineering & management program, which is among a limited number of programs worldwide that enjoys dual accreditation by both engineering and business agencies, is also administered from the Reh School with close alignment to the Coulter School. Reh students start their own business as first-year students, engage in an international experience, participate in an internship or co-op and develop expertise in traditional business disciplines — accounting, economics, finance, marketing, management, operations and data analytics — while gaining perspective on how they fit together.

Lewis School of Health and Life Sciences

Through a transformational gift in 2019 from Earl and Barbara Lewis, Clarkson University established the Earl R. and Barbara D. Lewis School of Health Sciences to prepare the next generation of healthcare and life science leaders. Through immersive learning and an innovative curriculum, the Lewis School delivers the highest quality education for its students while tackling today's biggest healthcare challenges—locally and globally.. The Lewis School of Health and Life Sciences currently consists of three graduate-level programs: physical therapy, physician assistant and occupational therapy and three undergraduate programs: Biology, Healthcare and Psychology.

The Department of Arts, Culture and Technology

The Department of Arts, Culture, and Technology underpins the Clarkson Common Experience Curriculum and is the genesis of how students gain value-added experience in communicating ideas effectively.

The Institute for a Sustainable Environment (ISE)

ISE facilitates boundary-spanning environmental research, educational activities and external partnerships. Students from across campus can integrate sustainability into their curricular or co-curricular education by adding minors, implementing sustainability projects on campus, and participating in research. The Institute also supports Clarkson's significant resources focused on managing pollution and measuring contaminant concentrations in environmental media. This includes the Center for Air and Aquatic Resources Engineering and Sciences (CAARES), which brings together expertise focused on environmental sampling and analysis, receptor modeling, analytical chemistry, atmospheric deposition, and the application of experimental and computational fluid dynamics to pollution problems.

The Center of Excellence in Healthy Water Solutions is a New York State-funded CAT that supports interdisciplinary research and industry collaborations to generate solutions that help protect and improve waters for sustainable natural environments, healthy populations, resilient communities and sound economies.

Institute for STEM Education

Clarkson's Institute for STEM Education spans boundaries across the University's other institutes and schools through formal and informal educational outreach, educational and pedagogical research, and the scholarship of teaching and learning, as well as through the recruitment, retention, and persistence of STEM students, and collaboration with educational and basic research initiatives. The Institute supports a nationally recognized training program for STEM graduate students to prepare for teaching and advising roles, delivers multiple STEM enrichment programs for K-12 students and teachers across the state, and offers Clarkson faculty and community members opportunities to connect, reflect, and focus on their teaching practices and student experiences.

The Honors Program

The Honors Program is a "community within a community," offering a select group of talented and highly motivated students an intimate, supportive, and enriched Clarkson experience. Students in the Honors Program are diverse, nationally and ethnically, with about equal numbers of women and men and representing all majors at Clarkson. Founded in 1997, the Honors Program takes the undergraduate experience to an entirely new level. Clarkson is famous for its hands-on, problem-based curriculum, but the Honors Program provides even more opportunities to conduct original research or independent projects; experience internships, co-ops or study abroad placements; and work in teams on real-world problems. Acceptance to the Honors Program is highly competitive.

The Clarkson School

The Clarkson School is a selective early-college program that engages approximately 60 talented and motivated high school students who enroll as first-year university students

at Clarkson. Taking the same courses as undergraduates and accessing all the same support services, clubs and activities, "Schoolies" live in a special living-learning community that provides additional support for personal growth, academic achievement and professional development.

A BRIEF HISTORY OF CLARKSON

(The following summary has been excerpted largely from *A Clarkson Mosaic*, a history written by Professor Emeritus Bradford B. Broughton in conjunction with the institution's 1996 Centennial.)

Two months after a highly successful Potsdam businessman, Thomas Streatfeild Clarkson, was crushed to death while trying to save one of his workers in his sandstone quarry on August 17, 1894, his family began planning a memorial to him: a school.

Choosing as their rationale a phrase which his sisters and nieces felt aptly described their brother- Thomas' favorite Biblical quotation, A workman that needeth not to be ashamed- the family opened the Thomas S. Clarkson Memorial School of Technology in September 1896, in the Main Building ("Old Main") which they commissioned to be built on Main Street. To the five young men in the preparatory class, eight men and four women in the freshman class, six courses of instruction were offered: electrical engineering, domestic science, art, machine work and smiting, woodwork and pattern making, and normal manual training. By 1907 the school was offering additional bachelor's degrees in mechanical, civil, and chemical engineering.

Recognizing the need for a gymnasium, the students began a fund-raising campaign for the \$11,000 needed to build one in town, spurred on by a \$5,000 gift from the Clarkson family. By 1912, this second school building had been erected. That building became the library in 1956 after the new Alumni Gymnasium opened. When the library moved to the Educational Resources Center in 1978, the original building became the Liberal Studies Center.

When the New York State Board of Regents offered scholarships to qualified students attending college within the state in 1913, Clarkson's Board of Trustees voted to change the school's name to the Thomas S. Clarkson Memorial College of Technology; the head of the college became president instead of director; and John Pascal Brooks, a Dartmouth graduate, and one of the men on Walter Camp's first All-American football team, became the first Clarkson director to bear the title of President.

Hockey began in 1919 on a rink behind Old Main, and soon moved to a bigger rink built by the students in Ives Park. Not until the hockey arena was completed on land across the river in 1938 did the team have a building in which to play. That facility was later named for the founding force behind Clarkson hockey, Murray Walker, owner of Weston's Bookstore. Walker Arena provided home ice for Clarkson teams, which have

frequently achieved national ranking, until Cheel Arena was completed in 1991. The Women's Hockey Team is 3 time NCAA national champions in 2014, 2017, and 2018.

Thomas Clarkson's nieces, Miss Annie Clarkson and Miss Emily Moore, tried to have the entire school moved to a new campus on a hill outside of Potsdam (hence the nickname, the "hill campus"), with a gift of \$1.5 million in 1929. However, because that money shrank to half a million within a year due to the stock market crash, the plans for the move had to be shelved for over 30 years. Since then, the campus has moved almost entirely to the hill, although some administrative offices and the programs in health sciences remain on the original downtown Potsdam campus.

Responding to a plea from New York Governor Thomas Dewey after World War II, Clarkson admitted hundreds of returning veterans. Having no space to house or teach them by 1946, Clarkson rented the New York State School for the Deaf in Malone, N.Y., 40 miles east of Potsdam. For the next five years, freshmen and many sophomores spent their first two years in Malone before moving to the Potsdam campus for the remainder of their Clarkson education. That branch closed in 1951.

With that flood of veterans came the Trustees' realization that the College would have to expand its facilities, and expand them it did over the next 20 years, adding not only facilities but graduate programs in engineering, science, and management, including PhD programs in most.

During that post-war period, and through the mid-1980s, Clarkson expanded both of its campuses, with many new residence halls on the hill campus, including Hamlin-Powers, the Quad, Moore House, Price and Graham Halls, Woodstock (originally planned for married student housing only), and the Townhouses. Beside them, it built the Educational Resources Center in 1978 and then added recreational facilities of the Indoor Recreation Center in 1980. The downtown campus also witnessed expansion during those years; Peyton Hall for chemical engineering, Damon Hall for civil engineering, Clarkson Hall for electrical engineering, and Lewis House for a student union. Clarkson also gradually took over Snell Hall from SUNY Potsdam for classrooms and office space.

In the fall of 1991, two significant developments occurred on the hill campus. Clarkson opened the CAMP (Center for Advanced Materials Processing) building, a research and teaching complex with state-of-the-art laboratories, designated a New York State Center of Advanced Technology. The building was connected to the existing Rowley Laboratories and, in the fall of 1996, all engineering departments were consolidated in the CAMP-Rowley complex.

Also in 1991, the University opened the Cheel Campus Center, a combination student union and hockey arena that includes dining areas, student government and activities rooms and offices, and a post office. In the fall of 1998, the University also completed a

new Fitness Center, which connects the Indoor Recreation Center and Alumni Gymnasium.

In the spring of 1999, Clarkson Hall was renovated and rededicated as the Center for Health Sciences. This downtown facility now houses the University's programs in Occupational Therapy, Physical Therapy, and Physician Assistant Studies. The newest academic building, Bertrand H. Snell Hall, opened on the hill campus for the fall 2000 semester. A wing of biochemistry laboratories was added to the Cora and Bayard Clarkson Science Center and opened in fall 2005. The Technology Advancement Center (TAC), an 18,000-square-foot addition connecting the Schuler Educational Resources Center and the Cora and Bayard Clarkson Science Center, was completed in fall 2008. A new Student Center was completed in August 2010 and connects all academic buildings. In 2017, #ClarksonIgnite was introduced as a new approach and catalyst for exploring, creating and achieving what's next. Through a renovation to the Schuler Educational Resource Center, an Innovation Hub was created to ignite connections across academic disciplines, cultures and industries to create the entrepreneurial mindset, knowledge and intellectual curiosity needed to innovate world relevant solutions.

In 2016 The University welcomed a Graduate School campus in New York's Capital Region that takes advantage of all that New York's Capital Region has to offer.

GRADUATE DEGREE AND ADVANCED CERTIFICATE PROGRAMS

The Higher Education General Information Survey (HEGIS) code designated by the New York State Education Department for classifying these academic programs may be found in the list of degree programs and HEGIS Codes near the end of the catalog.

THE GRADUATE SCHOOL

Michelle Crimi, Dean

Clarkson offers programs of study during the regular academic year leading to the Master of Business Administration, Master of Science, Doctor of Philosophy, and Doctor of Physical Therapy degrees. Interdisciplinary programs leading to Master of Science and Doctoral degrees offer a unique perspective on graduate study and are a key element in many of our programs.

Graduate School Admissions

Admissions to graduate study is on a merit basis. Evidence of intellectual achievement, motivation, and aptitude are required for admission to graduate programs. Prospective Clarkson graduate students must have or be a candidate for an undergraduate degree from an accredited college before applying for graduate admission, excluding students applying through specific, official, joint program agreements. Candidates for joint programs should contact a member of the Graduate Admissions Team regarding requirements for admissions. Application materials may include: resume, personal statement, transcripts, test scores, and letters of recommendation. Please contact the Graduate Admissions at graduate@clarkson.edu or (518) 631-9831 for details on the program's specific set of requirements.

A Masters in an accredited engineering program can count as one year towards NYS professional engineering licensing requirements. Please refer to the NYS Office of Professions (<http://www.op.nysed.gov/prof/pels/>) for more information.

GRE scores are optional for all graduate programs, except for the PhD and research-track MS programs in Mechanical Engineering, as well as both MS tracks (Research and Project) and the PhD program in Physics, where the GRE is required. In the David D. Reh School of Business, GMAT scores are optional. For full details, refer to the specific program requirements at www.clarkson.edu/academics.

All admission decisions must be approved by the applicant's departmental graduate representative, by the director of the program and/or the dean of the appropriate school. While there is a rolling admission policy, and all applications will be reviewed up to a reasonable time prior to the beginning of classes, it is recommended that students requesting financial aid apply by January 30 for the fall term and September 1 for the spring term. Students are encouraged to apply no later than five (5) months prior to the preferred term of entry to allow time for admissions processes. For applications and other inquiries about the status of an application, contact the specific department of interest or see Clarkson's Web site at <http://clarkson.edu/graduate>

Admission Graduate School Policy for Current Undergraduate Clarkson Students

This policy is intended to encourage early consideration and preparation for graduate work at Clarkson by highly qualified students. These students may accelerate their undergraduate course of study to graduate early and begin their graduate work as soon as possible. Please contact Graduate Admissions at graduate@clarkson.edu or (518) 631-9831 for further instructions. Superior Clarkson undergraduate students, with the permission of their department chair and the dean of the appropriate School, may enroll in graduate courses. Such courses may be allowed to count towards the graduate degree as specified in the Degree Requirements below.

International Applicant Language Verification Requirements

Clarkson University must verify all international students' English language proficiency when English is not a first language. This requirement, as part of the application process, must be completed prior to the issuance of a 'Certificate of Eligibility' for student status. Once the university has verified this requirement, and the applicant is accepted, the 'Certificate of Eligibility' may be used to obtain a student visa. Clarkson University requires one of the following language proficiency exams:

- TOEFL (Test of English as a Foreign Language): <http://www.toefl.org>
- IELTS (International English Language Testing System): <http://www.ielts.org>
- PTE (Pearson Test of English): <https://pearsonpte.com/>
- DET (Duolingo English Test): <https://englishtest.duolingo.com/>
- Applicants inside the USA who are enrolled in one of these two institutions: Open Hearts Language Academy (OHLA) or Education First (EF) University Preparation may submit one of these two English exams ELITE PLUS through (OHLA) and EF SET Level C2 (EF).

Admission of international graduate students requires minimum test scores as below, in all programs excluding DPT, MS in PAS, and MS in OT:

- IBT TOEFL score of 80
- TOEFL Essentials 8.5
- IELTS band score of 6.5 PTE score of 56 DET score of 115 (or 61 on pre-July 2019 exam scoring)
- IELTS PLUS 80, EF SET level C2 80

A TOEFL/IELTS/PTE/DET/IELTE PLUS/EF SET (C2) official score must be submitted as part of the application requirement. Admission Requirements to the language proficiency exam may be waived with evidence of documentation showing the student studied in a United States school or originated from a country with English as its first language. Students in graduate programs leading to professional certification/licensure also may have a requirement relating to language verification requirements as defined in their field. Details are in the handbooks for these programs. Additionally, a program may request a World Education Services (WES) evaluation be submitted by the applicant.

Lastly, all matriculated students for whom English is a second language are required to complete the ESL placement exam upon arrival to campus and complete any resulting requirements. Waivers to the requirement of the ESL placement exam will be determined at the program level by the appropriate designated administrator(s) who may consider documented exceptions based on reasonable student experience and/or prior education. Any language courses required as a result of the placement exam are not counted toward degree requirements.

Degree Requirements and Academic Policies

Requirements for the Master's Degree

Note: This section does not apply to students in The Earl R. and Barbara D. Lewis School of Health and Life Sciences Graduate Programs. Students in these degree programs should refer to the program sections of this catalog for degree requirements.

The minimum graduation requirements for students in Master's degree programs at Clarkson are listed below. Additional graduation requirements are set by each degree program. Consult the department office for details.

1. A minimum of 30 credit hours of graduate coursework, as follows
 - i. At least 20 credit hours of course and seminar work. The balance of coursework must be consistent with the research or professional experience component.
 - ii. Only courses numbered 500 and above are accepted for graduate credit.
 - iii. 10 credit hours of transfer credit (B grade or better) may be accepted, or with the Dean of The Graduate School's approval, a maximum of 12 credit hours of transfer credit from a post-baccalaureate certificate program (B grade or better) may be accepted.
2. Satisfactory completion of one of the research or professional experience components listed below. Please note all options may not be available in every program.
 - a. A written thesis based on independent research
 - i. A thesis submitted in partial fulfillment of the requirements for the Master of Science degree will be examined by a committee of at least three Clarkson faculty appointed by the student's department. After approval by the examining committee, a thesis requires signature approval by the Dean of The Graduate School, and must be submitted according to the procedures defined by the Graduate School. For information and assistance contact the graduate coordinator representing your discipline.
 - b. A comprehensive examination

- i. A comprehensive examination taken in partial fulfillment of the requirements for the Master of Science degree will be administered by a faculty member or faculty committee approved by the appropriate academic administrator.
 - c. An appropriate, professionally oriented special project
 - i. A project submitted in partial fulfillment of the requirements for the Master of Science degree will be examined by a faculty member, or faculty-member committee, as approved by the appropriate academic administrator.
- 3. At least one academic year of study beyond the B.S.
- 4. A cumulative GPA of 3.000 in courses used to meet graduation requirements.
- 5. All work must be completed in 5 calendar years. Former Union Graduate College students active in their respective programs prior to Summer quarter 2016 must complete in 6 calendar years.

Requirements for the Doctoral Degree

The minimum requirements for all students in Doctor of Philosophy (PhD) degree programs are described below. Please consult your departmental office for additional requirements.

- 1. A minimum of 90 credit hours, as follows
 - 1. A minimum of 24 credit hours coursework.
 - 2. A minimum of nine course credit hours taken in residence (includes distance learning courses offered by Clarkson University).
 - 3. A minimum of 6 credit hours of seminar.
 - 4. A maximum of 30 credits transferred from an MS degree towards PhD degree requirements (B grade or better).
- 2. A minimum of three academic years of full-time graduate study or the equivalent in part-time study. Two years of study must be in residence at Clarkson. Students matriculated in the off-campus PhD program are exempt from this residency requirement (see below section).
- 3. Satisfactory completion of the PhD comprehensive examination for admission to candidacy ("candidacy procedure") within two years of full-time study after admission to the PhD program or, for part-time students, before completing 66 credits (see below).
 - 1. After completion of the candidacy procedure, the student will be identified as a "PhD Candidate."
 - 2. Students who fail the candidacy procedure may make a second attempt according to department guidelines.
 - 3. A student who does not successfully complete the candidacy procedure within the time allowed may be dropped from the graduate program.
- 4. A written dissertation must be submitted by each candidate and defended orally as part of the final examination (see below section).

Requirements for students enrolled in the Doctor of Physical Therapy (DPT) program vary from those outlined here and are described in the General Requirements for DPT Curriculum.

Any changes in the student's degree program must be approved by the Academic Standards Committee.

Off-Campus PhD Program Policy

The off-campus PhD program has been designed to allow Clarkson University doctoral degree candidates to conduct their dissertation research at their employer's research facilities. A Clarkson faculty advisor directs the dissertation research with the assistance of a co-advisor at the student's employer, and up to 50% of required coursework can be taken from Clarkson via online and distance learning.

1. The minimum credit- hour requirement after the bachelor's degree is 90 hours (current requirements). The normal course requirements for the student's department and the University must be met. Students may take up to 50% of required coursework through distance learning. Students who enter the program with an MS degree may transfer up to 30 credits toward the PhD from their master's program.
2. The student must satisfy all the entrance requirements of the academic department. This is beyond the basic University requirements already in place for admission to the PhD program. The experience and specialization of each candidate will be considered in the admission evaluation process.
3. It is essential that the dissertation committee includes one qualified representative from the student's employer. The representative will act as a co-advisor within the organization. Each department will decide if the representative should be appointed as an external committee member of the student's PhD Committee.
4. The student must fulfill all degree requirements according to each department's policy. It is considered essential that each candidate is carefully examined for both the depth and breadth of their knowledge in the chosen field of study.
5. The dissertation should be defended at Clarkson University in the normal manner and according to the University and department requirements and regulations. The candidate must demonstrate a sufficient fundamental knowledge in their field.
6. The department will specify the period of time the student spends on campus (at the department) and the number of visits (each semester).
7. The maximum duration of time allowed to finish the dissertation is eight years.
8. The relationship between the students' employing organization and Clarkson University must conform to the Clarkson Conflict of Interest Policy.

A listing of courses available through distance learning is published each semester. Off campus PhD students may choose from that list and enroll in those courses. These

courses shall meet the matriculation requirements set forth in the University course catalog.

The courses for this program will be delivered using a video conference/classroom facility or through the internet. Graduate classes that include off-campus students are scheduled at a video conference facility at Clarkson. An appropriate faculty member is assigned to oversee the courses, coordinate the examinations and evaluation of the student's performance. Courses may also be given through other means of delivery, provided they meet the University and department requirements. These courses shall meet the matriculation requirements set forth in the University catalog.

Comprehensive Examination for Admission to Candidacy

A comprehensive examination based on general preparation in the major field must be taken within two years after admission to the PhD program. If the comprehensive examination is failed twice, the student will be dropped.

Time Limit

After the comprehensive examination is passed; all work done specifically for the doctorate is to be completed within a period of seven calendar years.

Final Examination

A final examination must be passed. This examination will include, as a minimum, an oral examination based on the dissertation. For the final oral examination, a committee will be selected by the faculty advisor and approved by the department chair and dean of the respective school. The committee will consist of a minimum of five members. The members should include at least four Clarkson faculty of assistant professor rank or higher and possessing an earned doctoral degree. At least one of the members must be from a department other than the candidate's major department. With the approval of the Provost, an external examiner with appropriate credentials from another University or industry may also be appointed to serve as one of the five committee members. This committee will judge the technical competence of the dissertation and the oral presentation. Final completion must be received in the student's School office no later than 10 working days before commencement to qualify a student to receive a degree. The thesis must be submitted according to the procedures defined by The Graduate School. For information and assistance contact the graduate coordinator representing your discipline.

ACADEMIC AFFAIRS AND SIGNATURE PROGRAMS

Clarkson Ignite

Ashley Sweeney, Director

Clarkson Ignite serves the entire campus as an innovation ecosystem that connects students, faculty, staff, alumni, and community leaders to gain critical hands-on creative experience. How? It is through shared spaces and programming aimed at stimulating intellectual curiosity, developing entrepreneurial mindsets and skillsets, expanding firsthand learning and making experiences, and forging social and professional connections.

Clarkson Ignite works to instill new ways of thinking and doing in all Clarkson students. The Ignite ecosystem encompasses five key elements: curriculum, extracurricular activities, research, making, and business incubation through the Shipley Center for Innovation. The ecosystem includes the Innovation Hub located in the Andrew S. Schuler Education Resources Center home of group collaboration space, the Makerspace, the Digital Making Suite, and the Studio which is located in Bertrand H. Snell Hall.

Additional co-curricular opportunities may be found throughout affiliated sections of the catalog.

The Shipley Center for Innovation

Jamey Hoose, Director

The Shipley Center for Innovation, which is organized within the Office of Sponsored Research Services, is a University-wide resource dedicated to bringing Clarkson innovations to market via technology transfer, gaining recognition for the technology created by our faculty and students, and creating local jobs for graduating Clarkson students. The Center, which acts as the “business incubation” component of Clarkson Ignite, serves as an engine for economic development in the North Country by engaging in the creation of new enterprises that capitalize on emerging technologies.

In addition to providing general mentorship and services to Clarkson startups, the Shipley Center manages a thriving business incubator location on Clarkson’s downtown campus. In 2018 the Shipley Center launched a new student accelerator program, The Cube, which provides dedicated student entrepreneurs with additional resources to help grow their idea into a profitable company. Shipley Center staff also conduct workshops and hold office hours to provide instruction in basic early-stage concepts such as business modeling and customer discovery.

The Associated Colleges Consortium

The Associated Colleges of the St. Lawrence Valley was chartered in 1970 to stimulate a variety of cooperative activities among Clarkson University, St Lawrence University, SUNY Canton, and SUNY Potsdam. With only 10 miles separating the four campuses, a significant amount of social, cultural and academic cooperation is possible.

Clarkson students have ready access to most resources at the other colleges. Special events are publicized through joint calendars and other means. Each of the four libraries permits students from all of the colleges to draw upon the total holdings of approximately one million volumes (See Educational Resources Center).

Students may cross-register for courses within the consortium, and some sharing of faculty takes place. To be eligible to cross-register, undergraduate students must be enrolled in at least 12 credits at Clarkson, including the cross-registered course, and eligible students can take up to two courses (not available in their home institution) per academic year totaling no more than eight credits on a space-available basis at one or another of the campuses. An academic year for cross-registration includes the fall and spring semesters.

A form for cross-registration is available at

<https://associatedcolleges.org/services/cross-registration/>

Students will be enrolled as non-matriculated students at the host institution and the course(s) will be transcribed at the host institution. At the end of the semester, an official transcript will be sent to the student's home institution and credit will be posted as transfer credit on their Clarkson transcript. Graduate students must receive a grade equivalent to a B (3.000) or higher at Clarkson. Grades in such courses are not used in computing a student's GPA. If cross-registration credits result in a course load requiring additional tuition charges, the student is responsible for those additional charges.

University Libraries

Alexander Cohen, Director of Libraries

The University Libraries provide comprehensive knowledge resources and services to support research, scholarship, teaching, and learning. We are dedicated to offering collaborative support for exploration, discovery, and life-long learning skills to all Clarkson University faculty, staff, students, and to citizens of our local community no matter their location and with respect to diverse needs.

The Harriet Call Burnap Memorial Library is the main library located on the Potsdam Collins Hill Campus in the Educational Resources Center (ERC). Its collections offer materials in various formats including journals, books, audio visual materials, government documents and reports, Clarkson University dissertations, and archival materials. The Health Science Library (HSL) is the University Libraries' extension library

and is located in The Earl R. and Barbara D. Lewis School of Health Sciences (Clarkson Hall) on the downtown Potsdam campus. It provides a wide range of information resources focused on medicine and healthcare. Both locations offer a comfortable place for study.

Sponsored Research Services

Steve McDonald, Director of Research Operations

Sponsored Research Services (SRS) is the central office charged with overseeing the conduct and promotion of research activities at Clarkson University. It is the philosophy of the University that research supports and enhances its educational mission. SRS strives to provide and constantly enhance services to the Clarkson community as well as individuals and companies that come in contact with the Division. Examples of such services include proposal development for faculty and staff; administration of grants and contracts established under federal, state, and private awards on behalf of the University; assurance of compliance with federal, state, private, and other regulations pertaining to grant sponsorship activities at the University; and the creation, submission, or provision of analyses, reports or policies as required. Through these activities, SRS promotes innovation and creativity, thereby increasing knowledge and making the knowledge available and useful for scholarship and education.

Student Achievement Services

Amanda Pickering, Associate Vice President of Academic Affairs & Student Achievement

Kara Pitts, Registrar

Travis Dox, Bursar

Nicole Adner, Director of Financial Aid

Student Records

Grading System

The grades A+, A, A-, B+, B, B-, C+, C, and P are acceptable for credit toward the degree. For graduation, an average of B or better must be earned in non-dissertation courses and seminar work. The grade of P will not affect the average. Students failing to perform satisfactorily will be separated from the University (see Graduate Student Academic Standing and Separation Policy).

Graduate Grade Definitions

A+	Passed with 4.000 quality points per credit hour
A	Passed with 4.000 quality points per credit hour
A-	Passed with 3.667 quality points per credit hour
B+	Passed with 3.334 quality points per credit hour

B	Passed with 3.000 quality points per credit hour
B-	Passed with 2.667 quality points per credit hour
C+	Passed with 2.334 quality points per credit hour
C	Lowest passing grade with 2.000 quality points per credit hour
F	Failed with 0.000 quality points per credit hour
P	Passing: this grade may be employed for seminar courses and other courses for which P/NC grading has been designated. It may also be employed for special projects, and under limited circumstances for MS thesis credits. Approval for a P grade for project or thesis credit requires the approval of the department chair, (or comparable administrative unit), Dean of the school, and the Dean of the Graduate School or Provost.
NC	No credit. This grade is used in seminar courses and other cases for which P/NC grading has been designated. It indicates performance below the level required to maintain progress toward completion of degree requirements.
S	Satisfactory progress towards the completion of on-going project, thesis, or dissertation work for the semester. The S grade is removed and replaced with a P grade when the final report, thesis or dissertation is accepted by the Graduate School.
U	Unsatisfactory progress towards the completion of on-going project, thesis, or dissertation work for the semester. The U grade is removed and replaced with a P grade when the final report, thesis or dissertation is accepted by the Graduate School.
I	Incomplete grade: given only in cases described in the paragraph below. An I grade must be replaced by one of the above letter grades as required by the rules in the paragraph below.
Z	Course Audit. Audited courses carry no grade points or credits, and cannot be used to satisfy degree requirements.
W	Course withdrawal. A grade of W indicates the course was dropped during weeks 5 through 10 of the regular fall and spring semesters. The Registrar sets comparable dates for Summer school and other terms that are not a regular fall and spring semester.
LW	Late Course Withdrawal. A grade of LW indicates the course was dropped during weeks 10 through 15 of the regular fall and spring semesters. The Registrar sets comparable dates for Summer school and other terms that are not a regular fall and spring semester.
WA	Waived Course with credits
WR	Waived with replacement, no credit or quality points

Incomplete Grades

The grade of incomplete (I) is a temporary grade given when a student is unable to complete a course by the end of the academic term due to circumstances that are considered extenuating and beyond the student's control, and can be documented. Incomplete grades can only be given in all of the following conditions have been met:

1. The student has documented extenuating circumstances;

2. The student has completed at least 75% of the course, and has no academic integrity violations for the current term;
3. The student's academic performance to date indicates an ability to pass the course, and;
4. The student has submitted their request for an incomplete grade no later than the last day of the academic term in which they wish to take an incomplete.

Incomplete grades are contingent upon instructor approval, and instructors are under no obligation to grant them. In cases where an incomplete grade is to be considered, the following provisions apply:

1. The student must submit a request for an incomplete (I) grade to the course instructor no later than the last day of the term on an Incomplete Grade Request Form. If a student is unable to submit a request for an incomplete (I) grade, the Dean of Students may submit the request on the student's behalf.
 - a. In cases where normal practice requires extension of course requirements beyond the end of the term (such as travel, fieldwork, or professional experience), a grade of incomplete may be assigned without need for individual student request, with instructor and department chair approval.
2. Instructors who approve of the request for an incomplete grade must outline the work required to successfully complete the course, as well as designate a deadline for the work to be completed. Whenever possible, the deadline should be no later than two weeks into the following term.
 - a. If the faculty member disapproves the request, they shall submit the grade earned for the student at the end of the term.
3. All students seeking more than two incomplete (I) grades in the same semester must consult with the Dean of Students and, if directed to do so, with the Director of University Advising and/or their SAS Rep, prior to seeking faculty approval for their requests.
4. The assignment of an incomplete (I) grade will be made by the Registrar's office upon receipt of a complete and approved Incomplete Grade Request form. The form must be received by the Registrar's office before the grading due-date, otherwise the course instructor shall submit the grade earned by the student.

To remove an incomplete (I) grade, the instructor shall submit a completed Change of Grade form to their department chair (or comparable administrative officer), and upon approval, it is sent to Student Administrative Services. Then the specified grade shall replace the "I" grade in the term in which the student registered for the course.

If a Change of Grade form is not received within five (5) business days from the deadline specified on the Incomplete Grade Request form, then a grade of "F" is recorded.

If the student does not complete the work required to resolve the incomplete grade by the deadline specified on the Incomplete Grade Request form, then a grade of "F" is recorded.

Graduate Student Academic Standing and Separation Policy

Note: This section applies to students in graduate Business, Engineering, and Interdisciplinary programs. Students in other degree programs should consult their program handbooks for the policy and procedures regarding academic standing and separation.

Clarkson graduate students are regarded as in “academic good standing” if they satisfy two conditions:

1. A minimum Cumulative Grade Point Average (GPA) (see below section) and,
2. Satisfactory progress toward the degree (see below section).

Minimum Cumulative GPA Standards

Academic good standing	Students are in academic good standing if they have a minimum 3.000 Cumulative GPA. The Cumulative GPA is calculated at the end of each term.
Academic warning	Students in good academic standing whose Cumulative GPA falls below a 3.000 will be placed on academic warning. Students on academic warning whose Cumulative GPA is 3.000 or higher at the end of their next term will return to academic good standing. Students on academic warning whose Cumulative GPA falls between a 2.700 and 2.999 at the end of their next term will remain on academic warning.
Academic separation	Students on academic warning whose Cumulative GPA is below a 2.700 at the end of their next term will be separated from the University, and this separation will be recorded on the official transcript.

Academic standing status for past terms is not modified based on future GPA changes due to courses being repeated or omitted from the cumulative GPA.

Continuance

Students who are separated from the University by the process described above, may not enroll in future terms until approved by the Graduate School’s Readmission and

Continuance Committee. Appeals to this committee for continuance must be made in writing by the student, following the guidelines and deadlines set forth in the Notice of Academic Separation sent to the student. The decision must be given to the student and the Registrar within the published time frame. If continued, students are placed on academic warning for the term into which they are continued.

Satisfactory Progress

In addition, graduate students are required to maintain satisfactory academic progress. In order to maintain satisfactory academic progress, students must be able to complete their degree within the published maximum timeframe allowed for that particular degree. Multiple factors determine this:

1. The courses and other academic requirements remain to complete the degree program.
2. The time remaining to complete these.
3. Other program/ degree requirements.
4. The mathematical possibility of achieving the 3.000 Cumulative GPA required for graduation.

Academic progress is evaluated at the end of each term by the appropriate Graduate Coordinator and Program Administrator(s).

Students who are determined not to be maintaining satisfactory academic progress will be separated from the University.

Thesis-based students who have completed all coursework and received two consecutive terms of unsatisfactory progress may be dismissed following evaluation by the Graduate School's evaluation committee.

The designated responsible administrator shall notify the students and the Registrar of separations within 5 business days of the decision. Separation will be recorded on the official transcript.

Graduate Health Sciences Student Academic Standing and Separation Policy

Academic standing in the The Earl R. and Barbara D. Lewis School of Health Sciences programs (MS in Occupational Therapy, DPT in Physical Therapy, MS Physician Assistant Studies) at Clarkson University encompasses academic course work, clinical skills, and professional behaviors.

Clarkson graduate students in the The Earl R. and Barbara D. Lewis School of Health Sciences program are regarded as in "academic good standing" if they satisfy two conditions:

1. A minimum Cumulative Grade Point Average (GPA) (see below section) and,
2. Satisfactory progress toward the degree (see below section).

Minimum Cumulative GPA Standards

Academic good standing	Students are in academic good standing if they have a minimum 3.000 Cumulative GPA. The Cumulative GPA is calculated at the end of each term.
Academic warning	Students in good academic standing whose Cumulative GPA falls below a 3.000 will be placed on academic warning. Students may also be placed on academic warning for not meeting department professional behavior standards. Students on academic warning whose Cumulative GPA is 3.000 or higher at the end of their next term will return to academic good standing.
Academic separation	<p>Students will be separated from the University for any one or more of the following:</p> <ol style="list-style-type: none">1. The student is on academic warning and has a Cumulative GPA below 2.700 at the end of the term following initial placement on academic warning.2. The student receives a grade below a C in any course.<ol style="list-style-type: none">1. Students in the Physician Assistant Studies program may receive a grade below a C on 1 full-time clinical education course. In this case, students must petition the department to continue in the program and will need to retake the full-time clinical education course.3. The student receives a grade of No Credit (NC) in a full time or integrated clinical education course.4. The student demonstrates professional behaviors that violate the profession's code of ethics.5. The student is on academic warning for more than a total of 2 semesters.6. The student withdraws from a course because he/she will not be able to satisfactorily pass the course.

Continuance

Academic progress is evaluated at the end of each term and/ or course by the appropriate program faculty. Students are notified as to their academic standing within 5 business days of completion of the semester or course by the appropriate department.

Students who are determined not to be meeting minimum GPA requirements or not maintaining satisfactory academic progress will be separated from the University. Students and the Registrar will be notified within 5 business days of completion of the academic term or course by the appropriate department. Students who are separated from the University by the process described above may not enroll in future terms.

Students who are separated from the University may appeal the decision in writing to the Graduate School's Readmission and Continuance Committee within 3 business days of receiving notification of separation from the University. For students in the Earl R. and Barbara D. Lewis School of Health Sciences programs, the committee shall consist of the Dean or Associate Dean of Arts and Sciences or Dean of Students (or his/ her designee), and one faculty member from each of the graduate professional Health Science programs. The chair of the program in which the student was enrolled will serve on the committee to provide information, but will not be a voting member. The committee will review all appropriate information and provide a decision to the student regarding the appeal within 5 business days of receipt of the appeal. If allowed to continue in the program, the student is placed on academic warning for the term into which they are continuing and may need to develop an approved action plan to support their academic progress in subsequent terms.

Academic standing status for past terms is not modified based on future GPA changes due to courses being repeated or omitted from the Cumulative GPA.

Satisfactory Progress

Graduate health science students are required to maintain satisfactory academic progress. In order to maintain satisfactory academic progress, students must be able to complete their degree within the published maximum timeframe allowed for that particular degree. Multiple factors determine this:

1. Professional behavior standards of the programs.
2. Safety with clinical skills.
3. The courses and other academic requirements remain to complete the degree program.
4. The time remaining to complete these.
5. Other program/ degree requirements.
6. The feasibility of achieving the 3.000 Cumulative GPA required for graduation.

Students in the Physician Assistant Studies program must have a Cumulative GPA of 3.000 at the end of the didactic portion of the curriculum to proceed to clinical internships.

Graduate Student Degree Conferral and Commencement Policies

In order for a graduate student to have their degree conferred, the following have to be met:

1. All coursework and seminar credits must be completed as specified by the degree requirements.
2. Master's theses or Doctoral dissertations must be approved by the student's research committee, department, school, and Dean of the Graduate School. All associated final and signed copies and paperwork must be submitted to the appropriate school office by the published deadline. This deadline is generally 10 working days before commencement.

3. Projects for non-thesis Master's students must be approved by the advisor and department. All associated paperwork must be submitted to the appropriate school office by the published deadline. This deadline is generally two working days before the faculty vote on degree candidates.

Students who do not meet these requirements and deadlines may be considered a conditional degree candidate if:

1. They are in the Reh MBA Program at Clarkson and are registered for up to three hours of coursework in the Clarkson international Summer program, OR
2. They are enrolled in the Doctor of Physical Therapy program for the final three hours of coursework that is not complete at the time of the faculty vote.

Requests for conditional degree status must be approved by the Dean of the appropriate school or comparable unit administrator and submitted to the Dean of the Graduate School at least 10 working days before the faculty vote on degree candidates.

For students voted "on condition," the degree will be conferred when the respective School receives a final grade for the remaining course(s), as appropriate. All conditions for graduation must be met prior to the reporting of graduates to the New York State Education Department; otherwise degrees will be conferred in the next semi-annual commencement ceremony.

Commencement Participation Policy

A student may participate in commencement if:

1. The student is in good academic standing, and
2. The student has defended his or her dissertation, thesis or presented their project, yet has failed to meet the published deadline for the final signed copies and completed paperwork, OR
3. The student is in a research based Master's degree program, has submitted an approved and signed thesis or project report, and requires no more than 6 additional credits of coursework, OR
4. The student is in a course-based or project-based Master's degree program and is within 6 credits of completing their degree, OR
5. The student has completed all required classroom work and has Clarkson educational commitments that would preclude being on campus for the next scheduled graduation ceremony.

Students who have not completed all graduation requirements may request to participate in the graduation ceremony, which requires explicit approval by their Dean or Institute Director, with the approved request submitted to the Dean of the Graduate School at least 10 working days before the faculty votes to confer degrees at commencement.

In the case of an incomplete dissertation, thesis or project, the petition must be initiated by the thesis or project advisor and be approved by the department or program chair, and the Dean of the respective school or comparable unit administrator. This petition should:

1. Certify that a successful presentation or defense of thesis had occurred prior to the published deadlines, and
2. Carry the signatures of the thesis or project advisor, and all other members of the thesis examining committee indicating that they are confident that the remaining corrections to the thesis or dissertation can be completed by the student.

Students who are allowed to participate in the graduation ceremony under these conditions will receive their diploma and be counted as graduates at the next graduation ceremony following the completion of their degree requirement.

Student Accounts

Expenses

Tuition and other charges at Clarkson are set at the minimum permissible for financially responsible operation of the University and are considerably less than actual costs. Gifts and grants received through the generosity of alumni, industry, foundations, and friends play an important part in reducing the difference. Although Clarkson will make every effort to maintain charges at current levels, the University reserves the right to revise or change financial requirements.

Tuition and Fees

The tuition rates charged by the University are not dependent on the format of the educational programs for which they are payable. Accordingly, if the University is required to alter the structure of its on-campus educational programs or transition students to remote learning models (in whole or in part) due to restrictions imposed by federal, state or local governmental authorities or applicable law, or if the University determines such action to be warranted in light of continuing or potential impacts of the COVID-19/coronavirus pandemic, no reduction or refund of tuition or fees will be made based on the resulting changes to the programs in which students are enrolled.

Tuition costs for 2025-2026 graduate programs vary and are charged on a per credit hour basis. Residential program graduate students are subject to a Residential Program Resource Fee each term and a Residential Program CUGSA Activity Fee each term. Non-residential program graduate students are subject to a Non-Residential Program Resource Fee each term and a Non-residential Program CUGSA Activity Fee each term.

In order to remain a candidate for a graduate degree, a graduate student not on-campus who has not completed all degree requirements must continue to register for one credit hour each semester until all degree requirements have been completed. If recorded as a part-time student, these students are not required to pay a Residential Program Resource Fee nor a Non-Residential Program Resource Fee, but may be required to

begin re-payment of outstanding loans. Exception from payment of the tuition for this credit hour may be granted to the student (when circumstances warrant) by the Dean of the respective school upon written request or personal interview.

University Graduate Program Charges

The summary of annual University charges for the 2025-2026 academic year follows:

Per Credit Hour	Program Type
\$1,025	Interdisciplinary <ul style="list-style-type: none"> • Construction Engineering Management (MS) • Construction Engineering Management (Advanced Certificate) • Engineering Management (MS) • Applied Data Science (MS) • Dual degree MS in Data Science/MB
\$1,545	Sciences <ul style="list-style-type: none"> • Basic Science (MS) • Bioscience & Biotechnology (MS) • Bioscience & Biotechnology (PhD) • Chemistry (MS) • Chemistry (PhD) • Computer Science (MS) • Computer Science (PhD) • Mathematics (MS) • Mathematics (PhD) • Physics (MS) • Physics (PhD)
\$1,545	Engineering <ul style="list-style-type: none"> • Business of Energy (Advanced Certificate) • Chemical Engineering (MS) • Chemical Engineering (PhD) • Civil and Environmental Engineering (MS) • Civil and Environmental Engineering (PhD) • Electrical and Computer Engineering (MS) • Electrical and Computer Engineering (PhD) • Materials Science and Engineering • Mechanical Engineering (MS) • Mechanical Engineering (PhD) • Power Systems Engineering (Advanced Certificate)
\$1,025	Business <ul style="list-style-type: none"> • Business Administration, 1-year Residential MBA

	<ul style="list-style-type: none"> • Business Administration, Online MBA • Business Analytics, Residential MBA • Business, Advanced Certificates • Global Supply Chain Management, Residential MBA • Healthcare Management, MBA • Clinical Leadership, MS • Healthcare Data Analytics, MS • Combined MBA/MS Health Care Data Analytics
\$1,545	Institute for Sustainable Environment <ul style="list-style-type: none"> • Environmental Policy (MS) • Environmental Science and Engineering (MS) • Environmental Science and Engineering (PhD)
Varies	Non-Degree (determined by plan)

Flat Rate per term	Program
\$13,685	Health Sciences <ul style="list-style-type: none"> • Physician's Assistant Program
\$12,719	<ul style="list-style-type: none"> • Physical Therapy Program
\$11,035	<ul style="list-style-type: none"> • Occupational Therapy Program

Other expenses, such as travel, books, and spending money, vary. An estimated figure is approximately \$4,130 for one academic year.

Graduate Resource Fee (Potsdam Residential)

The \$805 per year fee is assessed to all full-time graduate students in residential programs. Covers operations for access to recreational facilities, fitness center, health center services, computing lab resources and related software, webinars, etc (Note: This is not a health insurance premium).

Graduate Resource Fee (Online)

The \$77 per term fee covers operations for access to computing lab, online resources and related software, webinars, etc. This includes guest speakers and lecturers, computer lab resources and related software, the learning management system, Echo 360, which allows for asynchronous learning sessions, voice thread and other online related services, library and database access and free transcripts for life.

Student Activity Fees

Covers athletics, student clubs and other miscellaneous programs for all Clarkson University students.

- Potsdam Residential \$25 per term
- Online \$10 per term

Health Insurance

Student health insurance is mandatory at Clarkson University for residential program students. Students must either have adequate health insurance coverage through their own policy, be covered by their parent's policy or enroll in Clarkson's contracted insurance. The rate for 2025-2026 is \$4,355 for coverage from 8/1/25 – 7/31/26. To assure clearance for check-in, students need to complete an activity guide in their myCU account and secure an approved waiver on a yearly basis.

Payment

Payment in full for all tuition, fees, residence and dining expenses must be made on or before the financial clearance deadline. Check-in cannot be completed and the student cannot be admitted to class unless satisfactory payment is made. All accounts will be assessed a late fee charge of 1% of the unpaid balance per month. Enrollment indicates that the student agrees to pay all attorney's fees and other reasonable collection costs necessary for the collection of any amount not paid when due and will be added to the unpaid balance. It is the University's policy to withhold diplomas until the balance of the account is paid in full.

Tuition and Fees Refund Policy

Adjustments are based on the last recorded day of the student's University attendance as determined by and attested to by the Student Achievement Services Office in conjunction with the following tables:

Complete Withdrawal for students enrolled in Semester (Fall & Spring) based programs and Trimester (Fall, Spring & Summer) based programs:

Prior to the start of the term	100%
1st week of the term	90%
2nd week of the term	75%
3rd week of the term	50%
4th week of the term	25%
5th week of the term until the end of the term	0%

*A Complete Withdrawal consists of a student withdrawing from all of his/her enrolled credits within a term.

**The corresponding percentages above will be applied to tuition, CUGSA Activity Fee, Resource Fee, Room and Meals (consumption is not taken into consideration). There will be no prorating of the Student Health Insurance Premium if the coverage is in force.

Complete Withdrawal for students enrolled in a Quarter (Summer, Fall, Winter & Spring) based program:

Prior to the start of the term	100%
1st week of the term	90%
2nd week of the term	65%
3rd week of the term until the end of the term	0%

*A Complete Withdrawal consists of a student withdrawing from all of his/her enrolled credits within a term.

**The corresponding percentages above will be applied to Tuition and the Resource Fee. There will be no prorating of the Student Health Insurance Premium if the coverage is in force.

Partial Withdrawal for students enrolled in a Quarter (Summer, Fall, Winter & Spring) based programs:

Prior to the start of the term through the 2nd week of the term	100%
3rd week of the term until the end of the term	0%

*A Partial Withdrawal consists of a student withdrawing from one or more of his/her enrolled credits within a term, but still remains enrolled in at least one credit for the term.

**Adjustments will be made only to the tuition cost associated with the withdrawn credit(s).

Official Date of Withdrawal

The official date of withdrawal is established upon receipt of written notice of withdrawal from the academic department.

Financial Assistance

Graduate students enrolled in Master's and PhD level programs may finance their education through a combination of university awards (assistantships, fellowships, and scholarships) and student loans. University awards are granted by each graduate school. U.S. students and permanent residents who are enrolled on at least a half-time basis are eligible to apply for federal student loans. Students must file a FAFSA annually. Refer to the Student Administrative Services website for more information on federal loan programs and application procedures.

University aid is awarded by each academic department. Not all types of University awards are available in all programs. University awards currently available include the following:

Teaching Assistantships	Teaching Assistantships (TA) provide a stipend plus full tuition. Instructional requirements are up to 20 hours of service per week in laboratory or other designated work for the University during the academic year, or 12 hours of service per week in the above designations during the calendar year.
Research Assistantships	Research Assistantships (RA) permit concentration in the student's research field during the period of study, do not require teaching responsibilities, and provide a standard stipend plus full tuition. Forty hours of service per week, inclusive of classroom work and research duties, are required.
Industrial and Governmental Fellowships	Fellowships permit concentration on the student's research problem during the entire period of study. Funding may cover full or partial tuition and/ or a stipend. The stipend must be at least minimum wage and duties may not exceed 40 hours per week including time to attend classes.
Graduate Assistant	Funding may cover full or partial tuition and/ or a stipend. The stipend must be at least minimum wage and duties may not exceed 40 hours per week including time to attend classes.
Partial Tuition Scholarships/ Assistantships (PTS/PTA)	A number of partial tuition scholarships/ assistantships are made available each year. These scholarships may be awarded to deserving students on a merit basis, and may be in addition to other types of financial assistance.

Financial Aid Types and Work Hours Restriction

Full Teaching/ Research Assistantship (TA/RA)	<ol style="list-style-type: none"> 20 Hours per week work; 20 hours per week study (total 40 hours). May NOT accept work in any other department.
Graduate Assistantship (GA)	<ol style="list-style-type: none"> Up to 20 hours per week work (stated in contract); 20 hours per week study (total variable). May work in other departments- total work hours can NOT exceed 20 hours.

Partial Tuition Scholarship (PTS)	<ol style="list-style-type: none"> 1. No work hours; 20 hours per week study (total 20 hours). 2. May work in other departments up to 20 hours per week.
Partial Tuition Assistantship (PTA)	<ol style="list-style-type: none"> 1. Up to 4 hours per week (stated in contract); 20 hours per week study (total variable). 2. May work in other departments- total work hours can NOT exceed 20 hours.

Vacation

All graduate students, appointed for one year under a Research Assistantship, Teaching Assistantship, or Fellowship are entitled to receive two weeks of vacation plus all holidays when the University is officially closed.

Satisfactory Academic Progress for Federal Financial Aid

Federal regulations require that schools monitor the academic progress of every federal financial aid recipient and certify that the student is making satisfactory academic progress towards earning his/her degree. This policy governs federal financial aid only. Institutional awards, scholarships and assistantships may have other requirements. Students may only receive federal aid for courses that are required for degree completion.

Satisfactory academic progress is evaluated at the conclusion of each term and include, per federal regulation both quantitative and qualitative measures. These measures include:

1. Cumulative Grade Point Average (GPA):
 - a. A Cumulative GPA of 3.000 is required. Students with a Cumulative GPA less than 2.700 are not eligible for federal aid (see section below).
2. PACE:
 - a. A minimum percentage of attempted credit hours must be earned every semester. PACE is determined by:
 - i. Cumulative number of earned hours
 - ii. Cumulative number of attempted hours
 - b. Students must maintain a minimum PACE of 50%.
3. The maximum time frame for meeting degree requirements.
 - a. Students must complete their degree within 150% of the published length of the program. All graduate credits attempted at Clarkson are applied to the maximum time frame. There is no appeal of the maximum time-frame standard.
 - b. Attempted credits for PACE and the maximum time frame include

- i. Earned hours - Passed (A-D), Pass (P)
- ii. Repeated courses- All attempts (see repeated course section below).
- iii. Withdrawal- Maximum time frame regulations do not allow for the exclusion of courses in which a student has remained past the drop period and earned a grade of "W" or "LW"
- iv. Failure – F
- v. Incomplete- I
- vi. All accepted transfer – T
- vii. All graduate courses attempted at Clarkson, even if they are not used to meet degree requirements.
- c. Earned credit hours for PACE:
 - i. Grades of A,B,C or P (with credit)
 - ii. All accepted transfer credits (T)

Financial Aid Warning

A student whose cumulative GPA is between 2.700 and 2.999 and/or whose PACE is less than 50% is not making Satisfactory Academic Progress for Federal Financial Aid. The student is notified by the Financial Aid Office via email to the student's Clarkson email address that he/she is on Financial Aid Warning for the subsequent term of attendance. During the Financial Aid Warning term, the student retains eligibility for federal financial aid.

A student who meets both the PACE and GPA standards at the conclusion of the Financial Aid Warning term is again meeting Satisfactory Academic Progress for Federal Financial Aid and is eligible for federal aid for the subsequent term of attendance.

A student who does not meet both the PACE and GPA standards at the conclusion of the Financial Aid Warning term is notified by the Financial Aid Office via email to the student's Clarkson email address that he/she is not making Satisfactory Academic Progress for Federal Financial Aid and is ineligible for federal aid for subsequent terms. A student may not have two consecutive Financial Aid Warning terms.

Financial Aid Appeal Process

A student who does not meet the federal financial aid satisfactory academic progress standards at the conclusion of the warning term or a student whose GPA is less than 2.7 may file an appeal based on catastrophic or extraordinary circumstances "beyond the student's control," such as personal illness or injury, or the death, illness or injury of a family member, relative or close personal friend or other situations specific to the individual student.

There are four required elements of an appeal:

1. A completed and signed appeal form.
2. A written statement from the student.

- a. Federal regulations require a student who is requesting an appeal to submit a written statement explaining:
 - i. Why the student was not able to meet the satisfactory academic progress standards.
 - ii. What has changed that will allow the student to meet the standards at the conclusion of the academic plan and the supporting (see below).
- 3. Supporting documentation.
 - a. A student requesting an appeal must submit supporting documentation such as:
 - i. A physician's written statement to substantiate illness or accident
 - ii. A copy of a death certificate or newspaper obituary
 - iii. A written statement from clergy, family member(s), or other third party familiar with the student's situation, OR
 - iv. A written statement from an academic advisor, professor or counselor.
- 4. Development of an academic plan.
 - a. As part of the appeal, the student must work with the Financial Aid Office and their Department to develop an academic plan. The academic plan is designed to enable the student to meet both PACE and GPA standards at the conclusion of the plan.
 - b. An academic plan may entail one to four terms and includes specific requirements the student must achieve. Although the student is not making satisfactory academic progress, federal aid is reinstated on a term by term basis.

Students eligible to submit an appeal are notified via email at the conclusion of the SAP evaluation that occurs at the end of each term or at the time of readmission to the University. Appeals must be submitted at least two weeks prior to the beginning of the term he/she wishes to receive federal financial aid. A student filing an appeal must authorize the release of pertinent information as part of an investigation of the facts concerning the failure to meet satisfactory academic progress standards.

Each appeal will be investigated and reviewed by the Assistant/Associate Director of Financial Aid and the Graduate Student Services Representative in conjunction with faculty members and advisors from the student's program of study as well as other Clarkson University personnel as necessary.

The Office of Financial Aid will notify the student by e-mail of the final decision. If the appeal is approved the student will work with the Financial Aid Office and their Department to create an academic plan. Once the Academic Plan has been designed and required signatures have been obtained the student will be placed on Financial Aid Probation and federal aid eligibility will be reinstated for the term.

At the end of the Financial Aid Probationary term, the student will be evaluated according to the requirements specified in the academic plan. Provided that the student is successfully meeting the conditions of the plan, the student may continue to receive federal aid for the subsequent term. In cases in which an academic plan includes more than one term, the student will be evaluated at the end of each term. If the student continues to meet the requirements of the plan, the student remains eligible for federal financial aid.

A student who does not meet the conditions of the academic plan or whose appeal is denied is no longer eligible for federal aid at Clarkson until both standards are met. Students who are ineligible for aid may regain eligibility by taking courses at Clarkson without receiving federal aid that raises their GPA to the minimum standards and/or increases earned hours to the minimum PACE requirements

Financial Aid with Repeated Courses

Courses in which a grade of F, W or LW is recorded on a student's transcript may be repeated a maximum of 2 times. The earned hours are counted once. The attempted hours are counted each time and may be used to establish full-time enrollment status. The student may receive financial aid for these course repeats.

Additionally, federal regulations allow a student to repeat a course once if the student previously earned credit for the course (A, B, or C). The repeated course(s) will be used toward full-time enrollment status and are eligible for financial aid. Courses repeated more than once will not count toward enrollment status and are ineligible for financial aid. More than one course may be repeated per term. The attempted hours are counted each time. The earned hours are counted once. The grade from the prior completion(s) is excluded from the GPA calculation.

Academic Grade Changes and Incompletes for Federal Financial Aid

For purposes of determining satisfactory academic progress for federal and institutional financial aid, all grade changes including incompletes must be submitted to Student Administrative Services prior to the 10th day of the subsequent term. This deadline may differ from academic departmental guidelines.

Readmitted Students and Financial Aid

A student who has left the University for one or more terms and has been readmitted will have satisfactory progress for financial aid reviewed at the time of readmission. Transfer credits must be received prior to the 10th day of the term to be included in the satisfactory progress determination.

If the student is determined to meet satisfactory progress, federal aid will be offered provided the student meets all other eligibility requirements. If it is determined that the student is not meeting satisfactory progress, the student will be notified by email to the student's Clarkson email address of his/ her status and the appeal process.

Enrollment Status

A graduate student will be classified as full-time in any term in which he or she is enrolled in at least nine credit hours per semester or six credit hours per quarter. When such degree requirements have been met, the student will be required to register for at least one credit hour of project/thesis, be in residence, and be actively engaged full-time in completing the project/thesis in order to be classified as a full-time student.

A graduate student will be classified as half-time in any term in which he or she is re-enrolled in at least 4.5 credits hours per semester or 3 credit hours per quarter.

Student Leave

Graduate students planning to exit the University, whether permanently or for a leave of absence, must initiate the process in the appropriate academic school or institute.

A leave of absence for a graduate student is permitted at the discretion of the graduate coordinator, department chair, or Dean of the school. The University may require a written statement from the student, and other documentation as may be appropriate, to support a leave of absence or withdrawal request.

If a student's intent is to permanently leave the University or the student is not in good academic standing, the student will be withdrawn from the University. The effect of a withdrawal on a student's transcript and finances is based on the date of the withdrawal. For information on grading policies relating to withdrawal, contact the Student Administrative Services office at sas@clarkson.edu or refer to the Clarkson Regulations. Refund policies for withdrawals may be located in this catalog and can also be found in the Clarkson Regulations.

Veterans Benefits

In addition to participation in various GI Bill® educational programs, Clarkson University is partnered with the VA in the Post-9/11 GI Bill® Yellow Ribbon Program, which provides full tuition benefits to qualified veterans.

In accordance with Title 38 US Code 3679 subsection (e), Clarkson University adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. Clarkson will not:

- Prevent, nor delay the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources available to other students who have satisfied their tuition and fee bills to the institution, including but not limited to access to classes, libraries, or other institutional facilities.

However, to qualify for this provision, such students are required to provide a Certificate of Eligibility to the School Certifying Official no later than the first day of class.

GRADUATE STUDENT AFFAIRS

Student affairs is a catalyst for bridging diverse academic, cultural, professional, and social experiences. Graduate students are provided with a variety of support services dedicated to meeting the needs of those pursuing advanced education.

Student affairs staff and services are available for all graduate students, including online programs.

Student Regulations

Each student is responsible for knowing the contents of the Clarkson Regulations. The Regulations contain information on student rights and responsibilities, course policies, academic regulations, academic integrity, student conduct, grievance procedures, and policy statements. For a link to the Clarkson Student Regulations, please visit: <https://www.clarkson.edu/student-administrative-services-sas/clarkson-regulations>.

Orientation

Students know that they have been accepted to an academically selective institution, yet the atmosphere at the University is friendly and supportive, one in which students go out of their way to help each other succeed. Our students learn the importance of an individual's contribution to successful teamwork in the completion of any project. This provides the Clarkson graduate with experience and insight into the significance of developing intellectual and interpersonal skills simultaneously.

Clarkson's concern for new students begins even before they arrive on campus. From acceptance to arrival (for campus-based programs), students will receive relevant information pertaining to their experience, including access to an online platform to ease assimilation prior to matriculation that shares important information before students begin, their first few days, and navigating Clarkson University prior to your program's specific orientation. Program coordinators and staff are available throughout the year to assist students.

Graduate Student Association

The Clarkson University GSA is an organization that directly represents the interests of the graduate student body and provides a variety of social and professional development programs during the entire year for students on all campuses. Sample events from past years include recognition dinners, social hours, athletic events, grant writing seminars, and much more. This group works closely with the Graduate School to ensure the needs and interests of graduate students are met.

Graduate Housing and Dining

A wide range of housing accommodations are available near Clarkson campuses. For detailed information or for copies of the listings of off-campus private rentals of rooms, apartments, or houses, contact the graduate coordinators for each program or visit the

online orientation portal. CUGSA is also a great resource for students seeking accommodations.

Residence halls at the Potsdam campus are primarily for undergraduate students; however, graduate housing is available on a limited basis. Potsdam campus graduate students may contract for meals in any of the University dining halls on a term basis even though they do not reside on-campus. They may also elect to eat on a cash basis in any of the dining areas on the Potsdam campus.

Extracurricular Activities, Cultural, and Recreational Opportunities

There are many opportunities to enhance the educational experience through participation in a range of extracurricular activities. The Clarkson community has easy access to many cultural and recreational facilities throughout New York State, New England, and Canada, as well as on each campus.

Religious and Spiritual Life

Although it is not a religious-affiliated university, Clarkson acknowledges the moral and spiritual development of its students. Some students pursue their spiritual development in personalized ways, while others attend services of organized religious groups near our respective campuses.

Student Center & Graduate Student Lounge/Atriums

The Student Center is the focal point of activities on the Potsdam Hill campus. Students in the Earl R. and Barbara D. Lewis School of Health Sciences Programs have an open atrium to socialize, study, and eat meals in an open atrium as students enter the main building. Similarly, the Capital Region Campus offers the student atrium at the entrance of the Main Building. The Student Center and atriums are places where students can come to spend time between classes, study, and hold meetings and evening events. There are a variety of lounges and spaces with comfortable chairs and tables for studying and relaxing. In addition, meeting rooms are available for group meetings and other activities at all campuses.

Cheel Arena on the Potsdam Campus

Cheel Campus Center boasts a 3,000 seat multipurpose arena. The Arena, home of men's and women's Golden Knights Hockey, is also the place to attend University Convocation, University Recognition Day, Commencement, and other large-scale events.

Academic Support & Student Engagement

The Student Success Center facilitates and supports student educational, personal and professional growth with provision of Academic Support and Preparation, Student Engagement and Enrichment, Access and Opportunity, Retention Initiatives, and Graduation School Awareness and Planning. For graduate students specifically,

Academic Skills and Student Retention Specialists are on staff to assist with needs related to academic preparedness.

Health & Counseling Center

Personal counseling is provided by full-time professional counselors who are prepared to deal with a variety of concerns including stress, alcohol abuse, eating disorders, depression and sexual issues. However, students not only seek help for specific problems, but make use of counseling to explore feelings, values and life directions. The counseling staff offer a variety of modalities and assessments that can help increase self-awareness and clarify goals. In 2023 the Counseling Center expanded collaboration with an on-line provider, Mantra Health, to offer additional counseling and mental wellness support resources to all enrolled students, free of charge. In addition to counseling, the staff is prepared to make appropriate medical referrals.

Health Services

The University has forged a partnership with Canton-Potsdam Hospital (CPH) who provides professional staffing and services at the University's Student Health Center located on the Potsdam campus. Through this partnership, students enjoy a comprehensive health care program and the broad professional capacities provided by the hospital and its highly trained staff. At the Student Health Center (centrally located in the Educational Resources Center), CPH provides clinical services to include basic medical care, preventative care, general physicals for student-related activities and limited urgent care. Students also have access to CPH's lab services.

Most visits to Health Services and many of its services are free of charge. Health Services is open weekdays from 8:00 a.m. – 4:30 p.m. during the academic year. After hours emergencies are handled at CPH, which is located approximately one mile from campus. There is also an Urgent Care Center on Lawrence Avenue in Potsdam.

Office of Accessibility Services

This is the initial point of contact for students with documented disabilities seeking accommodations or services. The office is responsible for maintaining disability-related documentation, certifying eligibility for receipt of services, determining reasonable accommodations, and ensuring the provision of those services. Students are asked to contact the Office of Accessibility Services prior to the beginning of each term at Clarkson in order to ensure that accommodations will be available in a timely fashion. The student will meet with the staff of Accessibility Services to review documentation and determine reasonable accommodations. The Office of Accessibility Services will provide instructions to the student for faculty and staff notifications requesting reasonable accommodations. Reasonable accommodations will be provided to eligible students who have followed the procedures as developed by the Office of Accessibility Services. Services may include short-term arrangements for students who have become temporarily disabled. Office staff is available for consultation via conferencing software for students enrolled at CRC or in an online program.

Access Initiatives Office

Jennifer Ball, VP of Access Initiatives

The Access Initiatives Office oversees strategic planning for access initiatives and provides dynamic programs and training for Clarkson's students, faculty, and staff. These include ongoing opportunities to learn with and from our team through a range of methods including speakers, open dialogues, cultural festivities, workshops and more.

The Access Initiatives Office oversees several lounges, organizations, and committees at Clarkson. Our team members aim to create and support a welcoming campus community for employees and students. It is our goal to cultivate an environment that educates, empowers, and celebrates all of our students and employees.

Working in partnership with other departments, offices, institutions, and the surrounding community, it is our responsibility to recognize and support the populations represented on our campus. We believe that continuously advocating for access is necessary to achieve academic and institutional success and to prepare our students to be leaders in a diverse world.

Career Center & Experiential Learning

The Career Center assists all Clarkson students in career preparation, providing options for entry level and mid-level employment, with experiential learning opportunities available. Assistance with pursuing post-college employment and furthering graduate study is also central to the mission of the Center. It is also a primary focus of the Center to develop relationships with business and industry that recruit or could potentially recruit our graduates, assuring that these organizations include Clarkson among their primary college relations and recruiting universities.

Career Center and Job Search Services

Individual career coaching appointments are available through the Career Center to discuss topics such as career direction and choice, skills identification, employment opportunities, and job search techniques. A dedicated graduate student career specialist is available to help students develop strategies to address career-related concerns. The Center facilitates a wide number of career-oriented workshops and programs for graduate-level students including career fair, alumni connections, resume and interview preparation techniques, and job-search strategies.

Among the many benefits of a Clarkson education is the alumni network. Alumni serve as a critical link to the Center. The Center also reaches out to the community by planning programs with any campus organization or academic program. The Career Center provides access to internship and permanent job opportunities through the following means: employer access at both Capital Region and Potsdam campuses, recruiting program with business, industry and government; Career Fairs; a web-based resume database system that enables the Center to provide students' resumes to

employers; a job-listing online platform called Handshake;; and a network of thousands of Clarkson alumni who can be accessed at any point in the students' time at the University and beyond.

Clarkson's reputation with hundreds of companies across the country, combined with a comprehensive Career Center, has resulted in positive outcomes for the graduates consistently over the years. Specific employment and salary statistics for recent classes are available upon request from the Center.

Experiential Education Program

Internship Program

As part of the professional experience component, the Career Center also offers assistance in identifying and applying for internships. Students from all academic majors can pursue internships during any summer of their graduate program, as well as some unique study/internship programs that are offered during the semesters. Most internships are paid; in some cases, students receive a stipend and may receive academic credit, and some internships are for credit only.

Internships are available with business and industry across the country; with local, state, and federal government agencies; and with other agencies, non-profits, and educational institutions. Students work closely with the Center and their academic advisors to select an internship that best suits their needs.

International Center

The International Center is a hub of activity providing the Clarkson community with a multitude of global opportunities – experiences – and advisement.

Go Abroad

One of the best ways to prepare for the global workforce is to immerse yourself in another culture. The International Center provides students with numerous global experiences, such as: traditional semester/year exchange with many universities around the globe – short-term/faculty led programs – or – international internships.

Study Abroad provides an excellent opportunity for undergraduate students to enhance their academic background and prepare for the global marketplace through exposure to another educational system and culture. The primary program open to all students offered by the International Center is the Student Exchange Program. The program is designed for students to spend a semester or a year abroad usually during their junior year. Students go through a competitive application process during the sophomore year to be considered for the program. Clarkson University has articulated exchange agreements with many universities around the world Please see the Clarkson International Center website for a listing of Clarkson's Exchange Partners by Country.

In addition to the semester or year-long exchange opportunities, Clarkson offers students the option to participate in short-term programs or faculty led trips. The short-term programs are 2-3 weeks in duration and are ideal for those students who do not wish to be gone for a full semester or year. Faculty led trips usually occur immediately following the spring semester while enrolled in a course during the spring semester. The International Center works with all disciplines to ensure all students in all majors that require or want a global experience have the opportunity.

Exchange

Financial Policies

Exchange Programs: Students who participate in the Study Abroad/Exchange Program through Clarkson must attend one of our exchange partner universities in order to receive financial aid. During the exchange semester(s) students pay their tuition to Clarkson; there is no tuition paid to the exchange university. Room, board, and other fees are paid directly to the exchange university by the student. The financial assistance package is applied to the participant's account as if that student were attending Clarkson University. Any credit balance may be requested through the Director of Financial Aid after tuition is applied and all required financial aid documentation (i.e. loan promissory notes, signed summary, etc.) are processed. This credit can be used toward the room, board, and other fees at the exchange partner university. It is an important step in the application process for the student to consult with the Director of Financial Aid in order to understand how their financial assistance package will be applied to the study abroad/exchange experience.

Non-exchange Programs: Should a student decide to attend a non-exchange university, he or she must take a leave of absence from Clarkson for the semester involved. The student should work with the International Center for approval of these non-exchange programs. No tuition is paid to Clarkson and financial assistance may not be utilized.

Academic Policies

Exchange Programs: All courses must be pre-approved through completion of Off-Campus Coursework Permission Forms prior to leaving campus. All credit is transferred back to Clarkson for those courses that students complete satisfactorily. Course credit will be transferred as transfer credit on a pass/fail system. It should be noted that the credit hour and grading system differ from country to country and school to school. Participants should request to have their grades sent to the International Center at Clarkson prior to leaving their exchange program. It may take several weeks after a student returns to receive these grades.

Non-exchange Programs: The student is responsible for assuring that the courses to be taken through the non-exchange program have been pre-approved by the faculty at Clarkson using the Off-Campus Coursework Permission Forms. The International Center will assist these students with any questions regarding passports, visas, and travel, but

non-exchange students will not be included in the official study abroad rosters. Course credit will be transferred as transfer credit on a pass/fail system.

Work Abroad

Imagine working for an organization or company abroad, and learning what it is like to work in another culture. You will increase your marketability and be better prepared for the global workplace upon graduation. Students interested in an internship abroad can work with the International Center staff to identify the opportunities available across the globe. Some of these jobs are paid and some are for academic credit. Visit the International Center website for more information.

International Student and Scholar Services

This part of the International Center informs and educates the international population as well as the University community on immigration regulations that govern international students, scholars and the University. In addition, International Center staff coordinate services and benefits available to the international population and facilitate international cultural events within the Clarkson community to promote global diversity.

Clarkson Alumni Association

The Clarkson Alumni Association was organized on Founder's Day, November 30, 1904, and has existed since that time to benefit both the University and its alumni. The administration of the Association is vested in the Clarkson Alumni Association Leadership Board in partnership with the Alumni Office. The mission of the Clarkson Alumni Association is to engage and empower alumni as partners in the Clarkson community, nurturing their pride in their alma mater and promoting the interests of Clarkson University and its alumni. Alumni are actively involved in identifying and recruiting quality high school students, and assisting the Career Center in providing career opportunities for our graduates. Alumni are also involved in supporting fundraising efforts, mentoring undergraduates, serving as speakers on campus, serving on advisory councils, and providing opportunities to learn the value of being engaged alumni. There are nearly 30 regional chapters located in almost every major U.S. city. These regional chapters host approximately 120 events each year to engage alumni and keep them connected to Clarkson.

Athletics

Laurel Kane, Director of Athletics

Recreation and Intramural Activities

All students are encouraged to participate in intramural and recreational activities. Clarkson's location provides students with a wide array of outdoor sporting opportunities including individual and team challenges. Intramural contests include both regular leagues and weekend tournaments. Recreational activities included both outdoor and indoor activities.

Varsity Sports

The Clarkson Golden Knights compete in 20 intercollegiate varsity sports, at the NCAA Division I level in men's and women's hockey and with the other 18 at the NCAA Division III/USCSA level.

For more information on Clarkson Athletics, visit

http://clarksonathletics.com/splash.aspx?id=splash_18

Facilities

The Henry R. Hodge Sports and Recreation Complex is located on the Potsdam campus, adjacent to the residence halls and easily accessible to all students. Facilities include The Deneka Family Fitness Center, Alumni Gymnasium, Schuler Recreation Building (which houses the Stephenson Field House and the Fuller Pool), the Denny Brown Adirondack Lodge, and the Snell Athletic Fields. Additional facilities include Walker Center, Hantz Turf Field, Bagdad Field, Scott Field, Neugold Field, and the Cheel Campus Center, which is home to The Munter Family Climbing Wall, Steven J. Yianoukos Fitness Center and Hockey Arena.

Information Technology

Joshua Fiske, Vice President for Information Technology

Clarkson University is wholly committed to providing high-quality computer resources, services and support to meet the diverse needs of its students and faculty. The mission of the Office of Information Technology (OIT) is to provide access to teaching, learning, research, administrative and communication technologies through a commitment to excellence in customer support and technical leadership in fulfillment of the institutional mission. This involves leveraging the University's corporate partnerships to provide high-performance hardware and software, while employing a distributed user support structure. As a result, Clarkson students receive access to up-to-date technology, backed by direct assistance from easily accessible and highly skilled OIT support staff.

Access to campus IT resources is provided by a high-speed, fiber-optic network "backbone" connecting University classrooms, laboratories, on-campus housing, and faculty offices. Students are able to connect to this network via high-speed wired and wireless connections in buildings across campus. The campus network is connected to the Internet via several multi-gigabit connections.

All students have access to a broad range of computing and information technology resources, including: high-tech, multimedia classrooms and collaborative spaces; email; web conferencing; digital publishing; online teaching and learning; and campus computer labs equipped with the latest software.

OIT supports Clarkson's commitment to integrating technology into the classroom through its instructional technology operation. Instructional Technology supports both students and faculty by providing and maintaining software, equipment and facilities for the production, dissemination, and utilization of learning resource materials.

Student Personal Computers

Information technology is such an integral part of today's marketplace, it is strongly recommended that every Clarkson student have an appropriate personal computer. High-speed network access is available for all students residing on campus. In addition, students can also access the network at any one of the numerous computer labs found in the academic buildings.

Campus Safety and Security

The Office of Campus Safety & Security consists of a team of people working with the campus community to meet the specialized safety and security needs of the University. Responsibilities include the maintenance of public order, vehicle registration, emergency first aid treatment, issuing I.D. cards, room key distribution, educational programs (including crime prevention and fire safety), and other related programs.

Campus Safety & Security officers are responsible for the enforcement of the rules and regulations of the University. Officers do not have police jurisdiction over public streets, public property, or private property. Arrests and apprehension are referred to the Village Police. Statistics concerning campus safety and campus crime are available upon request from the Office of Campus Safety & Security or can be accessed at <http://www.clarkson.edu/campus-safety>.

The department's ability to function as an independent agency enables it to preserve the tradition of Clarkson in which security, safety, and adherence to the Code of Student Conduct are both an individual responsibility and a collective behavior. In emergencies, Village Police are called as first-line, back-up support, along with appropriate University officials and the University Emergency Response Team.

DAVID D. REH SCHOOL OF BUSINESS GRADUATE PROGRAMS

Stephen Standifird, Interim Dean

Floyd Ormsbee, Associate Dean of Operations and Student Success

The David D. Reh School of Business offers the following graduate programs:

1. Master of Business Administration (MBA)
 - A. Residential MBA
 - B. Business Analytics (MBA)
 - C. Global Supply Chain Management (MBA)
 - D. Online MBA
 - E. Healthcare Management (MBA)

2. Master of Science Programs (MS)
 - A. Master of Science in Clinical Leadership (MS)
 - B. Master of Science in Healthcare Data Analytics (MS)
3. Joint Programs
4. Certificates of Advanced Study

The programs offer a variety of options in terms of both mode of delivery (classroom, online, or a mix of classroom and online chosen by the student) and time of completion (full time or part time).

No specific undergraduate major is required for admission; however, applicants must demonstrate high promise for success as indicated by several components of the student's application profile which include (but is not limited to) undergraduate grade point average, score on GMAT or the GRE (or equivalent), work experience, and references. Exemptions and waivers are possible. Candidates are encouraged to consult the graduate admissions policies for detailed information. Qualified students may also follow the Certificate Pathway to admission by completing the Business Fundamentals Certificate (for admission to the Online MBA) or the Healthcare Management Certificate (for admission to the Healthcare MBA). The Certificate Pathway allows students to gain admission based on performance in certificate courses.

A typical graduate class includes recent college graduates, people with work experience, and individuals from many geographic regions of the world. The breadth and diversity of the student body serve to enrich the educational experience. Merit based scholarships are awarded on a competitive basis. Full time MBA students (campus based programs only) are also eligible to apply for a graduate assistant position working with a faculty/staff member.

Faculty and students also participate in the interdisciplinary Applied Data Science and Environmental Policy graduate programs. More information can be found in the section for Institute for a Sustainable Environment and the Interdisciplinary Program sections of the catalog.

The David D. Reh School of Business at Clarkson is accredited by the Association to Advance Collegiate Schools of Business (AACSB), an internationally recognized accrediting agency for graduate and undergraduate programs in business administration. In addition, the Healthcare Management MBA is accredited by the Commission on the Accreditation of Healthcare Management Education (CAHME).

Master of Business Administration (MBA)

The MBA degree is meant to provide students with the skills to be effective business leaders. At Clarkson, there are three MBA programs to choose from:

- A. Residential MBA

- B. Business Analytics MBA
- C. Global Supply Chain Management MBA
- D. Online MBA
- E. Healthcare MBA

Although the MBA programs offer distinct choices, all programs share the hallmarks of a Clarkson MBA which include small class sizes and close student interaction with renowned faculty, strong outcomes and globally recognized recognition.

Residential MBA

The MBA consists of ten foundation knowledge disciplines and 35 credit hours of advanced graduate work. The foundation includes courses from the following subjects: financial and managerial accounting, information technology, corporate finance, microeconomics, macroeconomics, ethics, organizational behavior, marketing, operations and production management, quantitative methods/statistics. Students with undergraduate business majors will be able to waive most of these foundations. Through careful planning, students with backgrounds in engineering, liberal arts, or science may complete the foundation courses as part of an undergraduate minor or through pursuing the Reh Fundamentals program offered online year round, enabling students to complete at their own pace ahead of their term of entry. Articulation agreements, which specify acceptable foundation courses, exist for Clarkson's engineering and science programs and a number of universities in the United States and Canada.

Beyond the foundation, the 35 credits of the MBA degree program consist of ten two-credit interrelated core modules, four three-credit graduate elective courses, and a three credit experiential course. The core modules stress business functions, emphasizing the development of communication, interpersonal, and managerial skills.

The MBA is offered at the Potsdam campus. All classes are taken in the classroom and follow the semester calendar.

The core module titles are:

AC 603	Management Accounting
OM 606	Supply Chain Management
EC 604	Applied Economics
OS 608	Organizational Behavior and Performance Management
FN 607	Financial Management
OS 610	Strategic Planning
IS 605	Information Systems
MK 609	Marketing Management
OM 602	Decision Analysis and Supply Chain Modeling
SB 609	Corporate Ethical Decision Making

A Strategic Planning module (2 credits) is offered as a 7 week course during the Spring term or as an accelerated interim term on-line course. The other modules are taught for 7 weeks each during the Fall term.

Below is a list as a sample of some of the graduate elective courses students can take in the Residential MBA program. This list is subject to change from the time this version of the catalog is published:

AC 623	Financial Statement Analysis
EC 660	Environmental Economics
FN 680	Strategic Financial Management
MK 689	New Product Marketing
MK 696	Marketing Methods
OM 676	Developing and Managing Technology
OM 680	Strategic Project Management
OM 685	Quality Management and Process Improvement
OM 671	Supply Chain Environmental Management
OS 657	Leading Organizational Change

OS 666	Negotiations and Relationship Management
SB 613	Innovation and New Venture Management
SB 641	Advanced Topics in Supply Chain Management
SB 681	Logistics Strategies

In the course of their Residential MBA program of study, students may earn a certificate by taking a certain set of electives as determined by the requirements of each certificate. Please contact the Reh School for additional information.

Experiential Learning Requirement

Experiential learning is a strong part of Clarkson's culture so each student participating in the Residential MBA program is required to take a three credit hour experiential course. Currently, the experiential requirement can be satisfied by completing the Seminar in International Business (part of the Reh School's Global Business Program), or by taking the SB 696 Global Business Strategies course (this requires a special exemption approval). The Seminar in International Business is designed to provide knowledge and new perspectives regarding international business, and helps develop critical skills necessary to compete and succeed in the global market. This experience includes a 2-3 week trip to an international destination, often led by the faculty from that area. This trip also helps students explore the global management issues facing business leaders and organizations in different parts of the world.

SB 693	Seminar in International Business
SB 696	Global Business Strategies

Length of Program

There are 3 length-of-study options for the Residential MBA program:

- The Accelerated One-Year study plan, with all 35 credits completed over the course of 2 consecutive semesters, or
- One and one half years study plan with core modules and electives completed over the 3 consecutive semesters, or
- Two years, with core modules and electives completed over the 4 consecutive semesters

While most students begin the MBA program in the Fall semester, Spring starts may be accommodated on an individual basis. Students starting in the Spring have their choices of elective courses in that first semester limited to those that do not have core modules as prerequisites and the Strategic Planning module cannot be taken during the first semester.

Global Specialty Track (with one semester abroad at one of the partner AACSB accredited schools)

The Global Specialty Track residential MBA follows the same curriculum structure and has the same foundation requirements as the regular MBA program, with students completing up to six courses over the spring semester at one of the partner institutions. The courses taken at the partner institutions need to be approved by the Graduate David D. Reh School of Business as elective courses and/or a substitute course for the Strategic Management core module. Students are allowed to participate in the Global track if they achieve satisfactory performance in the first set of core MBA modules as determined by the Graduate David D. Reh School of Business.

The current choices of partner institutions include the Bordeaux School of Management, in Bordeaux, France and Griffith University, in Brisbane, Australia. These elective classes meet the elective requirement and experiential unit requirement of the Residential MBA program, as a total of six classes will be taken during the student's time at the partner institution. Students starting in the Spring semester cannot participate in the Global Track program in their first semester.

Business Analytics MBA

The Master of Business Administration (MBA) in Business Analytics complements graduate work in business administration with modern methods of statistical analysis, data management, and decision analysis. The program emphasizes foundational principles of business and data science as well as practical leadership and analytical skills. The foundation includes courses from the following subjects: financial and managerial accounting, information technology, corporate finance, microeconomics, macroeconomics, ethics, organizational behavior, marketing, operations and production management, quantitative methods/statistics. Students with undergraduate business majors may be able to waive most or all of these foundations. Through careful planning, students with backgrounds in engineering, liberal arts, or science may complete the foundation courses as part of an undergraduate minor or through pursuing the Reh Fundamentals program offered online, year round so that students can complete them ahead of their admit term.

Beyond the foundation, the 38 credits of the MBA Business Analytics degree program consist of ten two-credit interrelated core modules, four fundamental data analytics courses, as well as two specialized electives which also include a professional internship or professional project option.

The MBA Business Analytics program is offered at the Potsdam campus. All classes are taken in the classroom and follow the semester calendar.

Ten Core MBA modules include:

AC 603	Management Accounting
OM 606	Supply Chain Management
EC 604	Applied Economics
OS 608	Organizational Behavior and Performance Management
FN 607	Financial Management
OS 610	Strategic Planning (capstone course)
IS 605	Information Systems
MK 609	Marketing Management
OM 602	Decision Analysis and Supply Chain Modeling
SB 609	Corporate Ethical Decision Making

Core Data Analytics coursework:

IA 510	Database Modeling
IA 530	Probability and Statistics for Analytics
IA 605	Data Warehousing
IA 640	Information Visualization

Six credits of electives/experiential coursework based on advisement:

IA 650	Data Mining
IA 651	Machine Learning
IA XXX	Free Elective
SI 500 or IS 687	Professional Internship or Professional Project

A Strategic Planning module (2 credits) is offered as a 7 week course during the fall or spring term, depending on the student's study plan. The other modules are taught for 7 weeks each during the Fall term only unless special scheduling plans are made for a cohort.

Length of Program

There are 2 study options for the MBA Business Analytics program:

1. This program is designed to be completed in three academic semesters, with either a fall or spring semester start.
2. Two years, or four academic semesters planned at an individual student basis can also be accommodated.

While most students begin the MBA Business Analytics program in the Fall semester, Spring starts can be accommodated with some changes to the overall academic schedule. Academic plans for spring students will be discussed with the program director at the time of entry.

Global Supply Chain Management MBA

The MBA consists of ten foundation knowledge disciplines and 35 credit hours of advanced graduate work. The foundation includes courses from the following subjects: financial and managerial accounting, information technology, corporate finance, microeconomics, macroeconomics, ethics, organizational behavior, marketing, operations and production management, quantitative methods/statistics. Students with undergraduate business majors will be able to waive most or all of these foundations. Through careful planning, students with backgrounds in engineering, liberal arts, or science may complete the foundation courses as part of an undergraduate minor or through pursuing the Business Concepts program, preceding the start of the regular Fall semester. Articulation agreements, which specify acceptable foundation courses, exist for Clarkson's engineering and science programs and a number of universities in the United States and Canada.

Beyond the foundation, the 35 credits of the MBA, Global Supply Chain degree program consist of ten two-credit interrelated core modules, two three-credit Supply Chain core, two Supply Chain electives, and a three credit experiential course. The core modules stress business functions, emphasizing the development of communication, interpersonal, and managerial skills.

The MBA Global Supply Chain Management is offered at the Potsdam campus. All classes are taken in the classroom and follow the semester calendar.

The core module titles are:

AC 603	Management Accounting
OM 606	Supply Chain Management
EC 604	Applied Economics
OS 608	Organizational Behavior and Performance Management

FN 607	Financial Management
OS 610	Strategic Planning
IS 605	Information Systems
MK 609	Marketing Management
OM 602	Decision Analysis and Supply Chain Modeling
SB 609	Corporate Ethical Decision Making

A Strategic Planning module (2 credits) is offered as a 7 week course during the Spring term or as an accelerated interim term on-line course. The other modules are taught for 7 weeks each during the Fall term.

There are two required Supply Chain courses, and then two electives that make up the subject depth of the Global Supply Chain Management curriculum:

OM 685	Quality Management and Process Improvement (<i>required</i>)
SB 641	Advanced Topics in Supply Chain Management (<i>required</i>)
	<i>Elective Options:</i>
EC 652	Industrial Organization in the Supply Chain
OM 671	Supply Chain Environmental Management
SB 681	Logistics Strategies
XXX	Other appropriate OM/IA/SB electives chosen with academic advisor

Experiential Learning Requirement

Experiential learning is a strong part of Clarkson's culture so each student participating in the Residential MBA program is required to take a three credit hour experiential course. Currently, the experiential requirement can be satisfied by completing the Seminar in International Business (part of the Reh School's Global Business Program), or by taking the SB 696 Global Business Strategies course (this requires a special exemption approval). The Seminar in International Business is designed to provide knowledge and new perspectives regarding international business, and helps develop critical skills necessary to compete and succeed in the global market. This experience includes a 2-3 week trip to an international destination, often led by the faculty from that

area. This trip also helps students explore the global management issues facing business leaders and organizations in different parts of the world.

SB 693	Seminar in International Business
SB 696	Global Business Strategies

Length of Program

There are 3 length-of-study options for the MBA, Global Supply Chain Management program:

- The Accelerated One-Year study plan, with all 35 credits completed over the course of 2 consecutive semesters, or
- One and one half years study plan with core modules and electives completed over the 3 consecutive semesters, or
- Two years, with core modules and electives completed over the 4 consecutive semesters

While most students begin the MBA program in the Fall semester, Spring starts may be accommodated on an individual basis. Students starting in the Spring have their choices of elective courses in that first semester limited to those that do not have core modules as prerequisites and the Strategic Planning module cannot be taken during the first semester.

Online MBA

The online MBA program is a 36-42 credit hour program (a total of 12- three credit courses). This program is designed to be completed part time, taking up to 2/3 courses during each of the four 11 week periods. On average, students complete the program in 20 months, or 7 quarters. Maximum time to complete the program will be 5 years. All students are required to take 10 (three credit hours each) online MBA core courses. The remaining 6-12 credits comprises 2-4 elective courses depending on the path chosen by the student..

The online MBA has two distinct completion paths. These paths will determine total hours that the student will complete. A student can only choose one of the two options:

Option 1: General MBA

This option is 36 total hours for completion by taking ten core courses, and two electives.

Option 2: MBA with Advanced Certificate

If a student is interested in earning an advanced certificate by carefully selecting their electives, the program will be 42 total credits or 14 courses. This is the ten core courses and four total electives.

- ❖ **Waivers: MBA with Advanced Certificate with Waiver eligibility:** Students pursuing this option may be eligible for up to six credits of core course waivers (two courses) depending on their academic background, and if that program has been earned within five years of the start of the MBA program. If eligible for waivers, the program has the option of being completed in 36 credits (depending on how many waivers granted).

Students with extensive prior academic work in specific subjects may reduce the number of courses required by transferring courses. Transfers must be graduate courses not used as part of another degree and may apply to required or elective courses. Program requirements may be reduced by up to 9 credit hours (from 36 to 29) with course transfers. Transfers are subject to approval and there are no guarantees certain courses will be accepted.

The Online MBA is offered fully online and follows the quarter calendar (four terms per year).

The course numbers and titles for the required courses in the online program are:

AC 604	Financial and Managerial Accounting for Decision Making
OM 607	Global Supply Chain Management
EC 605	Managerial Economics
FN 608	Financial Management
OS 681	Strategic Management
IS 606	Business Information Systems
MK 610	Marketing Management
OM 603	Decision Analysis and Supply Chain Modeling
SB 610	Corporate Ethical and Social Responsibility
OS 603	Leadership and Organizational Behavior

Below is a list as a sample of some of the graduate elective courses students can take in the online MBA program. This list is subject to change from the time this version of the catalog is published. Coursework can be planned under advisement to earn advanced certificates in management and leadership, human resource management, and supply chain management (see curricular plan in this section).

OM 681	Strategic Project Management
MK626	Market Research Methods
OM 686	Quality Management and Process Improvement
OS 656	Leading Organizational Change
OS 667	Negotiations and Relationship Management
OS 676	Current Issues in Human Resource Management
SB 640	Advanced Topics in Supply Chain Management
OS651	High Performance Leadership
SB 620	Business Process Analysis
SB 651	Communicating Globally
SB 655	Building and Managing Effective Teams

In the course of their online MBA program of study, students may complete an advanced certificate or concentration by taking a certain set of electives as determined by the requirements of each certificate. Please contact the Reh School for additional information.

Program Length

Full time students can complete the program in as little as 1 calendar year; part-time students complete in 2 to 5 years with most choosing to complete in 2 years.

Healthcare Management MBA

The primary purpose of the MBA Program in Healthcare Management is to prepare its graduates for management positions in health service delivery organizations (e.g., hospitals, managed care organizations, group practice, long-term care) and in related organizations (e.g., consulting, government, corporate benefits). A successfully prepared graduate will be able to obtain a professional management position in a healthcare organization, competently perform the duties of that position, and advance and grow professionally in a career.

The program serves students with diverse educational backgrounds and work experiences fully supporting and encouraging those with limited or no clinical and managerial experience who matriculate on both a part-time and full-time basis. The program provides education in an environment that fosters a high level of interaction

among and between students and faculty, both in and out of the classroom. Faculty and students value this small-class environment.

The MBA–Healthcare Management program is a 42 credit hour program (a total of 14 3-credit hour courses). Students with extensive prior academic work in specific subjects may reduce the number of courses required by waiving or transferring courses. Course waivers may be based on undergraduate work and apply only to required courses. Transfers must be graduate courses and may apply to required or elective courses. Program requirements may be reduced by up to six credit hours (from 42 to 36) with course waivers alone. Program requirements may be reduced by up to twelve credit hours (from 42 to 36) with a combination of course waivers and transfers.

The Healthcare MBA has a strong internship program and an internship is required. However, this requirement may be waived for students with relevant healthcare or professional business experience.

The Healthcare MBA program follows the quarter calendar and can be completed online, in the classroom, or utilizing any mix to meet the individual student's needs. The classroom classes are offered in the evening at the Capital Region Campus (CRC) in Schenectady.

The course numbers and titles for the fourteen required courses in the Healthcare MBA program are:

AC 604	Financial and Managerial Accounting for Decision Making
HC 600	Introduction to Health Systems
HC 605	Healthcare Operations
HC 617	Healthcare Finance
HC 620	Healthcare Economics
HC 626	Healthcare Marketing
HC 647	Statistical Methods for Data Analytics
HC 648	Health Informatics
HC 650	Health Policy Dynamics
HC 651	Health Systems Management
HC 674	Legal Aspects of Healthcare
HC 680	Managerial Epidemiology

HC 681	Strategic Issues for Healthcare Organizations (Health Capstone)
---------------	---

One elective can be chosen from:

HC 604	Hospital Analytics
HC 606	Payer Analytics
HC 643	Advanced Applications of Healthcare Data Analytics
HC 656	Group Practice Administration

Alternatively, any non-parallel course offered as part of the Online MBA program could be used as an elective.

Program Length

Full time students may complete the program in 1 year, and part-time students usually complete the program in 2 to 5 years with an average completion of 3 years.

Master of Science Programs

Clinical Leadership MS

The MS in Clinical Leadership degree is designed for current and future clinical practitioners: physicians, nurses, pharmacists, therapists, and other healthcare professionals who wish to better understand the healthcare industry and the environment in which it exists, or who aspire to clinically-related leadership roles. The goal of the program is to broaden the horizons of students by providing them with knowledge and skills in health policy and health management.

The Master of Science in Clinical Leadership follows the quarter calendar and can be completed online, in the classroom, or utilizing any mix to meet the individual student's needs. The classroom courses are offered in the evening at the CRC.

The MS in Clinical Leadership is a 36 credit program (a total of 12 3-credit courses). Like the Healthcare MBA, students with extensive prior academic work in specific subjects may reduce the number of courses required by waiving or transferring courses. Course waivers may be based on undergraduate work and apply only to required courses. Transfers must be graduate courses and may apply to required or elective courses. Program requirements may be reduced by up to 6 credit hours (from 36 to 30) with any combination of course waivers and transfers.

The course numbers and titles for the eleven required courses in the Clinical Leadership MS are:

AC 604	Financial and Managerial Accounting for Decision Making
HC 600	Introduction to Health Systems
HC 605	Healthcare Operations
HC 617	Healthcare Finance
HC 620	Healthcare Economics
HC 651	Health Systems Management
HC 656	Group Practice Administration
HC 674	Legal Aspects of Healthcare
HC 680	Managerial Epidemiology
HC 681	Strategic Issues for Healthcare Organizations (Capstone)
HC 647	Statistical Methods for Data Analytics

The one elective may be selected from those non-parallel courses offered as part of the Online MBA program,, or any other course that is part of the Healthcare MBA program.

Program Length

Part-time students may complete the program in 2 to 3 years.

Healthcare Data Analytics MS

The purpose of the Healthcare Data Analytics MS program is to prepare students with the skills to acquire, interpret and communicate healthcare data to shape the direction of the healthcare industry. Graduates will be prepared to take positions in healthcare organizations that require them to analyze high volumes of clinical, administrative and financial data. The program is fully online with two weekends onsite component required for two of the required courses.

The MS in Healthcare Data Analytics program is a 36 credit hour program (a total of 12 3-credit hour courses). The program includes 9 required core courses and 3 electives. As with the Healthcare MBA program, students with extensive prior academic work in specific subjects may reduce the number of courses required by waiving or transferring courses. Course waivers may be based on undergraduate work and apply only to required courses. Transfers must be graduate courses and may apply to required or elective courses. Program requirements may be reduced by up to 6 credit hours (from 36 to 30) with any combination of course waivers and transfers.

The MS in Healthcare Data Analytics is an online program and follows the quarter calendar.

The course numbers and titles for the nine required core courses in the Healthcare Data Analytics MS are:

HC 600	Introduction to Health Systems
IA 640	Advanced Statistics and Data Visualization
IA 510	Data Architecture
HC 610	Healthcare Accounting and Finance
IA 605	Data Analytics and Business Intelligence
HC 647	Statistical Foundations of Data Analytics
HC 648	Health Informatics
HC 657	Healthcare Leadership Proseminar
HC 643	Advanced Applications in Data Analytics

Three electives can be chosen from:

HC 604	Hospital Analytics
HC 606	Payer Analytics

Additional electives may be selected from courses in the Healthcare MBA program or Online MBA program.

Program Length

Part-time students may complete the program in 1 to 2 years.

Completing both the Healthcare Management MBA and the MS in Healthcare Data Analytics

Students may complete both the MBA-Healthcare Management and the MS-Healthcare Data Analytics programs by taking a total of 21-3 credit courses rather than the aggregate total of 28 courses for the two programs taken separately. This is made possible by shared courses and synergies between the programs.

Joint Graduate Business Programs

The Clarkson University David D. Reh School of Business Capital Region Campus has several joint programs. These programs are described in the following sections.

Accelerated BA or BS at Union College and Healthcare MBA Program (with Union College)

Union College students considering entrance into the accelerated Bachelor's/MBA program should consult with an MBA program advisor and apply for admission during the sophomore, junior, or first term of the senior year. Joint degree students must complete 16 graduate courses, 3 of which may, with undergraduate advisor approval, count toward Bachelor's degree requirements. Graduate courses may not be taken until the junior year and are typically completed during the senior and fifth years.

Four-Year JD/MBA Program (with Albany Law School)

This program is designed to meet the management development goals of students enrolled at Albany Law School (ALS). Students spend their first year in law studies, their second year in management studies, and their third and fourth years in law and management studies. Three designated law courses transfer into the MBA degree. Students are required to complete their MBA the winter term of the year they petition to graduate at ALS. Students may choose either the MBA or the MBA in Healthcare Management degree.

**Joint PharmD/MBA in Healthcare Management, or
Joint PharmD/MS in Clinical Leadership
(with Albany College of Pharmacy and Health Sciences, ACPHS)**

This program is designed to meet the management development goals of students enrolled at Albany College of Pharmacy and Health Sciences. Designated Pharmacy courses are transferred into the MBA degree, reducing the total number of MBA courses in the PharmD/MBA joint program. In addition, PharmD students may meet the MBA Internship Requirement with the selected practicum experiences which are part of the PharmD program 6th year curriculum at ACPHS. Most joint program students complete the MBA course requirements on a part-time basis over a 3 year period (years 4-6 at ACPHS).

Similar to the joint PharmD/MBA, the PharmD/MS program is designed to meet the clinical leadership goals of students enrolled at Albany College of Pharmacy and Health Sciences. Designated courses from the MBA curriculum are waived based on courses taken in the PharmD program at ACPHS.

**Joint BS Pharmaceutical Science/MBA in Healthcare Management, or
Joint BS Pharmaceutical Science/MS in Clinical Leadership
(with Albany College of Pharmacy and Health Sciences, ACPHS)**

This program is designed to meet the management development goals of students enrolled at the bachelor's level at Albany College of Pharmacy and Health Sciences. The BS/MBA in Healthcare Management joint program reduces the number of MBA courses. Courses from the MBA curriculum are waived based on courses taken in the BS program at ACPHS. The remaining courses are usually completed on a full-time

basis the year following graduation from ACPHS. In addition to coursework, all BS/MBA students are required to complete an administrative internship.

Alternatively, in the BS/MS joint program, courses from the MBA curriculum are waived based on courses taken in the BS program at ACPHS. All BS/MS students are required to complete an administrative internship.

**Leadership in Medicine (LIM)/MBA in Healthcare Management, or
LIM/MS in Clinical Leadership with Union College and Albany Medical College**

Students in the eight-year LIM program jointly offered by Union College, Albany Medical College and Clarkson University earn a BS from Union College, an MBA in Healthcare Management or an MS in Clinical Leadership from Clarkson University, and an MD from Albany Medical College. Students take graduate-level MBA or MS courses while fulfilling all other requirements of their undergraduate degree at Union College. They then go on to pursue their MD at Albany Medical College. . During the 4 years in residence at Union College, students pay tuition based on degree requirements for a BS degree from Union College and an MS degree in Clinical Leadership from Clarkson. Students choosing the BS/MBA/MD option pay for four additional MBA courses they take at Clarkson University at the graduate tuition rate in effect in the student's spring term of senior year of undergraduate study. Students in this program must meet admission requirements of Union College, Clarkson University, and Albany Medical College.

**Joint MD/MBA in Healthcare Management
(with Albany Medical College)**

The MD/MBA is designed to provide students with a business understanding specific to healthcare and move them on to their medical education quickly. Students learn how to manage a medical practice, deliver quality care in a cost-containment environment, market a practice, and lead other healthcare professionals.

Joint degree students are first admitted to Albany Medical College and then apply separately to Clarkson University. Once admitted to both institutions, they defer the start of medical school by one year and spend one year at Clarkson University working on Healthcare MBA courses. The second through fifth years are spent completing the MD degree requirements at Albany Medical College. The combined programs allow students to "double count" courses which reduces the total time and cost associated with completing the two degrees separately. 4 courses taken at Albany Medical College are transferred back to Clarkson University to meet MBA requirements. The combined degree is typically completed in 5 years.

It is possible to join the joint degree program after the start of medical school. Students using this option apply for leave from medical school at the end of their third year and spend 13 months at Clarkson University completing MBA course requirements. They return to medical school for their final year.

Certificates of Advanced Study

The purpose of the Clarkson University Certificate Programs is to allow professionals currently working in a field or wanting to enter a field to conduct intensive study in that field in an efficient and focused manner. Upon completion, students should be able to function more effectively in their specific fields. The Certificate Programs are not designed to provide the broad management background of an MBA. If students wish to expand their management skills they may apply all of the courses taken in any certificate program toward the MBA. All Certificates are approved by the NYS Education Department.

Certificate Pathway to MBA Admission

Qualified students may follow the Certificate Pathway to admission by completing the Business Fundamentals Certificate (for admission to the Online MBA) or the Healthcare Management Certificate (for admission to the Healthcare MBA). The Certificate Pathway provides automatic admission based on performance in Certificate courses and does not require a GMAT or GRE test.

Certificate in Global Supply Chain Management

The principles behind supply chain management focus on developing seamless flows of raw materials, products/services, information, and financial capital. The supply chain starts at the initial design process, and includes raw material sourcing, logistics, and continues through the delivery of that product or service to the end customer, with a goal of creating customer satisfaction at optimal cost. The Certificate requires 4 courses. Completion of these courses allows individuals to be productive in this important area and can provide a strong concentration should the individual decide to continue on for an MBA.

Required Courses	
OM 607	Global Supply Chain Management
SB 640	Advanced Topics in Supply Chain Management
Specialty Courses (2)	
OM 686	Quality Management and Process Improvement
OS 667	Negotiations and Relationship Management

Certificate in Human Resource Management

The Certificate Program in Human Resource Management will provide the educational background necessary to make informed decisions in management as related to human

resource issues. The certificate holder will have the resources for strategic critical thinking necessary to optimize the human resources of an organization.

Required Courses	
OS 603	Leadership and Organizational Behavior
OS 676	Current Issues in Human Resource Management
Specialty Courses (2)	
SB655	Building and Leading Effective Teams
OS 667	Negotiations and Relationship Management

Certificate in Management and Leadership

The Certificate in Management and Leadership is designed to give entry and middle level managers the core business skills in organizational processes, change management, resource management and leadership. It is focused on assisting managers and executives in enhancing their management and leadership skills in order to positively affect their current organization and provide them career advancement potential.

Required Courses	
OS 603	Leadership and Organizational Behavior
OS 651	High Performance Leadership
Specialty Courses (2)	
OS 667	Negotiations and Relationship Management
SB 620	Business Process Analysis
OS 656	Leading Organizational Change

Certificate in Healthcare Management

Healthcare has become one of the fastest growing industries in the US economy, characterized by rapid change and a need for management that will extend into the foreseeable future. The Certificate in Healthcare Management prepares individuals to take advantage of the opportunities in this field by introducing them to important business concepts applied to healthcare. Students may complete this certificate following the Certificate Pathway to gain automatic admission to the Healthcare MBA.

Required Courses	
HC 600	Introduction to Health Systems
HC 651	Health Systems Management
Specialty Courses (Select 4)	
HC 605	Health Operations Management
HC 657	Proseminar in Healthcare Leadership
HC 626	Health Systems Marketing
HC 617	Healthcare Finance
HC 620	Health Economics
HC 648	Health Informatics
HC 650	Health Policy Dynamics
HC 656	Group Practice Administration
HC 674	Legal Aspects of Healthcare
HC 680	Managerial Epidemiology
HC 647	Statistical Methods for Data Analytics
AC 604	Financial and Managerial Accounting for Decision Making

Certificate in Business Fundamentals

The Certificate in Business Fundamentals is designed to provide non-business undergraduate majors working in businesses with an opportunity to develop a broad background in the fundamental areas of business without committing to a full MBA. This certificate may be completed entirely online or entirely in classes at the Schenectady campus or students may mix online and on campus evening classes. Students may complete this certificate following the Certificate Pathway to gain automatic admission to the MBA.

Required Courses	
AC 604	Financial and Managerial Accounting for Decision Making
FN 608	Financial Management

IS 606	Business Information Systems
MK 610	Marketing Management
OM 607	Global Supply Chain Management
OS 603	Leadership and Organizational Behavior

Most candidates complete their certificate program in 9 months to 1.5 years.

The Reh Center for Innovation and Entrepreneurship

A resource center located within the Clarkson University David D. Reh School of Business, the Entrepreneurship Center helps small business owners and entrepreneurs develop and manage sustainable micro enterprises through partnerships with universities and government support programs.

The Center builds upon the University's nationally recognized expertise in entrepreneurial education and long-standing commitment to boost regional economies through small business development.

The goal of the Center is to serve as a national model for enhancing regional economic development by focusing on micro enterprises. Additionally, increased hands-on learning opportunities provide students with tremendous learning opportunities in marketing, management and finance.

WALLACE H. COULTER SCHOOL OF ENGINEERING & APPLIED SCIENCES

"Technology Serving Humanity"

William Jemison, Dean

In our modern technological society, engineers and scientists must work together with a variety of other professionals in seeking solutions to complex problems. Revolutionary advances in applied science and technology have broadened the horizons of engineering. At the same time, these advances have created a multitude of challenging multidisciplinary problems in virtually every sphere of human activity.

The role of engineers in today's society has become more and more critical. Engineers require not only a knowledge of fundamentals for finding solutions to problems, but they must be aware of the broad social, economic, political, and environmental implications of their ventures. The engineering programs at Clarkson are designed to provide students with a foundation in science, engineering, humanities, and management. Our goal is to make sure Clarkson graduates are highly competent in their chosen fields while at the same time they are alert to their responsibilities to society and truly practice "technology serving humanity."

Clarkson's School of Engineering has been named the Wallace H. Coulter School of Engineering in recognition of the Foundation's generous gift and the late Wallace Coulter's dedication to the University as a trustee. Wallace H. Coulter was a renowned inventor and entrepreneur. He became acquainted with Clarkson through his collaboration with colloid scientists on the faculty. In 1979 he received an honorary doctorate, and he served as a trustee of the University from 1983 to 1989. Through the years he maintained close connections with Clarkson, supporting research projects and establishing an endowed scholarship.

The grant funded 5 key areas: team project-based learning activities; endowed chairs and endowed fellowships; new programs in biomedical engineering; upgrades of laboratory facilities; and scholarships for both minority students and women pursuing a degree in engineering. Growth in these evolving areas will complement and reinforce the programs and curricula described in this catalog.

The Coulter School of Engineering comprises the Departments of Chemical and Biomolecular, Civil and Environmental, Electrical and Computer, and Mechanical and Aeronautical Engineering

Graduate Programs in Engineering

The Coulter School of Engineering offers Master of Science and Doctor of Philosophy degrees in each department. There is also an interdisciplinary Engineering Science graduate program managed by the Dean of the School of Engineering.

Faculty and students also participate in the interdisciplinary Data Analytics, Environmental Science and Engineering, and Materials Science and Engineering graduate programs. More information can be found in the section on the Institute for a Sustainable Environment and the Interdisciplinary Programs section of the catalog.

The graduate programs are designed to prepare students for careers in research, development, design, and education. Admission to graduate study will be granted to qualified applicants who hold a baccalaureate degree in engineering from an accredited institution or who have equivalent qualifications.

Program Length in School of Engineering

1. PhD program students complete up to 7 years after they pass the qualifying exam
2. MS Students complete within 5 years

Basic Science MS

Thomas Lufkin, Bayard and Virginia Clarkson Endowed Chair of Biology

Clarkson offers a Master's degree in Basic Science for qualified students who desire graduate study within the sciences, with a focus that does not fit within one of the degree programs already established.

The standard requirements for all Clarkson Master's degrees must be met: see "Degree Requirements and Academic Policies for Graduate Students: Requirements for the Master's Degree".

Basic Science (thesis and non-thesis options)

Biology Option

Prerequisites for Admission

Applicants must possess a baccalaureate (4-year) degree in biology or a relevant science major (e.g., biochemistry, biophysics, environmental science) and must have completed the following minimum college course preparation:

1. 3 semesters of biology including genetics
2. 4 semesters of chemistry including organic chemistry
3. 2 semesters of physics, and
4. 2 semesters of mathematics including calculus

Degree Requirements for the Basic Science MS

1. A minimum of 30 credit hours of graduate coursework, as follows:
 - a. At least 20 hours of course and seminar work. The balance of coursework must be consistent with the research or professional experience component.
 - b. Only courses numbered 500 and above are accepted for graduate credit.
 - c. 10 credit hours of transfer credit (B grade or better) may be accepted.
2. Satisfactory completion of a research or comparable professional experience, as follows:
 - a. A written thesis based on independent research;
 - b. A comprehensive examination; or,
 - c. An appropriate, professionally oriented special project.
3. At least one academic year of study beyond the BS
4. A cumulative GPA of 3.0 in courses used to meet graduation requirements.

Program Length

All work done for the master's degree in basic science is to be completed within five calendar years, although it is normative to complete this degree in 2 years.

One requirement for the Master in Basic Science (MBS) degree is either a *thesis* or else a *special project*. A special project can consist of writing a scholarly review, completing an experiment, or assembling a substantial data set. Before initiating a special project, a written proposal must be approved by the student's advisor and the Biology Graduate Program Chair. As a rule of thumb, the special project must be substantial enough to warrant a co-authorship on a paper. In the case of an experiment or data set, all deliverables (e.g. a written description of the full methods, orderly annotated lab notebook, computer data files with complete metadata) must be submitted to the

advisor and subject to evaluation before project completion is approved. A completed project must be evaluated and approved by a committee of three: the student's advisor, a second faculty member, and the Biology Graduate Program Chair. All project deliverables must be submitted at least one month before the expected date of graduation, so that the committee has sufficient time to evaluate the deliverables and request any needed changes.

Biomedical Engineering MS

William Jemison, Dean

The Wallace H. Coulter School of Engineering offers a graduate program leading to the MS degree in Biomedical Engineering. Biomedical engineering is an interdisciplinary field that is experiencing rapid growth and having a significant impact on the quality and delivery of healthcare. The MS in Biomedical Engineering leverages university expertise in engineering, health sciences, and entrepreneurship. In addition to introducing important biomedical engineering courses, the program has a clinical experience, and an entrepreneurial element consistent with Clarkson's focus on innovation, and a team-based capstone design experience. Capstone experience projects may be carried out in conjunction with students and faculty in the graduate-level Biology, OT, PT, and PA programs or via industrial sponsorship. The capstone design process will follow FDA best practices, and projects may lead to a potentially viable marketable idea, complete with a business plan. The program will prepare students to enter the field of biomedical engineering.

Program Objectives and Learning Outcomes:

Program Objectives—goals of the MS Biomedical Engineering Program include:

- Provide a compelling reason for talented students interested in Biomedical Engineering to select Clarkson
- Provide a strong linkage to Clarkson Ignite to foster innovation in areas related to the clinical expertise of the health care faculty and the research expertise at the university
- Provide students with an introductory exposure to the clinical practices and with an opportunity to work with Clarkson's clinical faculty and students to design relevant and needed devices, concepts, or techniques
- Prepare students for advanced study or careers in the biomedical field

Learning Outcomes—upon completion MS in Biomedical Engineering students will:

- Understand human physiology from a systems biology perspective
- Understand the FDA clearance required for medical device clearance
- Be able to make sound ethical decisions related to bioengineering challenges
- Be able to work effectively in a clinical environment and understand the roles of different members of the healthcare delivery team
- Have a biomedical design and innovation experience

Prerequisite Courses

Prerequisites include the completion of an ABET accredited BS engineering degree. Completion of Clarkson's Biomedical Engineering Minor is required for students who received their BS engineering degree at Clarkson. Students who have not completed the biomedical engineering minor or who did not complete their BS engineering degree at Clarkson may be admitted to the program with permission of the Program Chair. Appropriate remedial courses may be recommended, as appropriate.

Degree Requirements

Thirty credits are required for the MS in Biomedical Engineering. The program is built upon one quantitative human physiology laboratory course and two CORE biomedical engineering courses. A biomedical engineering "depth" elective and a graduate-level "breadth" elective build on these courses. The program includes a course on bio-entrepreneurship & FDA fundamentals that is compatible with Clarkson's Ignite initiative and is designed to equip students with an "entrepreneurial mindset" in preparation for their capstone experience.

Program Requirements	
Area of Study	Credit Hours
Quantitative Human Physiology & Lab	4
Pick 2 of: (CORE) EE 585 Neural Engineering (CORE) BME 587 Advanced Biomechanics (CORE) ES 552 Biomaterials and Biomedical Engineering Applications	6
(Depth Electives) Two biomedical electives from an approved list *	6
(Breadth Elective) Any 500 or 600 level math, science, engineering, or business graduate course with technical content	3
Bio-entrepreneurship & FDA Fundamentals	3
Clinical Immersion & Bioethics	2

Capstone Experience I, II, and III***:	6
TOTAL	30

*Approved biomedical breadth elective courses - see attached list

Required Courses

BME 500 Clinical Immersion & Bioethics

BME 510 Quantitative Human Physiology & Lab

Core - Pick two of:

EE 585 Neural Engineering

BME 587 Advanced Biomechanics (New)

ES 552 - Biomaterials & Biomedical Engineering Applications

BME 520 Bio-Entrepreneurship And Fda

BME 530, 531, 532 Biomedical Engineering Capstone Experience I, II, and III

Depth Electives - Biomedical Engineering

BME 600 Selected Topics In Biomedical Engineering

BR500 Biomedical Engineering Fundamentals

EE 533 Human Exposure Analysis

EE 523 Introduction To Biometrics

EE 622 Advanced Biometrics

EHS 518 Principles Of Toxicology And Epidemiology

BY 514 Bioinformatics

PH 520 Physical Models Of Living Systems

PH 526 Introduction To Biophysics

CM 560 Biochemistry I

CM 561 Biochemistry II

CM 544 Medicinal Chemistry

CM 566 Bioelectronics And Bionanotechnology

Program Length

Expected program length is two semesters and two summer terms.

Business of Energy Certificate of Advanced Study Online Program

Program Objectives

The Business of Energy graduate certificate program combines contemporary energy issues and related business principles to produce leaders well-versed in the energy marketplace. Students will gain an understanding of power generation, transmission, distribution and the market functions.

Working professionals and recent graduates seeking to advance their careers in professions associated with the energy industry are encouraged to apply. The program

is designed for students from all academic backgrounds – including engineering, geosciences, law, business, policy and related disciplines.

Graduate Certificate Prerequisites

A minimum of a bachelor's degree. Applications will be assessed on a case by case basis.

Graduate Certificate in the Business of Energy Program Requirements

The Online Graduate Certificate in the Business of Energy requires a minimum of 4 courses. The Fundamentals of the Business of Energy course (BOE 610) core course must be taken by all students. The remaining 3 courses must be from the 5 Business of Energy courses. To get the most out of the program, students are recommended to take all 6 BOE courses. Students interested in particular courses, but not the complete certificate, may take those courses with the approval of the program advisor.

Business of Energy Courses	
BOE 610	Fundamentals of the Business of Energy
BOE 611	Planning and Operations of Power Systems
BOE 612	Power Markets
BOE 613	Deregulations and Restructuring
BOE 614	Electric Power Industry Economics and Finance
BOE 615	Challenges to upgrading infrastructure

Program Duration

One– Two years (full time or part-time)

Business of Energy Program MS

Clarkson University is no longer accepting applications for the Business of Energy MS Program. Students may reference historical University Catalogs for prior year degree requirements.

Chemical and Biomolecular Engineering Graduate Programs

Elizabeth Podlaha-Murphy, Department Chair

Graduate education in Chemical and Biomolecular Engineering (ChBE) concentrates in the following specialties:

Biomaterials

Chemical Mechanical Planarization

Chemical Reaction Engineering and Catalysis
Electrochemical Processing
Energy Technologies
Functional Polymers and Nanocomposites
Modeling and Control of Biomedical Systems
Molecular Simulations
Multi-component Mass Transfer Separations
Plasma Processing
Thermochemical processes and non-equilibrium reactions
Water Desalination
Water Treatment of Legacy and Emerging Contaminants

MS Prerequisites

A prerequisite of BS or BE in chemical engineering. Those with degrees in other science or engineering disciplines may also be admitted, but will be required to make up undergraduate course deficiencies. The following are prerequisite courses for MS in Chemical Engineering: CH 210, 220, 260, 320, 330, 350, 360, 370, 430, 460, or their equivalent.

Students with a BS or BE in Chemical Engineering may complete this program in 2 calendar years (24 months).

MS in Chemical Engineering Requirements

1. Required courses are:
 - a. CH 546 Chemical Reactor Analysis
 - b. CH 560 Transport Phenomena
 - c. CH 561 Chemical Engineering Analysis
 - d. CH 571 Advanced Chemical Engineering ThermodynamicsThe student must obtain a Cumulative Grade Point Average (GPA) of 3.000 or better in the required CH courses.
2. Two additional 3-credit hour technical graduate courses selected in consultation with the student's advisor. David D. Reh School of Business courses cannot be taken to satisfy this requirement.
3. 2 credit hours of CH 610 (Seminar). (While in residence, all students are required to attend seminar, even if they are not enrolled in CH 610).
4. 10 credit hours of CH 611 Thesis. All students are expected to start their thesis research at the beginning of their first semester in residence.
5. The MS thesis must be orally presented and defended before a committee of three or more faculty members, at least two of whom are from the Department. A typical curriculum schedule follows. Individuals with an undergraduate degree in chemistry or physics have a different schedule - refer to "Requirements for the MS degree in Chemical Engineering for BS Chemists and Physicists."

First Semester	Second Semester
3 Three-credit courses (typically CH 560, CH 561 and an elective)	3 Three-credit courses (typically CH 546, CH 571 and an elective)
Five credits of thesis	Five credits of thesis
One credit of seminar	One credit of seminar
Third Semester	Fourth Semester
One credit of thesis	One credit of thesis

The Master of Science is a thesis-based degree; each student is required to complete and defend a research-based thesis.

MS in Chemical Engineering for BS Chemists or Physicists Requirements

A program is available for qualified BS chemists and physicists that will permit them to earn an MS in Chemical Engineering in 4 semesters. During the course of study, the student will take almost all the required courses in the chemical engineering undergraduate curriculum, as well as the chemical engineering graduate level courses required for the MS program.

A typical program, which may be altered depending on the background of the student, is illustrated below.

First Semester	Credits	Second Semester	Credits
CH 501 Directed Study in Chemical Engineering Principles I (CH 220, 320, 330)	3	CH 502 Directed Study in Chemical Engineering Principles II (CH 260, 360, 370, 430)	3
CH 561 (or CH 611)	3	CH 571 (or CH 611)	3
Graduate Elective	3	Graduate Elective	3
CH 610 Seminar	1	CH 610 Seminar	1
Total	10	Total	10
Third Semester	Credits	Fourth Semester	Credits
CH 560	3	CH 546	3

CH 611 (or CH561)	3	CH 611, 1 cr. (or CH 571, 3 cr.)	1 or 3
CH611 Thesis	4		
Total	10	Total	4 or 6

PhD Prerequisites

A prerequisite of BS (or BE) or MS (or ME) in chemical engineering, materials science, chemistry, or other areas. The following are prerequisite courses for a PhD in chemical engineering: CH 210, 220, 260, 320, 330, 350, 360, 370, 430, 460, or their equivalent.

Students with a BS (or BE) or MS (or ME) in chemical engineering, materials science, chemistry, or other areas may complete the program in 5 calendar years (60 months).

Requirements for PhD in Chemical Engineering:

The following requirements apply exclusively to chemical engineering PhD students. The student must take the 4 courses required for the MS degree program or their equivalent:

1. CH 546 Chemical Reactor Analysis
2. CH 560 Transport Phenomena
3. CH 561 Chemical Engineering Analysis
4. CH 571 Advanced Chemical Engineering Thermodynamics

Additional Program Requirements and Procedures for PhD in Chemical Engineering:

1. The student must obtain a Cumulative Grade Point Average (GPA) of 3.000 or better in the required CH courses
2. Students entering the PhD program should register for a minimum of 10 credit hours each semester until they satisfy the 90 credit hour requirement
3. The student must take a minimum of 15 credit hours in the major field, a minimum of 9 credit hours in the minor field, and a minimum of 6 credit hours taken from a department other than chemical engineering
4. The student must take a qualifying examination and adhere to the guidelines described in the section *"PhD Qualifying Examination and Research Proposal Review"*
5. The student must take the PhD qualifying examination no later than 18 months after completing the MS requirements. Students given direct entry into the PhD program must take the qualifying exam no later than 18 months after being invited into the PhD program. Students entering with a MS degree must take the qualifying exam no later than 18 months from the time when they enter the graduate program.

6. Minimum course work is 30 credit hours (this is equivalent to 4 three-credit courses beyond MS). David D. Reh School of Business courses cannot be taken to satisfy this requirement
7. 6 credit hours of seminar (CH610)
8. 54 credit hours of thesis
9. A maximum of 30 credit hours including research credits may be transferred from a Master's degree towards the PhD requirements (B grade or better). To transfer credits for the required CH courses, student's faculty adviser should determine the eligibility for credit transfer. It is recommended that students take at least 2 of the 4 required CH courses even if they completed all the courses in their previous institutions
10. While in residence, all students are required to attend all seminars

Direct Entry into PhD Program

First-year graduate students whose past academic and first-semester records at Clarkson indicate outstanding research potential will be invited to enter directly into the PhD program. The thesis required in the regular MS program will be bypassed.

The department will decide which students will be invited into this program at the beginning of the second semester of the student's residence on campus. The MS degree is awarded to the student upon completion of 40 credit hours and after passing the PhD qualifying examination.

Financial Assistance

Financial support for students enrolled in the PhD program is usually in the form of research assistantships, and not teaching assistantships. Continuation of support is based on academic standing and research accomplishments, and may be terminated after written notification by the Graduate Committee for lack of acceptable progress in either area. Support will continue for no more than 5 years beyond the BS or 3 years beyond the MS. Requests for continued support must be made in writing to the Graduate Committee.

PhD qualifying examination and research proposal review

Within 18 months following completion of requirements for the Master of Science degree or arrival at Clarkson (whichever is later), the student must complete a "Doctoral Research Proposal" and submit this proposal to the Examining Committee. For students with a BS degree who, because of demonstrated exceptional abilities, are permitted to seek direct entry into the PhD program, the proposal must be completed within 18 months of entry into the PhD program. The student must meet with the Examining Committee as early as possible after being admitted to the PhD program to discuss plans for the Research Proposal. No earlier than 1 full week subsequent to submission of the Research Proposal, the committee members and the student will meet to conduct a PhD qualifying examination. The student will formally present the contents of the proposal to the committee in the form of a seminar of approximately 30

minutes duration. The presentation will be followed by an oral defense of the proposed research and related topics.

The Examining Committee, which will also serve as the student's Doctoral Committee, will consist of a minimum of five members, including the student's thesis advisor and at least one faculty member from a department other than Chemical and Biomolecular Engineering. At least three of the committee members must be from Chemical and Biomolecular Engineering. At least four of the committee members must be on the Clarkson faculty. One or more external examiners, holding the PhD degree, may also serve on the Committee. The thesis advisor will recommend the names of prospective committee members to the Graduate Committee. The Graduate Committee, with the approval of the Graduate School, will appoint the Examining Committee. While the thesis advisor will serve as the Chair of the Doctoral Committee, the advisor will not be the Chair of the Examining Committee. Hence, the advisor should also recommend a Chair to the Graduate Committee. The research proposal itself should represent eighteen months effort in defining a problem, reading pertinent literature, specifying plans for theoretical and/or experimental work and writing the report. A Master's Thesis does not constitute a Doctoral Research Proposal, for which a suggested outline can be found in the Chemical & Biomolecular Engineering Department Graduate Handbook. In particular, the proposal should stress the definition, importance and uniqueness of the problem. Based on each committee member's preference, either a hard or an electronic copy of the proposal should be provided to each member at least one week prior to the qualifying exam.

If, subsequent to the qualifying examination and during the course of the doctoral research, the student or thesis advisor decides that a significant change in the direction of the research project is warranted, the student's Doctoral Committee should be so informed. A re-examination of the student will not be involved. In any event, it is recommended that annual meetings be held with the Doctoral Committee to review the student's progress and to agree on work remaining to be completed.

Chemistry Graduate Programs

Silvana Andreescu, Chair

The Chemistry & Biomolecular Science department offers a graduate program leading to MS and PhD degrees in Chemistry and has provided a first class education to students of chemistry, material science and biomolecular science for more than 50 years. The diverse, yet complementary, research interests of our faculty researchers provide incoming students with a broad variety of research topics to choose from, such as: bio-nanotechnology, smart surfaces and interfaces, functional and stimuli responsive materials, nano-therapeutics, diagnostics and biosensors. Advanced study through coursework and independent research under the guidance of a faculty adviser will prepare students for leading positions in industry or academia. Graduate researchers will work on projects that address many of today's most pressing problems

related to the environment, advanced manufacturing, sustainable energy and healthcare. Departmental research is supported by federal grants, primarily from the National Science Foundation (NSF), as well as New York State and private industry.

MS Prerequisites

Applicants must possess a baccalaureate (BS) degree in chemistry or a related major (e.g. material science, biochemistry, biophysics, environmental science) and must have completed the following minimum college course preparation:

1. Introductory chemistry courses including general chemistry as well as specialized classes in organic chemistry, analytical chemistry, physical chemistry, inorganic chemistry, and biochemistry
2. Basic training in mathematics and physics

MS Degree in Chemistry Requirements

1. A minimum of 30 credit hours of graduate coursework, with a minimum of 18 credit hours of graduate chemistry courses.
2. Satisfactory completion of a research project or comparable professional experience.
3. A minimum cumulative GPA of 3.0 in courses used to meet graduate requirements.
4. At least one year of academic study beyond the undergraduate degree. All work must be completed in five calendar years.
5. A thesis must be prepared and orally defended to a committee consisting of a minimum of three committee members.
6. Candidates in chemistry must complete a minimum of two credit hours of seminar (CM900) and present one seminar as part of their degree requirements.

Additional Program Requirements for a MS in Chemistry

1. Placement Exams; Placement exams are administered to permit the evaluation of a student's preparation for graduate work. The results of the placement exams have an advisory function in determining possible remedial coursework to support the student's success in the program and/or will assist the student/advisor team in selecting graduate courses. Every chemistry graduate student must take four out of five placement examinations before registering and attending classes for the first semester as a graduate student. A student is required to show satisfactory preparation for graduate work in at least three areas of examination. These exams are administered prior to the beginning of fall semester, and as needed. The placement examinations will be at a level corresponding to a good undergraduate background in chemistry.
2. The required minimum credit hours (30) are in addition to any undergraduate courses or remedial study required for those students who fail the placement examinations. To successfully complete an MS degree in chemistry a student must take a minimum of 18 credit hours of graduate courses, excluding seminar (CM900). Research credit hours (CM990), Thesis, Dissertation or Special Project

credits accepted towards the degree cannot exceed ten. No more than two of the six required courses for the MS degree can be directed study or special topics courses. The student who plans to continue working toward the PhD degree in chemistry after receiving the MS degree should take the PhD regulations into account when planning their MS program. All of the courses used in the fulfillment of course requirements must have catalog numbers of 500 and above.

3. A candidate for the MS degree in chemistry must perform research satisfactory to the advisor and must submit a written report/thesis on the results of their work and orally defend their thesis to a committee of three committee members.

Program Length

All work required for the **master's degree in chemistry** is to be completed within five calendar years, although it is normal to complete this degree in 2 years.

PhD Prerequisites

Applicants must possess a baccalaureate (BS) or a master (MS) degree in chemistry or a related major (e.g., material science, biochemistry, biophysics, environmental science) and must have completed the following minimum college course preparation:

1. Introductory chemistry courses including general chemistry as well as specialized classes in organic chemistry, analytical chemistry, physical chemistry, inorganic chemistry, and biochemistry
2. Basic training in mathematics and physics

PhD Degree in Chemistry Requirements

1. A minimum of 90 credit hours, including at least 24 credit hours coursework and a minimum of six credit hours of seminar.
2. A minimum of three academic years of full-time graduate study or the equivalent in part time study.
3. Satisfactory completion of the PhD comprehensive examination for admission to candidacy ("candidacy procedure") within two years of full-time study after admission to the PhD program. After completion of the candidacy procedure, the student will be identified as a "PhD Candidate."
4. A written dissertation must be submitted by each candidate and defended orally as part of the final examination.
5. Any changes in the student's degree program must be approved by the Department Chair and Dean of the School of Arts and Sciences.

Additional Program Requirements for a PhD in Chemistry

1. Placement Exams; Placement exams are administered to permit the evaluation of a student's preparation for graduate work. The results of the placement exams have an advisory function in determining possible remedial coursework to support the student's success in the program and/or will assist the student/advisor team in selecting graduate courses. Every chemistry graduate

student must take four out of five placement examinations before registering and attending classes for the first semester as a graduate student. A student is required to show satisfactory preparation for graduate work in at least three areas of examination. These exams are administered prior to the beginning of every semester, as needed. The placement examinations will be at a level corresponding to a good undergraduate background in chemistry.

2. The required minimum credit hours (90) are in addition to any undergraduate courses or remedial work required for those students who fail the placement examinations. No more than two directed study or special topics courses are acceptable toward the PhD degree. All of the courses used in the fulfillment of course requirements must have catalog numbers of 500 and above and must meet all established requirements. Selection of courses will be made in consultation with student's advisor and influenced by student's area of interest.
3. A candidate for the PhD degree in Chemistry must complete all seminar requirements, a minimum of 6 credit hours of seminar (CM900) and presentation of 3 seminars. The candidate can transfer an external oral presentation at a national or regional meeting which has been selected in consultation with the PhD advisor as the equivalent of 1 of the 3 required seminars. The topic of the final seminar for a PhD candidate is expected to be the student's own doctoral research. Students will pass or fail the course (CM900) on the basis of their performance as speakers, participants and assistants, and also on the basis of their attendance. At least 60% seminar attendance during each semester is required.

Program Length

After required comprehensive examinations are passed, all work done for the doctorate degree in chemistry is to be completed within a period of seven calendar years, although it is normal to complete this degree in 5 years.

Civil and Environmental Engineering Programs

Steven Wojtkiewicz, Chair

Graduate education in civil and environmental engineering concentrates in the following specialties:

1. Environmental Engineering
2. Infrastructure Systems and Materials (ISM)
3. Water Resources Engineering
4. Construction Engineering Management

MS Prerequisites

BS, BE, or equivalent degree from an accredited program in Civil and Environmental Engineering or other engineering discipline is required. Applicants with degrees in disciplines other than engineering may be required to demonstrate proficiency through additional undergraduate coursework as determined by the departmental Graduate

Committee. This may comprise an additional semester of study for which graduate credit cannot be granted.

No minimum grade point average is required for admission; however, a superior record of academic achievement is expected of all applicants.

MS in Civil and Environmental Engineering Program (except Construction Engineering Management) Requirements

1. 30 total credit hours with all coursework approved at the graduate level, which must include:
 - a. 18 credit hours of graduate coursework (500-600 level courses)
 - b. 2 credit hours of seminar work
 - c. Maximum of 10 course credit hours of transfer credit (grade of B or better).
2. Satisfactory completion of one of the following (a or b) for 10 credits.
 - a. A written thesis based on independent research;
 - i. All students must complete a thesis and defend it orally to a committee consisting of a minimum of three faculty members. The committee will be appointed by the student's advisor and approved by the graduate committee and the department chair. After approval by the examining committee, a thesis requires signature approval by the Dean of the Graduate School and submission following the process defined by The Graduate School.
 - b. An appropriate, professionally oriented special project and project supporting coursework;
 - i. All students must complete 2-3 project related 500 or 600 CEE level courses (totaling 6-9 credit hours) from Environmental, ISM, or Water Resources. All students must also complete a Master of Science Project (totaling 1- 4 credit hours of work) under a project advisor. The project advisor will be selected through mutual agreement between the student, and the project advisor. At the completion of the project work, the student will prepare a formal report and submit it to the project advisor. When the report is approved by the advisor, the project credits will be formally granted.
3. Pass a group of core courses in one of the following professional specialties comprising a minimum of 15 credit hours: Environmental, Infrastructure Systems and Materials (ISM), or Water Resources Engineering.
4. All MS work to be completed within 5 years.

MS in Civil and Environmental Engineering with focus in Construction Engineering Management Requirements

Erik Backus, Director of CEM

1. 30 credit hours
2. Completion of three (3) core Construction Engineering Management Courses (totaling 9 credit hours):
 1. CE 506 Advanced Construction Engineering Management
 2. CE 510 Sustainable Infrastructure and Building
 3. CE 591 Special Topics in Construction Engineering Management
3. Completion of three (3) Civil Engineering electives (totaling 9 credit hours) from any CE coded course other than CE590, CE595, CE610, CE612, and/or CE684.
4. Completion of three (3) courses (totaling 9 credit hours) offered by the Reh School of Business through their MBA program(s).
5. Completion of a Master's Project (totaling 3 credit hours of work) under the oversight of the Director of the CEM Program. The CEM project advisor will be selected through mutual agreement between the Director of CEM, the student, and project advisor. At the completion of the project work, the student will prepare a formal report and submit it to the project advisor. When the report is approved by the advisor, the project credits will be formally granted.

Length of Program

Full-time students may complete the degree in one year. Part-time students may complete the MS degree in CEM within three years.

Advanced Certificate in Construction Engineering Management (CEM)

Erik Backus, Director of CEM

The Certificate Program in Construction Engineering Management (CEM) provides a post undergraduate sequence of courses and subjects that deepen understanding in key construction engineering topics. Using a variety of methods, students engage with professionals, subject matter experts, and practitioners in the field, providing current working knowledge of the state of the industry.

Required courses (9 credits)	
CE 506	Advanced Construction Engineering
CE 510	Sustainable Infrastructure and Building
CE 591	Special topics in Construction Engineering Management

Program Length

Most candidates complete their certificate program in 9 months to 1.5 years.

PhD prerequisites

A MS degree from a program in Civil and Environmental Engineering or other engineering discipline is required for admission. Applicants with degrees in disciplines other than engineering may be required to demonstrate proficiency through additional undergraduate coursework as determined by the departmental Graduate Committee. This may comprise an additional semester of study for which graduate credit cannot be granted. No minimum grade point average is required for admission; however, a superior record of academic achievement is expected of all applicants.

PhD in Civil and Environmental Engineering Requirements

1. The following are minimum requirements:
 - a. 90 credit hours beyond the B.S.
 - b. 39 credit hours of coursework
 - c. 15 credit hours in the major field
 - d. 9 credit hours in the minor field
 - e. 6 credit hours from a department other than the one in which the student is housed (courses double listed in CE and another department do not count in these 6 credit hours)
 - f. 6 credit hours of seminar
 - g. At least half of the total credit hours (45) used to satisfy degree requirements, including Thesis credit, must be earned (while registered for PhD study) on Clarkson campus where the degree is to be granted.
2. Credit Transfer
 - a. A maximum of 30 credit hours of transfer credit is allowed. These can be graduate-level coursework and/or research credits. Up to 10 research credits can be transferred towards a PhD. Transfer credits cannot fulfill the graduate seminar credit requirement.
 - b. Only graduate-level courses with a grade of B or better can be transferred towards program degree requirements. With the exception of research credits, pass/fail/satisfactory courses cannot be transferred to satisfy program degree requirements.
 - c. All courses/research hours that are being transferred must be verifiable with transcripts and must have credit hours associated with them. An official transcript showing the completion of courses must be on file with the Graduate School. There must be demonstrated credit equivalency between programs, and the transfer evaluator should be able to determine the course content equivalency based on the course description.
 - d. The advisor should serve as the official course transfer evaluator with endorsements from the graduate committee chair and the chair of the department, respectively.
3. All work to be completed within 7 years after the candidacy procedure is completed
4. Pass a group of core courses in one of the following professional specialties comprising a minimum of 15 credit hours:

- a. Environmental
- b. Infrastructure Systems and Materials (ISM)
- c. Water Resources

Advisory Committee, Preliminary Exam, Research Proposal, and Dissertation Defense

Additional requirements in CEE for PhD students follow.

PhD Advisory Committee

The Research Advisor recommends the membership of the PhD Advisory Committee to the Department Chair and the Dean of Engineering for their approval. The committee must be appointed prior to the comprehensive examination. The Advisory Committee and the Research Advisor will approve the courses required to satisfy the students' minor. This committee must consist of five members qualified to sit on such a committee, at least one of which must be from outside the candidate's department. Normally, the Research Advisor will not act as Chair of the committee. The purpose of the committee is to provide guidance to the student for the coursework and research.

PhD Comprehensive Examination

Satisfactory completion of this examination must be done within two years of full-time study after admission to the PhD program. In CEE, the PhD Comprehensive Examination consists of two parts: a comprehensive examination and a research proposal defense. The comprehensive examination should be taken within 18 months after entry into the PhD program. It will have a written portion consisting of a one-week take-home exam with access to research materials, and an oral portion to be administered by the Advisory Committee within one month after the conclusion of the written exam. In the event of failure of the written exam, the Advisory Committee may, at its discretion, elect not to administer the oral portion. The outcome of the exam is determined by a vote of the committee, with no more than one dissenting vote permitted for passage. Failure to pass the comprehensive examination twice is grounds for dismissal from the program.

The second part of the PhD Comprehensive Examination is the Research Proposal Defense Presentation. Within six months after the successful completion of the comprehensive examination or 24 months from matriculation, the Ph.D. student must submit and orally present and defend a research proposal to the Ph.D. Advisory Committee. This presentation may be administered simultaneously with the oral portion of the comprehensive examination. Upon successful completion of the Engineering PhD Candidacy Exam, the student is admitted to Candidacy for the Ph.D. degree.

Core Courses in Professional Specialties

Professional concentrations require a minimum of 15 credit hours of relevant coursework. The following core courses are required for each of the professional concentrations. Additional relevant courses may be necessary to complete 15 credit hours:

Environmental Engineering	
CE 579	Water and Wastewater Treatment Design or satisfied by an appropriate course as an undergraduate
CE 580 OR CE 577/CH 576/CM 576	Environmental Chemistry Atmospheric Chemistry
CE 584	Chemodynamics
CE 582 OR CE 586	Environmental Systems Analysis and Design Industrial Ecology

and one of the following:

CE 681	Environmental Physico-Chemical Processes
CE 682	Environmental Biological Processes

Infrastructure Systems and Materials

Choose 4 or 5 (depending on degree type) from the following:

CE 501	Fracture Mechanics of Concrete Structures
CS 512	Structural Dynamics
CE 513	Elastic Waves and Non-Destructive Tests
CE 515	Foundations, Stability, and Retaining Structures
CE 516	Advanced oil Mechanics
CE 518	Soil Structure Interaction
CE 520	Computational Methods of Structural Analysis
CE 521	Advanced Mechanics of Composite Structures
CE/ME 527	Advanced Fluid Mechanics
CE 538	Introduction to Finite Element Method

CE 541	Bridge Engineering
CE 549	Experimental Methods in Structures
CE 551	Theory of Elasticity
CE 552	Advanced Strength of Materials
CE 553	Properties and Performance of Concrete Materials
CE 554	Continuum Mechanics
CE 556	Engineering Analysis
CE 563	Railroad Engineering
CE 622	Uncertainty Quantification and Optimization in Computational Mechanics
CE 631	Cement Chemistry
CE 633	Plasticity
ME 531	Computational Fluid Dynamics

Water Resources Engineering

Choose 4 from the following list:

CE/ME 527	Advanced Fluid Mechanics
CE 554	Continuum Mechanics
CE 569	Watershed Analysis
CE 570	River Restoration
CE 571	Computational River Dynamics
CE 572	Advanced Open Channel Hydraulics
CE 573	Sediment Transport
CE 574	Ecohydraulics
CE 575	Coastal Engineering

CE 576	Hydraulic Engineering in Cold Regions
ME 531	Computational Fluid Dynamics

Computer Science

Alexis Maciel, Department Chair

Christopher A. Lynch, Graduate Committee Chair

The Department of Computer Science offers graduate programs leading to degrees of Master of Science (offered interdisciplinary with the Department of Electrical and Computer Engineering) and Doctor of Philosophy in Computer Science. These programs are designed to increase the student's fundamental knowledge and to give the student guidance and experience in research. A graduate student pursues these objectives by taking advanced courses, participating in seminars, and carrying out and reporting on a research project. The department provides the advantage of close personal association between graduate students and faculty, giving special attention to individual needs and interests. The department has strengths in theory, artificial intelligence, software, graphics & visualization, security, systems, and networks. An overview of research areas in which department members perform research can be found [here](#). Please see requirements for MS in Computer Science in the Interdisciplinary Programs Section of the Catalog.

PhD in Computer Science Requirements

1. A minimum of 90 credit hours earned for graduate courses numbered 500 and higher including at least 36 credit hours of classroom and instructional laboratory coursework (this is above the university minimum of 24); a minimum of 6 credit hours of research seminar. A maximum of 30 credit hours of graduate transfer credit from an MS degree with grades of B or higher may be accepted toward the PhD degree.
2. At least three full academic years of study beyond the baccalaureate degree with at least two years in residence in Clarkson.
3. A cumulative GPA of 3.000 in courses used to meet graduation requirements.
4. Graduate students must complete the PhD candidacy procedure within two years of full time study after admission to the PhD program.
5. Doctoral candidates must complete an original research project submitted as a written thesis to be orally presented and approved before a committee of at least five faculty members. At least four members must be Clarkson faculty of assistant professor rank or higher and possessing a doctoral degree. At least one committee member must be from a department other than the candidate's major department. An external examiner with appropriate credentials from outside the university may serve as one of the five committee members. The thesis must also be approved by the Dean of the Graduate School and submitted following the process defined by The Graduate School.

Additional Program Requirements and Procedures

Students must complete a minimum of 36 credits of computer science related coursework including:

1. 4 required courses across 3 areas:
 1. CS 541 (Theory)
 2. CS 547 (Theory)
 3. CS 544 (Systems)
 4. CS 545 (Languages)

A grade of B+ or better is required in each of these courses. A written exam option is offered for students who have taken equivalent courses at other institutions and for students who did not receive a B+ in the Clarkson course. Students who have taken equivalent courses at other institutions and pass the exam with a grade of B+ or better can replace the corresponding course by another CS course. A minimum of four 3-credit research-oriented 600-level CS courses. Research- oriented courses include substantial research literature review and a research project/presentation component.

The Computer Science PhD Committee will maintain a list of acceptable by permission of the Computer Science PhD Committee only when they satisfy the same standards as regular 600- level CS courses and include substantial research literature review and a research project/presentation component. A grade of B+ or higher is required in two 600-level CS courses in order to advance to candidacy and one of these must be a research-oriented 600-level course.

Beyond the 4 required courses listed above, students must take 1 course from each of the following 4 groups:

1. Group A (Theory and Algorithms)
2. Group B (Computer Systems and Networks)
3. Group C (Languages and Software Development)
4. Group D (Artificial Intelligence and Applications)

Students are recommended to consult with the Graduate Committee of the Department of Computer Science as well as their thesis advisor on specific courses that fulfill the requirements for each of the four breadth groups A, B, C, and D. Courses used to satisfy this breadth requirement may also be used to satisfy the requirements in research. The specific lists of courses may change, and students may petition the Computer Science PhD Committee to accept additional courses, including courses outside the department, in these groups.

Additional courses as necessary to reach 36 course credits. Students are expected to take at least one graduate course in computer science or a related field each semester that they are enrolled in the Computer Science PhD Program. This requirement may be waived if in consultation with the student's advisor, the Computer Science PhD Committee decides it is in the student's best interest to focus on completion of their thesis work.

Students are required to attend and participate in the CS 707 or 708 Seminar in Computer Science (1 credit) series during at least 6 semesters in residence in the PhD program. Participation is recommended during each semester in residence in the PhD program.

The doctoral candidacy procedure for the Computer Science program is portfolio-based.

Before advancing to candidacy, students must have completed the 4 required courses (CS 541, CS 547, CS 544 and CS 545) and two of the 600-level CS courses, at least one of which must be a research-oriented course. A grade of B+ or higher is required in each course. Students prepare a portfolio consisting of a written statement of research interest and representative work from courses and seminar (e.g. exams, research papers, presentation materials). The student appears before the Computer Science PhD Committee for an oral defense of their portfolio. This oral defense and portfolio examination constitutes the comprehensive exam for candidacy in Computer Science.

To advance to candidacy, the student must have also chosen a faculty advisor who believes he or she is prepared to begin original research in a mutually acceptable field of specialization. Students must advance to candidacy within two years of full-time study after admission to the PhD program or be granted an extension by the Computer Science PhD Committee. The doctoral candidacy procedure for the Computer Science program is portfolio-based.

The student must write a thesis proposal outlining his or her research plan and discussing related work and defend this proposal in an oral exam before his or her thesis committee. In addition to the university requirements, at least three members of the committee must be from the Computer Science Department. Students must form their committee and pass the thesis proposal defense exam by the end of their third year of full-time study after admission to the PhD program or be granted an extension by the Computer Science PhD Committee.

The final step in completion of the doctoral program is the submission of a written thesis in conjunction with an oral thesis defense. The candidate will normally present a 50-minute oral presentation of the thesis work at an advertised campus event followed by at least 10 minutes of public questions. After the end of the public session, the candidate and their 5-member thesis committee will gather in closed session for final questions and presentation of corrections to thesis. The candidate will be then asked to leave the room for a final vote of approval. Following approval, the candidate must complete the requested corrections to the written thesis and obtain final signatures. The candidate must provide all five thesis committee members with a copy of the thesis at least four full weeks before the public defense. The thesis committee for the final defense is the same as for the proposal defense. Any changes must be approved by the Computer Science PhD Committee in advance of the final defense.

Program Length

All work done for the master's degree in computer science is to be completed within 5 calendar years, although it is normative to complete this degree in 2 years. All work for the PhD degree must be completed within 7 years after admission to candidacy.

Construction Engineering Management Programs

Erik Backus, Director of CEM

MS in CEM Prerequisites

A Bachelor's Degree in the following or allied fields: Civil Engineering, Mechanical Engineering, Electrical Engineering, Construction Engineering, Construction Management, Engineering Management, Civil Engineering Technology, Construction Engineering Technology, Management, Business.

No minimum grade point average is required for admission; however, a superior record of academic achievement is expected of all applicants.

MS in Construction Engineering Management Requirements

The program requires the completion of 30 credit hours.

The masters core courses include (12 credit hours):

- Three CEM Courses (9 credit hours) that represent core topical areas. The following are presently those courses (subject to change based on current market conditions and/or research):
 - CE 506 Advanced Construction Engineering
 - CE 510 Sustainable Building & Infrastructure
 - CE 591 Special Topics in Construction Engineering Management
- CE590 Graduate Degree Completion Project (3 credit hours) under the oversight of the Director of the CEM Program. The CEM project advisor will be selected through mutual agreement between the Director of CEM, the student, and project advisor. At the completion of the project work, the student will prepare a formal report and submit it to the project advisor. When the report is approved by the advisor, the project credits will be formally granted.

Construction Engineering Management Elective Courses (18 Credit Hours). These include any CE coded course other than CE590, CE595, CE610, CE612, and/or CE684 and courses offered by the Reh School of Business through their MBA or MSEM program(s). An initial list of CEM elective courses includes:

- CE 502 Applications of Geospatial Analysis
- CE 505 Project Controls and Lean Methods in Construction
- CE 508 BIM for Prefab
- CE 541 Bridge Engineering
- EM 660 Financial Analysis & Cost Management
- EM 650 Operations Strategy & International Competitiveness
- OM 680 Strategic Project Management

- EM 640 Leading and Managing Organizations
- OS 657 Leading Organizational Change
- OS 666 Negotiations & Relationship Management
- EM 630 Law for Engineers
- EM 620 Enterprise Sustainability

Length of Program

Full-time students may complete the degree in one calendar year. Part-time students may complete the MSCEM degree in CEM within three years.

Advanced Certificate in Construction Engineering Management (CEM)

Erik Backus, Director of CEM

The Certificate Program in Construction Engineering Management (CEM) provides a post undergraduate sequence of courses and subjects that deepen understanding in key construction engineering topics. Using a variety of methods, students engage with professionals, subject matter experts, and practitioners in the field, providing current working knowledge of the state of the industry.

Required courses (9 credits)	
CE 506	Advanced Construction Engineering
CE 510	Sustainable Infrastructure and Building
CE 591	Special topics in Construction Engineering Management

Program Length

Most candidates complete their certificate program in 9 months to 1.5 years.

Electrical and Computer Engineering Programs

Paul McGrath, Department Chair

The Electrical and Computer Engineering department offers programs of study leading to the degree of Master of Science (MS) in Electrical and Computer Engineering and a professional Electrical Engineering Master of Science (MS). A Doctor of Philosophy (PhD) in Electrical and Computer Engineering and an off-campus PhD option designed to assist qualified non-resident candidates is also available.

Research areas in the Electrical and Computer Engineering department are broadly distributed. Our faculty specializations can be categorized into the following tracks:

1. Power Engineering
2. Electronics & Materials

3. Control Engineering
4. Communication and Signal processing
5. Computer Hardware
6. Computer Software

MS Degree in Electrical and Computer Engineering Prerequisites

BS or equivalent degree from an accredited program in Electrical, Computer or Software Engineering, or other engineering discipline is required. Applicants with degrees in disciplines other than engineering may be required to demonstrate proficiency through additional undergraduate coursework as determined by the departmental Graduate Committee. This may comprise an additional semester of study for which graduate credit cannot be granted. While no minimum grade point average is required for admission, a superior record of academic achievement is expected of all applicants. The MS degree is available on-campus or through online delivery.

MS Degree in Electrical and Computer Engineering Requirements

1. 30 credit hours that include:
 - a. A minimum of 18 credit hours of graduate coursework (500-600 level courses)
 - b. A major portion (more than 50%) of the course work will be in the chosen research area. The core curriculum consists of four courses, including three courses from a list that spans the areas of emphasis and EE610, the ECE Seminar. The list of courses is maintained by the Department.
 - c. 2 credit hours of seminar work
 - d. Maximum of 10 credit hours transfer credit (grade of B or better)
2. Satisfactory completion of one of the research or professional experience components listed below. Please note all options may not be available in every program.
 - a. A written thesis based on independent research
 - i. A thesis submitted in partial fulfillment of the requirements for the Master of Science degree will be examined by a committee of at least three Clarkson faculty appointed by the student's department.
 - b. Passing a comprehensive examination
 - i. Exceptional students who have completed at least 40 credit hours of graduate coursework may take a comprehensive examination in partial fulfillment of the requirements for the Master of Science degree.
 - c. An appropriate, professionally-oriented special project
 - i. A project submitted in partial fulfillment of the requirements for the Master of Science degree that will be examined by a faculty member, or faculty-member committee, as approved by the appropriate academic administrator.

MS Degree in Electrical Engineering Prerequisites

A BS in engineering or equivalent. Students applying from other disciplines will be handled on a case-by-case basis. Those students who are not fully prepared to pursue graduate work in engineering may be required to take additional courses for which graduate credit will not be given. Admission to the MS program will be given only after the required prerequisite coursework has been completed

Additional Program Requirements and Procedures for MS in Electrical Engineering

Students must complete 30 credits of course work and MS Graduate Project EE 699 (see below).

The Master of Science in Electrical Engineering Program requires a total of ten courses. Each student's program should include at least seven Electrical Engineering courses and up to three electives. The elective courses are selected from Engineering (Mechanical or Electrical), Computer Science, School of Business MBA Program, or the Business of Energy Program. A list of these courses may be found on the Capital Region Campus website. Not all courses from these areas are applicable; therefore all course selections must be approved by the graduate advisor before course registration. Each student must submit a program plan of study that is acceptable to the advisor before completion of the first course taken for graduate credit.

An option of replacing two of the ten courses with Research and Thesis courses requires departmental approval prior to beginning the program. Students not completing Research and Thesis courses are required to complete the MS Graduate Project in Electrical Engineering (EE 699). This is a non-credit, no-fee project that serves as the culminating experience of the MS in Electrical Engineering degree.

PHD Degree in Electrical and Computer Engineering Prerequisites

An MS or ME degree from a program in Electrical Engineering or other engineering discipline is required for admission. Applicants with degrees in disciplines other than engineering may be required to demonstrate proficiency through additional undergraduate coursework as determined by the departmental Graduate Committee. This may comprise an additional semester of study for which graduate credit cannot be granted.

While no minimum grade point average is required for admission, a superior record of academic achievement is expected of all applicants.

PHD Degree in Electrical and Computer Engineering Requirements

1. The following are minimum requirements:
 - a. 90 credit hours beyond the BS
 - b. 39 credit hours of coursework
 - c. 15 credit hours in the major field
 - d. 9 credit hours in the minor field

- e. 6 credit hours from a department other than the one in which the student is housed (courses double listed in ECE and another department do not count in these 6 credit hours)
- f. 6 credit hours of seminar
- g. 2 years of residency for on-campus students
 - i. Students who matriculate in the off-campus PhD program are exempt from this residency requirement (see graduate catalog for details of the off-campus PhD program policy).
- 2. A maximum of 30 credit hours transfer credit (grade of B or better).
- 3. A minimum of 3 academic years of full-time study or the equivalent in part-time study.
- 4. Must pass a PhD Comprehensive examination.
- 5. Must pass a Candidacy examination.
- 6. Must successfully defend a written PhD dissertation in front of the Research Committee.

PhD Research Committee

Each PhD degree student must have a research committee of at least 5 committee members. The student's research advisor acts as the committee chair. At least 3 members must hold primary appointments at the rank of Assistant Professor or higher in the ECE Department, and at least 1 member must be a Clarkson faculty member from outside the ECE Department. Off-campus students may have a co-advisor, who holds a PhD in a relevant area, at the student's place of employment. The co-advisor can serve as the fifth member of the committee. On the recommendation of the faculty advisor, the ECE Graduate Committee, with the approval of the Graduate School, will appoint the Research Committee. The research committee must be appointed before the PhD comprehensive exam (see below) and is responsible for ensuring that the student has sufficient preparation appropriate for the degree.

The research committee members will:

- 1. Serve as members of the PhD comprehensive exam
- 2. Serve as members of the dissertation proposal defense committee
- 3. Serve on the final dissertation committee.

The student's committee has the responsibility to certify that the major field, minor field, and overall coursework is appropriate to the student's field of study. This must be done by the time of the approval of the student's research proposal.

PhD Comprehensive Examination

All students must pass a comprehensive examination within one year of entering the PhD program or after the completion of 30 graduate credits, whichever comes later.

The comprehensive examination will provide students with an opportunity to demonstrate familiarity with their field of specialization required for the PhD study and their critical thinking skills.

The comprehensive examination will consist of a written research paper and an oral presentation of the research. The research paper must include a comprehensive and pertinent literature review and a broad overview of possible research topics. The student should demonstrate an ability to

1. Identify a number of relevant research papers,
2. Grasp key ideas in the papers, and
3. Replicate important results (derivation of equations, developing computer models, etc.).
4. The research committee will be responsible for organizing and administering the comprehensive examination.

At the conclusion of the comprehensive exam, the research committee renders one of the following decisions: 1. Pass or 2. Fail

The research committee must inform the Graduate Committee chair, in writing, of the results of the comprehensive exam, by completing and submitting the ECE comprehensive Exam results form.

In case of a fail, the student will have a second opportunity to take the examination within six months of the first attempt.

If the student does not complete the comprehensive exam requirements within the time limits specified, the student will be required to withdraw from the program. In this case, the student can be granted the option of pursuing a Master of Science degree.

If a student does not wish to take the exam according to the above schedule but wishes to continue in the program, the student must petition the Graduate Committee for permission to take the exam at a later date. Petitions must be received well in advance of the required exam date. There is no guarantee that the Graduate Committee will approve such requests.

Students completing a Master of Science degree in the ECE Department at Clarkson University can combine the MS oral defense with the comprehensive exam.

Transfer of credits

Within one year of entering the PhD program, any transfer of credits from other institutions must be completed, including the transfer of credits resulting from a Master's degree program. Any coursework must be noted as major, minor, or out of the department, as appropriate.

Candidacy Examination

All students must satisfactorily complete the PhD candidacy procedure by defending a PhD research proposal within six months after the successful completion of the comprehensive examination or two years after entering the PhD Program, whichever comes later. Part-time students should complete the candidacy exam before completing 66 credits. Students will have two opportunities to get approval from the research committee.

The research proposal is intended to demonstrate that the student's research topic is suitable for the successful completion of dissertation research, and that there is a reasonable likelihood that the student can successfully complete the research. The research proposal is a written document that is examined by the committee and orally defended in front of the committee. At the conclusion of the oral exam, the committee will determine the exam results, either:

- i. Pass
- ii. Fail

The committee will inform the ECE Dept. Chair, in writing, of the results of the exam. A copy of this memo will be inserted into the student's file.

In the event that this exam is failed, the student will be required to withdraw from the program. In this case, the student can be granted the option of pursuing a Master's of Science degree. If subsequent to passing the candidacy examination, the student or the thesis advisor decides to make a significant change in the research topic, the research committee should be informed in writing.

Exceptions to the departmental requirements must be approved by the Department's graduate committee and the department chair. This approval must be in writing and inserted into the student's file.

Mathematics Programs

Guangming Yao, Department Chair

Diana White, Graduate Program Director and Graduate Committee Chair

The Department of Mathematics offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees in Mathematics. These programs are designed to increase the student's fundamental knowledge and to give the student guidance and experience in research. A graduate student pursues these objectives by taking advanced courses, participating in seminars, and carrying out and reporting on a research project. The department provides the advantage of close personal association between graduate students and faculty, giving special attention to individual needs and interests.

Faculty members are engaged in research over a wide range of subjects in the

mathematical sciences. Current research interests include: dynamical systems, chaos, nonlinear dynamics, complex networks, critical phenomena and statistical mechanics, imaging science, functional analysis, numerical analysis, computational applied mathematics, reaction-diffusion equations, population dynamics, inverse problems, optimization, hybrid and derivative-free optimization, sensitivity analysis, finite-element and multigrid methods, fluid dynamics, atmospheric models, regional climate dynamics, computational geosciences, applied probability and statistics, multivariate and inferential statistics, application of nonparametric statistics, and biostatistics and mathematical biology.

Prerequisites

Applicants must possess an undergraduate BS degree in mathematics, statistics, or a related field, with sufficient preparation to engage with both theoretical and computational mathematics. The admissions committee will select candidates on the basis of aptitude, programmatic needs, research interest fit, and overall excellence of academic qualifications.

MS in Mathematics Requirements

Students entering with a BS degree are required to take a minimum of 18 credit hours of course-work (6 three-credit graduate courses) and 6 to 10 credit hours of thesis. A minimum total of 30 credits is required for the MS degree. The program for research assistants and teaching assistants during each semester of the academic year is a minimum of 9 credit hours, at least 1 credit hour of which is thesis. The thesis advisor will set up the program within this framework and the department will approve it or recommend changes.

The MS thesis is normally written during the summer and orally presented and defended in late summer or fall before a committee of three or four department faculty. In lieu of a thesis, a student may do a special project. The student receives the MS degree at the next commencement after the thesis is accepted.

Additional Program Requirements and Procedures for MS in Mathematics

1. Students must complete 30 credit hours subject to the following restrictions:
 - a. At least 20 credit hours of course and seminar work must be earned in residence at Clarkson University
 - b. At least 16 hours must be earned in the Department of Mathematics as courses and seminars numbered above MA 505, with at most one of these credits coming from seminar. Among the courses, 1 course must be MA 521 Classical Complex Analysis, MA 522 Classical Real Analysis, or MA 578 Numerical Analysis, and 2 other courses must be at the 500 or 600 level. The remainder of the students' coursework must be approved by their advisor in collaboration with the Graduate Committee Chair
 - c. Have a Cumulative Grade Point Average (GPA) of at least 3.000 in their course work

2. Students must fulfill one of the following:
 - a. Write a thesis under the guidance of a faculty member. The thesis is to be an original or expository study of some area or problem and shall represent 6 to 10 credit hours (MA810). The topic of the thesis must be approved by the Graduate Committee and thesis advisor in advance. As required by University regulations, the thesis must be examined by a committee of at least 3 Clarkson faculty appointed by the chair of the department
 - b. Successfully complete any 2 components (GCE, Subject Cat 1, Subject Cat 2) components of the comprehensive exams described under the requirements for the PhD degree. The choices must be approved by the student's advisor and the Graduate Committee.
 - c. Successfully complete 1 Subject Exam (described in the PhD requirements below) and complete a special project. A description of the proposed project must be approved in advance by the student's advisor and the Graduate Committee. When the project is completed, it must be approved by the Graduate Committee. Completion will carry 3 to 9 hours of thesis work (MA810) at the discretion of the student's advisor.

PhD in Mathematics Requirements

A minimum of 90 credit hours are required for the PhD. This corresponds to a minimum of 3 academic years of full-time study, of which 2 must be in residence at Clarkson. The MS degree may be accepted in lieu of a maximum of 30 credit hours. Of these 90 credit hours, a *minimum* of 39 credit hours must be in coursework, apportioned as explained below. Prior to advancing to Candidacy, PhD students must complete three comprehensive exams, at least one of which should be chosen in consultation with the faculty advisor to align with the student's research topic. There is no foreign language requirement for the PhD. Candidates for the PhD are required to prepare an original dissertation in an advanced research area and defend it in an oral examination.

Additional Program Requirements and Procedures for PhD in Mathematics

The satisfaction of these requirements will be certified by the thesis committee. Students must:

1. Complete at least a total of 90 hours graduate credit, distributed as below.
 - a. Complete a minimum of 39 credit hours of approved course work (30 of which may be those taken for the MS degree). At least 24 credit hours have to be in the "Core Curriculum" course list, which includes all MA/STAT 505+ courses and an additional list of non-MA/STAT courses with sufficient mathematical content, approved by the Graduate Committee. At least 6 credit hours have to be from graduate out-of-department courses. Any completed course that is both a part of the Core Curriculum and out-of-department can be used to satisfy either the 24 credits requirement or 6 credits requirement, but not both simultaneously.

- b. Complete at least 6 hours of seminar credit. A seminar is a course in which the student is expected to make presentations to the class. This is in addition to the minimum of 39 credit hours of approved coursework above. 1 hour of seminar credit may be earned by either attending a regular scheduled seminar and making 1 presentation, or attending all colloquia for 1 semester and giving 1 presentation at a Department of Mathematics seminar (which would be scheduled during the regular colloquium time)
 - c. Complete at least 21, but no more than 45, hours of thesis credit (MA810) related to the dissertation topic.
- 2. Have a Cumulative Grade Point Average (GPA) of at least 3.000 in their course work
- 3. By the beginning of their 3rd regular semester, every PhD student must pass a General Comprehensive Examination. The purpose of this exam is to determine whether a student possesses the fundamental knowledge and skills to pursue PhD level course content. The exam is offered in August, January, and May. The topics covered on this exam are the undergraduate-level contents of: Calculus; Ordinary Differential Equations; Matrix Analysis and Linear Algebra; Advanced Calculus/Real Analysis; Probability and Statistics.
- 4. By the beginning of their 5th regular semester, every PhD student must pass two Comprehensive Subject Examinations ("Subject Exams"), demonstrating knowledge and skills sufficient to pursue original PhD-level research. 1 exam will be from Category I, and 1 from Category II. The choices must be approved by the student's advisor and the Graduate Committee. The categories and subjects are:
 - a. Category I: Real Analysis; Complex Analysis; Sets and Topology; Numerical Analysis
 - b. Category II: Matrix Theory and Computations; Partial Differential Equations and Boundary Value Problems; Ordinary Differential Equations and Dynamical Systems; Probability and Statistics
 - i. If an unsuccessful attempt is made, the student may choose to change the topic within the category, but each category can be attempted at most twice. In the event that a student has not satisfied these conditions within the time limit allowed, they must petition the Graduate Committee in order to continue their studies.
- 5. Successfully complete the Proposal Examination, consisting of a formal presentation of the proposed thesis topic to their thesis committee within 1 year of passing all components (GCE and Subject) of the comprehensive exam. The thesis committee consists of at least 4 Clarkson faculty in the Department of Mathematics, at least 1 faculty member from another department, and no less than 5 committee members in total. The topic and the breadth of the proposed work must be acceptable to the committee.
- 6. Complete a doctoral dissertation, present it in a public formal seminar, and defend it to the doctoral thesis committee during an examination period. The dissertation embodies the results of the student's original research.

Program Length

The typical length of the Mathematics MS program is 2 years and between 5 and 6 years for the PhD program for students entering the program with a BS-equivalent degree.

Mechanical Engineering Programs

Marcias Martinez, Department Chair

The departmental graduate program in Mechanical Engineering is structured to provide the student with a series of goals to be attained in an orderly fashion throughout the course of study. The ultimate goal in this sequence is the granting of the Master of Science (M.S.) or Doctor of Philosophy (Ph.D.) degree, following a successful completion of the program. The general requirements of the Graduate School are described in the university catalog. The formal requirements for the M.S. and Ph.D. in Mechanical Engineering are set forth as follows:

Mechanical Engineering Department Requirements**A. Prerequisites:**

1. BS in engineering or equivalent. Students applying from other disciplines will be handled on a case-by-case basis. Those students who are not fully prepared to pursue graduate work in engineering may be required to take additional courses for which graduate credit will not be given. Admission to the M.S. program will be given only after the required prerequisite coursework has been completed.

B. Requirements:**1. Course work**

a) 18 credits of coursework. Clarkson may grant permission to transfer up to 10 graduate credit hours from an undergraduate degree. With approval of the Dean of the Graduate School, a maximum of 12 credit hours may be granted. The student must have passed the graduate course(s) with a minimum grade of B (or equivalent).

b) 2 credits of seminar

c) One credit of ME614 or ME616 may be replaced by ES 542 – Fundamentals of Research and Graduate Study

d) At least two of the courses must have an ME designation.

e) At least one course must be a mathematics course. The following is a list of suggested courses:

Any 500 level or higher math course (MA designator)
CH561 Chemical Engineering Analysis
ME515 Finite Element Methods
ME529 Stochastic Processes in Engineering
ME554 Continuum Mechanics

A good first class to take is CH561 Chemical Engineering Analysis. Other courses may also be acceptable with the written approval of the MAE Graduate Committee

f) No more than two courses may be selected from the following group

ME591	Selected Topics in Materials Engineering
ME594	Selected Topics in Manufacturing
ME618	Selected Topics in Heat Transfer
ME628	Special Topics in Fluid Mechanics
ME657	Selected Topics in Solid Mechanics

g) At least 3 courses with a consistent theme that support study decided on between the student and faculty advisor for graduate credit [BH1]

2. Research/Project credits, either:

a) 10 credits of ME 614 – Thesis/Dissertation with a MAE faculty advisor

b) All students must complete a thesis and defend it orally to a committee consisting of a minimum of three Clarkson faculty members. The committee must be approved by the MAE Chair and CSOE Dean using the CSOE Graduate Committee Appointment form. The committee should be approved before the second semester of graduate study.

or

c) 4 credits of ME 616 – Special Projects with a MAE faculty advisor

d) 6 credits of additional coursework

e) All students must complete a project with a written report approved by the Chair of the graduate committee. With the faculty advisor's approval, students enrolled in industrially sponsored distance learning programs may accomplish 7 credits of project work and 21 credits of coursework.

or

f) By permission of the graduate committee chair, exceptional students may be allowed to proceed directly to the Ph.D.; such students will be awarded the M.S. upon

completing 40 credit hours and passing the doctoral candidacy procedure (qualifying exam and proposal defense).

The MS student has the option of continuing towards a Ph.D. degree if accepted into the Ph.D. program by the MAE Graduate Committee.

PhD in Mechanical Engineering Requirements

A. Prerequisites

1. MS in engineering or equivalent. Students applying from other disciplines will be handled on a case by case basis.

B. Requirements:

1. Course work

- a) A minimum of 39 credit hours of course work. Students may transfer in up to 30 credits of research and course work from an MS degree, with a grade of B or better. A graduate transfer credit/waiver request form must be approved by the graduate committee chair and department chair. For instances where no equivalent Clarkson University course exists, but the advisor deems the course worthy of transfer, a Special Graduate Topics course number may be used; e.g., ES 999, CM 999, CH 999, etc.
- b) No more than two courses may be selected from the following list. Previous Selected Topics courses taken to satisfy the MS degree requirements do not count against this restriction.

ME591	Selected Topics in Materials Engineering
ME594	Selected Topics in Manufacturing
ME618	Selected Topics in Heat Transfer
ME628	Special Topics in Fluid Mechanics
ME657	Selected Topics in Solid Mechanics
- c) 6 credits of seminar
- d) At least two additional ME courses beyond the M.S. degree course requirements (part of the 39 course credit hours required).

C. Ph.D. Course Selection

1. Courses that a Ph.D. student takes to complete course requirements must be mutually agreed upon by the student and advisor. Students and advisors must define the major field of study (15 credits minimum) and minor field of study (9 credits minimum) on the Ph.D. Degree Program Form. The choice of major and minor field is at the discretion of the advisor.

With the advisor's consent, a student's minor field could be innovation and entrepreneurship through the Clarkson School of Business. This can be satisfied by completing three of the following four courses:

OM676	Developing and Managing Technology
SB613	Entrepreneurship and New Venture Creation
MK689	New Product Marketing
OM680	Strategic Project Management

D. Graduate Committee Selection (within the first year of study)

1. In order to provide guidance to Ph.D. students, a Degree Committee must be selected within one year of entry into the Ph.D. program and prior to the student's Research Proposal defense. In consultation with the student, the Committee will be selected by the student's Major Professor, who also serves as the dissertation advisor. Approval for the Degree Committee must be obtained from the MAE Department Chair and the Dean of the Graduate School.

The Committee will consist of a minimum of five members, of which a minimum of three must be faculty members from Clarkson's MAE Department and at least one must be from a department at Clarkson other than MAE. With the approval of the Provost, the fifth member may be any person with appropriate credentials from either inside or outside the University. This Committee will judge the technical competence of the Research Proposal, the dissertation and other oral presentations. With the Provost's approval, additional Committee members may be appointed from outside the faculty as necessary.

E. Qualifying Examination (within the first year of study, and after choosing the Graduate Committee)

1. Both a written and oral qualifying examination based on general preparation in the major field must be taken at the first offering after the student completes one semester in the Ph.D. program. M.S. students may take the exam one time prior to completion of their M.S. thesis with written permission from their advisor. The written exam will be offered in January, with the oral portion to be scheduled no less than one week after completion of the written exam.
2. If a Ph.D. student fails any portion of the exam, studies cannot proceed until approval is obtained from the Department Chairman and from the Dean of the

Graduate School. If a Ph.D. student fails the qualifying exam twice, the student will be dropped from the Graduate School.

3. The written qualifying examination is comprised of two separate exams:

a) Mathematics – all students must take this exam. Subject areas will include:

- Integrals of delta/heavyside functions
- Integration by parts, chain/product rule, Leibniz theorem, limits
- Line and surface integrals, complex integrals and contour integration
- Vector identities, indicial notation
- Divergence/Green's theorem
- Laplace transforms and applications
- First order ODEs:
 - o linear constant coefficient inhomogeneous systems
 - o separable
 - o dimensionless
- Second order ODEs:
 - o constant coefficient homogeneous
 - o Green's functions
- PDEs:
 - o Separation of variables for steady and unsteady problems
 - o Similarity solution
 - o Fourier solution
- Linear algebra, eigenvalues/eigenvectors
- Taylor and Fourier series
- Calculus of variations
- Lagrange multipliers
- Numerical approximation: interpolation, integrals, derivatives

b) Subject exam – all students must take one subject exam

(1) Each subject exam has 3 major areas.

The advisor will identify the subject and major area of the exam that the student will take. Students must notify the graduate committee chair of the subject and major area of the qualifying exam that they will take before the October 31 that precedes the January examination date.

(2) The subjects and associated major areas are:

Thermal Sciences (Fluid Mechanics/Thermodynamics/Heat Transfer)
Material Science (Solid Mechanics/Materials/Manufacturing)
Dynamics (Dynamics/Controls/Vibration).

- c) A total of 3 problems will be assigned for each major area. Students must answer two questions within their major area, and one question from either of the two remaining areas.
- d) The problems will be open-ended, requiring students to draw upon various aspects of the major area. Grading will focus on the students ability to formulate a solution by making the necessary assumptions, applying appropriate equations/analysis, and reaching a reasonable answer.

4. Oral Exam

- a) No less than one week after the written exam is completed, an oral exam will be administered. The oral examining committee will consist of at least the student's research advisor and two members of the graduate committee.

The student will be given the opportunity to explain their approach/justification for how they solved the problems on the written portion of the exam. The committee will also question the student to evaluate their decision-making process on the written portion of the oral exam. This is an opportunity for the committee to probe the level of understanding of the student, and also for the student to make-up for mistakes they may have made on the written portion. As such, students should be prepared to justify their solution approach, as well as explain what they would do differently, and how, if they were to answer the problems again.

F. Research Proposal Defense Examination (within 24 months, and after passing the qualifying exam)

- 1. A formal written and oral presentation of a Research Proposal must be made to the Degree Committee within two years after enrollment in the Ph.D. program. It is also required that the written and oral proposal be completed at least one year prior to the completion date of the research work. The primary purpose of the research proposal defense examination is to provide an opportunity for the

Degree Committee to evaluate the technical competency of the student and the scientific merit of the proposed research, and to make critical but constructive suggestions regarding the proposed work. The written proposal may be brief, but must clearly describe the justification for the work (i.e., an introduction), the research methods/analysis to be performed (i.e., methods), research performed to date (i.e., preliminary results), and the proposed research plan that will carry the student to completion. It is required that the proposal be distributed to the Degree Committee at least one week prior to the formal presentation. The oral presentation should provide an overview of the written proposal. The Degree Committee must approve the written and oral Research Proposal for successful completion of the proposal defense examination.

Note: A student is considered a Ph.D. candidate after passing both the Qualifying and Research Proposal Defense Examinations.

G. Examination on the Dissertation

1. Before the final dissertation examination can be taken, the candidate must submit at least two peer-reviewed research articles to academic journals. At the time of the examination, these papers must be either under review or accepted by the journal.
2. A final dissertation based on independent research must be written, and an examination must be passed. The written dissertation must be sent to the Graduate Committee members at least two weeks prior to the examination date. The final dissertation examination will include, as a minimum, an oral examination based on the dissertation. The candidate must give a presentation and defend his/her dissertation. The Degree Committee and the Dean of the Graduate School must approve the dissertation.
3. The candidate must submit an announcement flyer to the MAE Graduate Coordinator at least one week prior to the dissertation examination. Prior to submission, the flyer must be approved by the advisor.

Physics Graduate Programs

Dipankar Roy, Department Chair

MS and PhD Prerequisites

A BS degree in physics or closely related subject is required, with undergraduate preparation in the following subjects (at the levels of the textbooks indicated): Classical Mechanics (Symon or Becker)

1. Quantum Mechanics (Anderson, or Griffiths)
2. Modern Physics (Krane)
3. Thermal Physics (Baierlein, Schroeder, or Kittel)
4. Electricity and Magnetism (Griffiths, or Reitz, Milford and Christy);
5. Optics (Bennett, or Hecht).

Applicants are expected to have fluency in data analysis and computer programming. A minimum overall undergraduate GPA of 3.0/4.0 is generally required, and an overall GPA of 3.2 or above is recommended for financial aid considerations. An overall GPA of at least 3.4 is recommended for physics and math subjects. All new graduate students in the physics program take a two-part Placement Survey in their first fall semester, which is largely designed in the framework of Physics GRE. This survey provides a basis to determine initial course selections for incoming graduate students

MS in Physics Requirements

1. A cumulative GPA of 3.000 is required for graduation. Students with GPA falling below 3.000 will be placed on academic warning. These students will return to academic good standing if their cumulative GPA is 3.000 or higher at the end of the next term.
2. The Master's program has a non-thesis option and a thesis option. Students must identify a research topic and a research advisor by the end of the second semester of study. This requirement applies to both thesis and non-thesis options.
3. At least 30 credit hours of graduate coursework, with no less than 18 credits of courses (including the core subjects, PH661, PH663 and PH669), 6 credits of thesis (PH699) and 2 credits of seminar (must include at least 1 credit of PH683 or PH684). Only 500 and upper-level courses are accepted. A maximum of 10 credit hours (B grade or better) may be transferred from a post-baccalaureate certificate program. A minimum of 19 credit hours out of the total 30 must be taken in physics (coursework, seminars and thesis credits).
4. Satisfactory progress toward the degree: Academic progress is evaluated at the end of each term by the Physics Graduate Committee Chair in collaboration with the student's advisor.

Additional Requirements and Procedures for MS in Physics

1. **Thesis Option:** Students complete at least one of the core courses, PH661, PH663 or PH669 with no less than a B grade; *AND* defend a submitted thesis written on independent research. The thesis examination committee, composed of at least three Clarkson faculty, is appointed by the student's department. A thesis approved by the examining committee requires signature approval by the Dean of The Graduate School.
2. **Non-thesis option A:** Coursework component – Students take all three PH661, PH663 and PH669 courses and obtain a grade of at least a B in each. The student's advisor may authorize, with the approval of the department chair, replacement of at most one of these courses with another appropriate advanced course for the student's program (the B minimal grade requirement still applies). Project component – The student's research (PH699) will focus on a professionally oriented special project. The written Project Report is examined by a faculty member (usually the student's advisor), or by a faculty committee, as approved by the appropriate academic administrator (usually the chair).
3. The completion of this project will be certified by their academic advisor in a notice to the Department Chair, and the student's final report will be submitted to the Graduate School.
4. **Non-thesis option B:** Coursework component – same as that of Non-Thesis Option A. The Project Component of Option A will be replaced in Option B by successful completion of the Physics Comprehensive Examination within two years of graduate study. Non-thesis option B is reserved for graduate students currently enrolled in Physics PhD program who wish to receive a Master of Science degree while they work on their PhD thesis.

Program Length

While a typical program length is 2 years, all work must be completed in 5 calendar years.

PhD in Physics Requirements

1. A minimum of 90 credit hours beyond BS. Minimum 3 academic years' full-time graduate study (or the part-time equivalent); 2 years in residence at Clarkson. A two-part Physics Survey Test is used to determine initial coursework.
2. A maximum of 30 credits (with B or higher grade) can be transferred from an MS degree. Coursework - no less than 33 credits, including at least 6 credits taken outside the department and at least 6 credits of seminar. Each semester prior to the completion of 78 credits, full-time students in residence at Clarkson must successfully complete PH683 or PH684. Maximum credit hours per year - 30 (12 in fall, 12 in spring and 6 in summer; or, 15 in fall and 15 in spring). Only 500 and

- upper-level courses are accepted.
3. A full-time student status requires 9 credits per semester until <9 credits remain to complete 90 credits. After completing 90 credits, students will register for 1 credit hour of project/thesis, be in residence, and be actively engaged full-time in completing the project/thesis.
 4. A minimum average grade of B, and at least a B grade in each of the core courses (PH661, PH663, PH664, PH670 and PH669). The requirement for PH664 and PH670 can be fulfilled any time during the study, and the student's advisor can approve replacements of these two courses by other advanced graduate courses in the student's chosen research field.
 5. Satisfactory progress toward the degree: Academic progress is evaluated at the end of each term by the Physics Graduate Committee Chair in collaboration with the student's advisor.

Additional Program Requirements and Procedures for PhD in Physics

1. Students must select a thesis topic and be assigned to a research advisor no later than the second semester of graduate study. The Physics Chair approves the appointment of a research advisor. Research projects primarily guided by faculty outside the physics department requires a physics co-advisor approved by the Physics Chair.
2. Satisfactory completion of the Comprehensive Exam is required within two years of full-time study after admission to the PhD program or, for part-time students, before completing 66 credits (the "candidacy procedure" mentioned in Clarkson Graduate Catalog). If the comprehensive exam is failed twice, the student will be dropped from the PhD program.
3. The Physics Comprehensive Examination has two (written) parts, each part four hours long, usually given during the first two weeks of each spring semester. The topical coverages are based on those of upper-level undergraduate physics courses offered at Clarkson, and include: Part I: Classical Mechanics, Electricity & Magnetism (may include Optics topics); Part II: Thermal Physics, Quantum Mechanics, Modern Physics (relativity, nuclear, solid state).
4. By the end of the third year of study, the student writes a PhD research proposal and defends a doctoral topic before a thesis committee composed of at least 5 members. The proposal must be submitted to the thesis committee at least 10 working days before the oral defense. This exam should demonstrate that the thesis topic is of doctoral quality and that the student's background is adequate to carry out the proposed research. A unanimous decision of the committee is required for passing. The thesis committee (selected by the student's advisor and approved by the Physics Chair and the Dean of A&S) should include no less than 4 Clarkson faculty (at least 3 from physics) of assistant professor rank or higher and possessing an earned doctoral degree. At least one member must be from a department other than physics. With the provost's approval, the thesis committee may include an external examiner with appropriate credentials from another university or industry.

5. The final PhD examination involves an oral defense of the written doctoral dissertation before the thesis committee. The exam committee must receive thesis copies at least 10 working days before the oral defense.
6. Each semester of full-time study in residence at Clarkson prior to the completion of 78 credits, the student must register for and obtain a passing grade in PH 683 or PH 684 (Graduate Seminar).

Program Length

Typical program length for a PhD is 5 years. All work for the PhD degree must be completed within 7 years after passing the Physics Comprehensive Examination.

INSTITUTE FOR A SUSTAINABLE ENVIRONMENT

Susan Powers, Director and the Spence Professor in Sustainable Environmental Systems
Alan Rossner, Associate Director for Education

About the Institute

The Clarkson Institute for a Sustainable Environment serves as the central hub for Clarkson University's environmental and sustainability initiatives, encompassing research, interdisciplinary graduate and undergraduate programs, and outreach efforts. Established to build upon Clarkson's longstanding expertise in environmental fields, the Institute aims to foster interdisciplinary collaboration among faculty and students across the university. Its community is composed of a core group of fully and jointly appointed faculty, supplemented by approximately 60 affiliated faculty members from diverse disciplines, including engineering, natural and physical sciences, social sciences, political science, business, and the humanities.

The ISE hosts three graduate degrees and one undergraduate degree:

- BS-Environmental Science and Sustainability
- MS-Environmental Policy
- MS & PhD Environmental Science and Engineering.

More information can be found in the Interdisciplinary Program sections of the catalog.

Mission Statement

The Institute for a Sustainable Environment is a collaborative and multidisciplinary community that serves as the hub for the University's drive toward a sustainable world. We facilitate high impact learning experiences, foster transformative scholarship, and engage the campus and broader community in order to understand and address environmental and sustainability challenges.

Environmental Science and Engineering MS and PhD

Master's and doctoral degrees in Environmental Science and Engineering (ESE) span multiple disciplines to investigate how science and engineering interact with the environment in a broad context. This approach allows for a deeper understanding of the complex, interacting biological, chemical, physical and social systems. It is essential to apply an interdisciplinary framework to understand how these systems function and the many ways environmental factors should be integrated into a comprehensive decision-making process. The broad background of ESE graduates enables them to better understand how engineering and science impact policy decisions. The research-focused ESE degree programs provide a flexible framework for students to develop coursework and pursue research projects that fit their individual interests.

MS Prerequisites

Students are expected to have completed at least 1 year of calculus, physics, and chemistry, have some background in Fluid Mechanics, and have obtained a BS, BE or equivalent degree from an engineering or science program.

MS in Environmental Science and Engineering Requirements

Students must take:

- At least one Systems Thinking choice: CE 586 (Industrial Ecology) or CE 582 (Environmental Systems Analysis and Design) or EV 532 (Risk Analysis), or BY525 (Biological Systems and Environmental Change)
- At least one Policy choice: POL 570 (Environmental Policy) or POL571 (Energy Policy) or POL575 (Environmental Law) or EC660 (Env. Economics)
- At least one additional class from either the core Systems Thinking or Policy classes
- Two credits of seminar (EV610)
- Additional elective courses that provide a focus for the student's overall degree as determined by the student and advisor.
 - Thesis option – three (3) additional elective courses (9 credits minimum)
 - Project option – four (4) additional elective courses (12 credits minimum)
 - At least two of these electives must have an environmental or sustainability focus, as defined in the ISE Graduate Handbook.

Among all of the courses, at least 3 must be designated as Engineering courses. These are either any course offered by the Coulter School, or other courses with significant engineering content, as determined by the ISE Graduate Committee.

Details are included in the ISE Graduate Handbook.

All students must complete either a Thesis or a Project. Students choosing to complete a Thesis must defend it orally to a Committee consisting of a minimum of 3 faculty members. Students choosing to complete a project must present their work on campus and have their project and presentation approved by their Advisor and at least one other faculty member affiliated with ISE. Thesis students must complete at least 6 credits of thesis work. Students choosing a Project must complete at least 4 credits towards this project. Projects are expected to be more substantial than a term project, but not necessarily of the depth or breadth such as to be publishable in the academic literature. Projects may be related to a student's work in a professional context.

Program Length

MS Students typically complete their degree in 18-24 months (thesis) or 12-18 months (project).

PhD Prerequisites

Students are expected to have completed at least 1 year of calculus, physics, and chemistry. Most students enter the PhD program following completion of an MS degree. Exceptional students may be invited to proceed directly to the PhD. Such

students will be awarded the MS upon completing 40 credit hours and passing the doctoral qualifying examination with a superior grade.

PhD in Environmental Science and Engineering Requirements

Students must take:

- At least one Systems Thinking choice: CE 586 (Industrial Ecology) or CE 582 (Environmental Systems Analysis and Design or EV 532 (Risk Analysis), or BY525 (Biological Systems and Environmental Change)
- At least one Policy choice: POL 570 (Environmental Policy) or POL571 (Energy Policy) or POL575 (Environmental Law) or EC660 (Env. Economics)
- At least one additional class from either the core Systems Thinking or Policy classes
- Six credits of seminar (EV610)
- At least five additional elective courses that provide a focus for the student's overall degree as determined by the student and advisor.
 - At least two of these electives must have an environmental or sustainability focus, as defined in the ISE Graduate Handbook.
- PhD thesis credits (EV612) to account for the balance of credits needed for the 90 credit PhD degree

Among all of the courses, at least 3 must be designated as Engineering courses. These are either any course offered by the Coulter School, or other courses with significant engineering content, as determined by the ISE Graduate Committee.

Details are included in the ISE Graduate Handbook.

PhD students must pass the candidacy exam within 24 mo. to be classified as a PhD candidate. A research proposal is then required within one year of candidacy. The final dissertation must be presented, reviewed and approved by a committee of at least five members.

Program Length

PhD Students are expected to complete their degree in 3-5 years.

Environmental Policy MS

The interdisciplinary MS Degree in Environmental Policy provides a unique graduate experience in the policy aspects of environmental management. Graduates are prepared to be the next generation of environmental and energy policy analysts and experts who understand the complex socioeconomic and political processes that inform environmental outcomes — including the allocation of federal funding of environmentally-related research and the development of science-based environmental policy while taking into account the actions and interests of private sector firms and non-governmental organizations in the environmental arena.

MS in Environmental Policy Prerequisites

Students are expected to have taken a course on American Politics or American Society (sociology) as well as an introductory course in environmental science and have obtained a BS, BE or equivalent degree from an accredited institution.

MS in Environmental Policy Required Electives

All students must take:

1. POL 570 (Environmental Policy) or POL 571 (Energy Policy) or POL575 (Environmental Law)
2. EC 660 Environmental Economics
3. A research methods course– check with the ISE office for the current list of suggested courses.
4. Additional elective courses selected by the student and approved by their advisor. At least two of the electives must have an environmental or sustainability focus as defined in the ISE Graduate Handbook.
 - a. Students completing a thesis must take at least three additional elective courses for a total of at least 18 course credits.
 - b. Students completing a Project must take at least four additional elective courses for a total of at least 21 credits course work.
5. Two credits of seminar credit (EV610 or the equivalent)

All students must complete either a Thesis or a Project. Students choosing to complete a Thesis must defend it orally to a Committee consisting of a minimum of 3 faculty members. Students choosing to complete a project must present their work on campus and have their project and presentation approved by their Advisor and at least one other faculty member affiliated with ISE. Thesis students must complete at least 6 credits of thesis work. Students choosing a Project must complete at least 4 credits towards this project. Projects are expected to be more substantial than a term project, but not necessarily of the depth or breadth such as to be publishable in the academic literature. Projects may be related to a student's work in a professional context.

Dual Degrees Options:

MS-EP and MBA, with 12 credits that count towards both degrees for a total of 50-52 credit hours, MS-EP and MS Data Analytics, for which 9 credits can count towards both degrees for a total of 51 credits.

Program Length

Students are expected to complete their degree in 15-24 months.

INSTITUTE FOR STEM EDUCATION

Kathleen R. Kavanagh, Director

The Mission of the Institute for STEM Education (STEM Ed)

To combine disciplinary rigor with pedagogical science in outreach, teacher training, graduate student and faculty professional development to establish Clarkson University as a national leader in all aspects of STEM Education.

Vision

STEM Ed will:

- Build a reputation of student achievement, exemplary pedagogy, and K12 outreach, STEM Ed will focus on engagement and workforce preparation,
- Support faculty across disciplines and campuses to create learning experiences and curriculum that support all undergraduate and graduate students to be successful beyond Clarkson.
- Deploy Clarkson values of collaborative and innovative STEM teaching and learning to impact undergraduate and graduate student recruitment, retention and education of students from diverse backgrounds and on teacher preparation for K-12 and college-level.

STEM Ed's current objectives include coordination and expansion of Clarkson's STEM Education activities:

1. Expand the TA training "boot camp" both internally and externally and develop an undergraduate TA training module
2. Outreach projects and new grant opportunities coordinated across all three campuses
3. Coordinate student work experiences in educational projects
4. Informal education
5. Academic Retention Programs (First Year Council etc.)
6. Create and implement programs to support faculty in the classroom and improve learning experiences for Clarkson students
7. Dissemination of Scholarship of Teaching and Learning both on campus and in publications
8. Establish a Teaching Fellow program for Clarkson TA's and other graduate students wanting to pursue academic careers
9. Advise students in the pre-teaching minor.

Through all of this, STEM Ed will further enhance Clarkson's reputation on the national and international stage.

The LEWIS SCHOOL of HEALTH and LIFE SCIENCES

Lenn Johns, Dean

The Earl R. and Barbara D. Lewis School of Health and Life Sciences offers 4 health professions graduate degrees: Doctor of Physical Therapy (DPT), Master of Science in Physician Assistant Studies (MS-PAS), Master of Science in Occupational Therapy (MS-OT), and Master of Science in Bioethics. It also offers a Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in Interdisciplinary Bioscience and Biotechnology. The clinical programs (DPT, PA, and OT) are designed to prepare students to become highly skilled, entry-level healthcare providers who offer care through a patient centered approach that values interdisciplinary care and evidence based practice. Students and faculty of the programs contribute to the knowledge of their professions through interprofessional scholarship and practice. The clinical programs are located in Clarkson Hall, which houses state of the art facilities and equipment designed to provide a supportive and innovative learning environment. The Bioethics Program provides education, through the Master of Science and advanced certificates, preparing professionals for careers in clinical ethics, research ethics, and bioethics policy.

The School has programs associated with undergraduate education: BS in Biology, BS in Psychology, and the BS in Healthcare Freshman Direct Entry into the OT, PA and DPT programs, and pre-healthcare advising tracks. The BS in Healthcare is designed to allow a student to be highly focused or diverse in their coursework and the flexibility to design their own curriculum to meet their intellectual interests and career goals. Students can tailor their curriculum towards pre-clinical healthcare, healthcare management, healthcare data analytics, bioethics, public health & policy, pre-law, or research. All of these tracks are supported via advising. The Freshman Direct Entry program allows students to apply for acceptance into an undergraduate program of study while simultaneously applying to one of our three clinical graduate healthcare programs (DPT, PA, OT). When accepted into the Freshman Direct Admit program, students are guaranteed a spot in their selected graduate program as long as they meet that program's prerequisite requirements. The pre-healthcare tracks provide students with additional advising and programming opportunities aimed to inform and prepare them for graduate school and a variety of careers in healthcare

Bioethics Master of Science

Clarkson University is no longer accepting applications for the Bioethics Program.

Students may reference historical University Catalogs for prior year degree requirements.

Bioethics Certificate Program

The Bioethics Program's certificates offer advanced training in bioethics without undertaking a full master's program. Certificate students may continue their studies by applying the certificate to the master's degree. Each certificate consists of 12 credit hours of graduate coursework. Certificate students specialize in one of the three areas.

Clinical Ethics

The required courses for a graduate certificate in clinical ethics are:

BIE530	Bioethics and the Law
BIE590	Clinical Ethics
BIE610	Online Clinical Ethics Practicum
BIE620	Onsite Clinical Ethics Practicum

Research Ethics

The required courses for a graduate certificate in clinical ethics are:

BIE555	Research Ethics I
BIE580	Research Ethics II
BIE611	Online Research Ethics Practicum
BIE621	Onsite Research Ethics Practicum

Health Policy & Law

The required courses for a graduate certificate in health policy & law are:

BIE510	Biomedical Ethics
--------	-------------------

BIE520	Healthcare Policy
BIE530	Bioethics and the Law
	One specialty course chosen by the student

Program Length

The master's degree can be completed full-time by taking three or more courses per term and part-time taking one or two courses per term. Graduate certificates can be completed in one academic year.

Occupational Therapy MS

Karen Hoover, Chair and Program Director

Mission

The Occupational Therapy Department at Clarkson University is committed to:

- Developing professionals with deep cultural sensitivity and innovative problem solving skills who will respond to current and emerging societal needs and improve the health and well-being of diverse individuals, groups, and populations.
- Expanding the knowledge base of the profession through interprofessional scholarship and practice.
- Serving the unique needs of rural and underserved communities.

Program Philosophy

Our curriculum is founded on the philosophical idea that occupations are activities that bring meaning to the lives of individuals, families, communities, and populations and allow them to participate in society (AOTA, 2017). Occupational therapy is guided by the belief that all individuals have a fundamental right and need to engage in meaningful occupations, and that meaningful occupations influence development, health, and well-being (AOTA, 2017). Occupational therapy occurs within diverse contexts, and the quality of occupational performance is unique in each situation due to the interaction among factors intrinsic to the person, the environment, and the occupation itself. We believe that individuals have the right to live their lives with dignity throughout their lifespans and that barriers to performance can be addressed with innovation. We are

committed to the use of occupations as both an intervention and an outcome to promote the health and wellbeing of an ever-changing society.

American Occupational Therapy Association. (2017). Philosophical base of occupational therapy. *American Journal of Occupational Therapy*, 71(Suppl. 2), 7112410045. <https://doi.org/10.5014/ajot.2017.716S06>

Philosophy of Teaching and Learning

The Clarkson University Occupational Therapy Department follows a constructivist philosophy of teaching and learning. Within constructivism, educational knowledge is developed using the construction metaphor. Students obtain knowledge and construct meaning from the discoveries they make during interactions with the instructional environment (i.e., instructional activities), and instructors design active learning experiences and promote discoveries. Several key assumptions provide a basis for our constructivist learning and teaching philosophy:

1. Knowledge is constructed upon knowledge. Students integrate new knowledge with previously learned material and their values, beliefs, experiences, and insights.
2. Learning is active. In order to construct meaning, learning involves the senses. Students need to engage with material in order to learn.
3. Learning is social. Learning is dependent upon students' connection and social interaction with the instructor and their classmates.
4. Learning is contextual. Learning takes place in multiple environments and is not limited to the classroom.
5. Learning requires continuous self-reflection and commitment to personal and professional growth.
6. Learning is lifelong.

Our curriculum is designed to build on prior knowledge and promote interactive learning within and between our cohorts of students. We create safe learning environments and use collaborative and interactive activities that engage students. We embrace the following teaching methods that are congruent with the constructivist teaching and learning philosophy.

1. Simulation, role-playing, modeling
2. Group work and presentations (e.g., World café; Think-Pair Share [TPS]; Socratic Circles)
3. Interactive lab activities
4. Interactive lectures
5. Interprofessional education
6. Peer to peer mentorship

Curricular Threads and Goals

The Clarkson Occupational Therapy Program has five curricular threads and related goals that are interwoven throughout the curriculum. The threads and goals reflect the values and priorities of our program, as well as the unique philosophy and mission of Clarkson University. Each goal is introduced, applied, and synthesized by the end of the curriculum.

Thread 1: Professional Identity

Goal 1-1: Demonstrate professional behaviors, attitudes, and actions that are reflective of the ethical standards, values, and scope of the profession.

Goal 1-2: Advocate for the profession through participation and membership in community and professional organizations.

Goal 1-3: Develop a plan to ensure lifelong learning.

Thread 2: Innovation and Technology

Goal 2-1: Implement innovative solutions to barriers using technological resources.

Goal 2-2: Educate clients and their families in the safe use and maintenance of assistive technologies and adaptive equipment.

Thread 3: Evidence-informed Practice

Goal 3-1: Critically appraise qualitative and quantitative research.

Goal 3-2: Use a combination of research evidence, professional expertise, and data driven decision making to inform assessment and intervention decisions throughout the continuum of care.

Thread 4: Occupation-based practice

Goal 4-1: Articulate the value of occupation as means and ends, which is integral to the health and well-being of individuals, groups, and populations.

Goal 4-2: Develop and implement occupation-based interventions that support clients' habits, routines, and roles within their contexts.

Goal 4-3: Exercise sound professional judgment and clinical reasoning.

Thread 5: Interprofessional Practice

Goal 5-1: Collaborate skillfully with clients, interprofessional team members, families, and community members to ensure high quality client- and population-centered care.

MS Prerequisites

Students must:

- Complete a baccalaureate degree, with preference given to students with a cumulative GPA of 3.0 or higher.
- Take all the necessary prerequisite courses, with preference given to students with a prerequisite grade point average of 3.2 or higher with no grade lower than C.
- Submit documentation of a minimum of 20 hours of observation/volunteer work or work experience under the supervision of an occupational therapist or occupational therapy assistant. If you are unable to complete observation hours, please contact us for a supplemental essay prompt, and the observation hours requirement will be waived.
- Submit three letters of recommendation. Letters from family or friends will not be accepted.
- Satisfactorily complete the admission process.

Please Note: The OT program is delivered on-site in Potsdam, New York with up to two courses offered virtually. For virtual courses, students are required to have the ability to use a computer and to access and use software and online platforms to perform all necessary educational functions. It is recommended that all entering students have a computer. Students without a computer can utilize available departmental and university computers.

Prerequisite courses for the MSOT Program at Clarkson University

General Psychology (3 credits)

Abnormal Psychology (3 credits)

Development Psychology or Child Development (3 credits)

Statistics (3 credits)

Biology (in addition to A&P) (3 credits)

Human Anatomy (3 credits)

Human Physiology (3 credits)

English Composition/ Critical Thinking (3 credits)

Social Sciences (Anthropology, Humanities, Philosophy, Sociology) (6 credits)

Recommended but not required courses:

Communication/ Public Speaking (3 credits)

Scientific Writing (3 credits)

Please Note:

- Substitutions may be allowed for prerequisite courses upon review and approval by the occupational therapy admission committee.
- We do not offer advanced placement.
- Transfer Credits from other programs, including OT, are not accepted as waivers for the MSOT curriculum.

Application

Applications are made via the Centralized Application Service for Occupational Therapy (OTCAS) <https://portal.otcas.org>. A rolling acceptance policy is used. The class size is approximately 30 students.

Program Curriculum

A Clarkson education prepares each student for today's world and tomorrow's challenges. Our occupational therapy curriculum provides a sequential progression and follows a cohort model, where students move through the curriculum together. The first semester provides a strong foundation in the basic sciences, research methods, theories and models, clinical reasoning, communication, therapeutic use of self, and the framework that guides the domain and process of occupational therapy practice. Subsequent semesters provide the basis for occupational therapy evaluation and intervention, as students concurrently interact with more advanced content related to the leadership and management of occupational therapy services, evidence-based practice, and professionalism.

Hands-on skills are taught through a series of experiential learning courses designed to provide opportunities to demonstrate competency and clinical reasoning across practice settings and with diverse individuals, groups, and populations. Practicum exams and competency checks are used to ensure safe practice and to identify any areas requiring remediation. Starting in term III and continuing through term V, students start their master's project sequence, where they can develop or contribute to a project related to one of three broad areas: technology, innovative program development, or research. This sequence culminates with a professional presentation and scholarly paper.

To enrich the didactic coursework, level I FW occurs in Spring I (Term II) and again in Fall II (Term IV). After students have completed the first two terms of the program and possess a strong foundation in mental health and pediatric practice, the first level II FW occurs in Summer I (Term III). The second level II FW occurs after two more didactic terms, in Summer II (Term VI). The purpose of the level II FW is to further develop students into competent entry-level occupational therapists.

Fieldwork

All students are required to complete supervised fieldwork experiences as part of the Clarkson Occupational Therapy program. Fieldwork provides an opportunity to complement your academic preparation with the application of theory and course

content to practice, to further develop and refine clinical skills, and to establish professional relationships with supervisors and future colleagues.

Students will receive access to the student fieldwork manual during their first semester of coursework. Other fieldwork related documents and resources are available via Moodle and in the fieldwork management system, Exxat. Information regarding fieldwork sites and placements will be available to students through Exxat.

Fieldwork experiences occur in sequence throughout our program and are designed to give the student learning opportunities that connect the classroom to the clinic. Students must participate in the fieldwork experiences in the appropriate sequence (refer to the curriculum chart). Students must complete all Level II fieldwork requirements within one year after completion of the academic coursework. If circumstances arise and a student needs to complete fieldwork outside of the one-year timeline, the student can petition that their case be reviewed by the faculty. Departmental approval is needed to extend fieldwork placements.

Coursework:

YEAR 1			
Fall I	Credits	Spring I	Credits
OT501: Gross Anatomy	4	OT503: Neuroscience	3
OT533: Applied Kinesiology	2	OT537: Evaluating Children and Youth	3
OT521: Clinical Conditions I	2	OT589: Interventions for Children and Youth	4
OT531: Theory and Practice	3	OT579: Group Dynamics	3
OT541: Evidence-Based Practice	2	OT580: Clinical Conditions II	2
OT603: Activity Analysis	3	OT595: Interprofessional and Emerging Practice	2
OT591: Fundamentals of Practice	2	OT700a: Fieldwork Level IA	2
	18		19

Summer I			
OT630: Master's Project I	2		
OT705: Fieldwork Level II	9		
	11		
YEAR 2			
Fall II	Credits	Spring II	Credits
OT563: Adult and Aging	2	OT567: Adult Neuro	2
OT583: Adult and Aging Clinical Practice	4	OT587: Adult Neuro Clinical Practice	4
OT605: Assistive Technology	3	OT553: Cognition and Occupational Performance	2
OT557: Upper Extremity Rehabilitation and Orthotics	3	OT597: Specialty Practice	4
OT539: Leadership and Management	3	OT599: The Lifelong Learner	2
OT640: Master's Project II	2	OT650: Master's Project III	2
OT700b: Fieldwork Level I	2		
	19		16
Summer II			
OT710: Fieldwork Level II	9		

Total Program Credits: 92

Program Length: The Clarkson Occupational Therapy Program is a trimester program nested in a 6-semester plan.

Program Sequence

To be eligible for the first semester courses, students must complete all prerequisite courses. To advance within the curriculum, students must pass all didactic coursework. If a student needs to take a leave of absence from level II fieldwork for medical reasons or extenuating circumstances, they can still progress forward with the didactic coursework, but must complete all level II fieldwork experiences prior to graduation.

Graduation Requirements

To graduate from the OT Program, and earn the Master of Science in Occupational Therapy degree (MSOT) candidates must:

1. Achieve a grade of C or better for all courses in the program.
2. Achieve a minimum overall GPA of 3.00 or better at program completion.
3. Successful completion of both levels of fieldwork.
4. Be recommended for graduation by the Program Chair and Clarkson University Faculty.
5. Students must have paid all debts to the school and be in good standing.

Accreditation

The Clarkson University Master of Occupational Therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association. ACOTE awarded a 10-year, full accreditation in August 2024. The next evaluation will be in 2033-2034.

ACOTE is located at 7501 Wisconsin Avenue, Suite 510 E Bethesda, MD 20814. . ACOTE's telephone number is [301-652-6611](tel:301-652-6611) x2914, email is accred@aota.org and its website is <http://www.acoteonline.org>

Clarkson University is accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools, 3624 Market St., Philadelphia, PA 19104-2680, 215-662-5606. In addition, the University is accredited by the United States Civil Service Commission, and its curricula are approved by the New York State Board of Regents. The Occupational Therapy Program has been registered by the New York State Education Department.

Graduates of the program will be eligible to sit for the National Certification Examination for the Occupational Therapist, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the graduate will be an occupational therapist, registered (OTR). Graduation from an accredited program is a requirement of NBCOT for certification. It is also required for most states for licensing. For more information on the requirements for certification, see the NBCOT website at <http://www.nbcot.org/>. For more information on license requirements for New York State, see the New York State Education Department, Office of the Professions website at <http://www.op.nysed.gov/prof/ot/> .

A felony conviction may affect a graduate's ability to sit for the NBCOT Certification Examination or attain state licensure.

Physician Assistant Studies MS

Christopher LaPoint, Director and Chair

The mission of the Clarkson University Department of Physician Assistant Studies is to prepare exceptional, highly skilled clinicians who actively demonstrate the University's core values of teamwork, caring, integrity, diversity, service, growth and diligence while compassionately providing for the healthcare needs of their communities.

Program Goals:

1. Produce highly skilled and compassionate health care providers licensed to practice medicine as part of a healthcare team.
2. Establish student competence in medical and evidence-based research through scholarly activity.
3. Develop in students the professionalism, medical knowledge, and clinical skills needed to provide comprehensive care to diverse populations in a variety of clinical settings.
4. Instill in students the core values of Clarkson University, while fostering a commitment to community service.

The Department of Physician Assistant Studies will prepare individuals to become valued members of the health care team licensed to practice medicine with physician supervision.

Department motto: a posse ad esse - from possibility to reality.

Application

Applications are made via the Centralized Application Service for Physician Assistants (CASPA) <https://portal.caspaonline.org/>. Deadline for applications through CASPA is. A rolling acceptance policy is being used. The maximum class size 30 students.

The prerequisites for admission are listed below. Be sure that you meet the Clarkson program prerequisites before submitting your CASPA application. Please review the technical standards for the program.

Clarkson PA Prerequisites

General Biology I (with lab) - 4 credits

General Biology II (with lab) - 4 credits

General/Inorganic Chemistry I (with lab) - 4 credits

General/Inorganic Chemistry II (with lab) - 4 credits
Biochemistry/ Organic Chemistry - 3 credits
Anatomy & Physiology I/Anatomy (with lab) – 4 credits
Anatomy & Physiology II/Physiology (with lab) - 4 credits
Microbiology - 3 credits
Genetics/ Eukaryotic Genetics - 3 credits
General Psychology - 3 credits
Statistics (Psychological Statistics/Biostatistics) - 3 credits
Social Sciences/Humanities - 3 credits

The 12 prerequisites listed above must be completed or in progress at the time of application. Students need to earn a B or higher in all of the prerequisite courses. A minimum overall, prerequisite, and science prerequisite GPA of a or higher on a 4.0 scale is required. All prerequisite coursework must be completed at an accredited institution within the United States or Canada.

Advance placement credit will not be accepted for any prerequisite course

Prerequisite courses with a pass/fail grade will not be accepted.

COVID exception: Prerequisite courses that were changed to a pass/fail format and completed between the start of Spring 2020 and the end of Fall 2021 as a result of the COVID-19 pandemic will be accepted. Pass/Fail courses prior to 2020 or after fall 2021 will not be accepted.

All prerequisite courses must be completed within 10 years of application. Any courses outstanding at the time of application must be successfully completed before matriculation. Applicants may be accepted conditionally and may matriculate only if all required coursework is successfully completed before matriculation.

An applicant cannot have more than two prerequisite courses in progress at time of application.

Three letters of reference. One reference needs to be completed by a MD, DO, PA, NP. It is recommended (but not required) to have a reference from a Professor.

A minimum of 500 hours of patient care experience must be completed, documented and verifiable at the time of application. A minimum of 1,000 hours of documented and verifiable patient care experience is to be completed by the time of matriculation. Patient care experience is considered by two factors, quality and quantity. A heavy emphasis is placed on the quality of the experience. The program defines quality as hands-on responsibility for the patient. Applicants with compensated hours of direct

patient care experience will have an advantage. 40 hours of shadowing hours are required by the program verified by the clinician who they shadowed.

Applicants who studied extensively outside of North America will require formal evaluation of those transcripts by the World Education Service (WES). Completion of TOEFL will be required for those for whom English is not the primary language. This requirement may be waived if the applicant has a bachelor's, master's, or doctoral degree from a regionally accredited U.S. college/university. All prerequisite coursework must be completed at an accreditation institution within the United States or Canada.

Ensure the technical standards can be met. Please review the standards below prior to applying.

Simply meeting the prerequisites and submitting an application will not guarantee an interview or acceptance into the program. The admissions committee will decide which applicants are interviewed and which are selected for admission.

Technical Standards Requirements

The abilities and skills which candidates and students *must* possess in order to complete the education and training associated with Physician Assistant education are referred to as "Technical Standards." These same abilities and skills are essential for clinical practice as a Physician Assistant. The Technical Standards listed below reflect five categorical areas: observation, communication, critical reasoning (intellectual), motor and sensory, and behavioral/social and represent minimum competence levels. Students must attest that they meet these Technical Standards prior to or at the time of matriculation to the Clarkson University Department of PA Studies. Students found to be in violation of Technical Standards are at risk for dismissal from the program. Each standard is defined below and is followed by examples of indicators of minimum competence in that area. Reasonable accommodation for persons with documented disabilities will be considered on an individual basis, but a candidate must be able to perform in an independent manner. Candidates will be required to certify that they have read and understand the Technical Standards of the Department of PA Studies at Clarkson University and attest that they have no condition that would interfere, inhibit, compromise or distract from their participation in the program. Please see below description of the Technical Standards.

Observation

Candidates must have sufficient capacity to observe in the lecture hall, the laboratory, the outpatient setting and the patient's bedside. Sensory skills to perform a physical examination are required. Functional vision, hearing and tactile sensation are required

to properly observe a patient's condition and to perform procedures regularly required during a physical examination such as inspection, auscultation and palpation.

Communication

Candidates must be able to communicate effectively in both academic and health care settings. Candidates must show evidence of effective written and verbal communication skills. Candidates must be able to communicate with patients in order to elicit information, describe changes in mood, activity and posture and perceive nonverbal communications.

Candidates must be capable of completing, in a thorough and timely manner, appropriate medical records and documents and plans according to protocol.

Motor

The ability to participate in basic diagnostic and therapeutic maneuvers and procedures (e.g., palpation, auscultation) is required. Candidates must have sufficient motor function to execute movements reasonably required to properly care for all patients. Candidates must be able to move freely about patient care environments and must be able to move between settings such as clinics, classroom buildings, and hospitals. In addition, physical stamina sufficient to complete the rigorous course of didactic and clinical study is required. Long periods of sitting, standing, or moving are required in classroom, laboratory and clinical experiences.

Intellectual

Candidates must be able to measure, calculate, reason, analyze and synthesize. Problem solving, one of the critical skills demanded of physician assistants, requires all of these intellectual abilities. Candidates must be able to read and understand medical literature. In order to complete the Physician Assistant Studies program, candidates must be able to demonstrate mastery of these skills and the ability to use them together in a timely fashion in medical problem-solving and patient care.

Behavioral and Social Attributes

Candidates must possess the emotional health and stability required for full utilization of their intellectual abilities, the exercise of good judgment and the prompt completion of all academic and patient care responsibilities. The development of mature, sensitive and effective relationships with patients and other members of the healthcare team is essential. The ability to function in the face of uncertainties inherent in clinical practice, flexibility, compassion, integrity, motivation, interpersonal skills and concern for others, are all required. Candidates must be able to function effectively under stress and have

the ability to accept constructive criticism and handle difficult interpersonal relationships during training.

Candidates will be required to certify that they have read and understand the Technical Standards of the Department of PA Studies at Clarkson University and attest that they have no condition -as noted above- that would interfere, inhibit, compromise or distract from their participation in the program.

Program Curriculum

The PA Program at Clarkson University is a professional degree program intended to prepare students academically and professionally for responsibilities and services as a Physician Assistant. This entry level master's degree program consists of 82 credit hours divided into three phases that span 28 consecutive months.

1. The Didactic phase is the preclinical year and spans 13 months.
2. The Clinical phase consists of 14 months of supervised clinical education and coursework
3. The Summative Phase consists of 1 month and consists of evaluation and preparation for the future as a graduate PA

The curriculum is structured so that courses from term two build on courses taken in term one, etc. Therefore, opportunities for transfer of credit into the PA curriculum or advanced placement are not available. Supervised Clinical Practice Experiences are distributed among 9 clinical field experiences or "SCPE's". These experiences form the basis of the clinical and socialization processes for adaptation to the roles and functions of a Physician Assistant. A separate 5-week elective is designed for student research.

Spring I		Credits	Summer I		Credits
PA 518	Laboratory & Diagnostics	1	PA 502	Clinical Medicine II	6
PA 501	Clinical Medicine I	6	PA 505	Basic Science II	2

PA 504	Basic Science I	2	PA 508	Pharmacotherapeutics II	3
PA 507	Pharmacotherapeutics I	3	PA 511	Patient Assessment II	3
PA 510	Patient Assessment I	3	PA 514	The Patient and the PA II	1
PA 513	The Patient and the PA I	1	PA 516	Medical Informatics	1

PA 604	Supervised Practice - Pediatrics	6	PA 607	Supervised Practice – Elective I	3
Total		12	Total		9

Program Length

Students must complete the program in 28 months unless granted a leave of absence for health or personal reasons. Any student that requests and is granted a leave of absence must complete the program in 40 months (28 month program plus 1 year).

Program Sequence and Advance Standing

Students are expected to complete the designated professional curriculum in the sequence specified. Each semester's course work is considered to be a prerequisite for the next semester to the next semester.

1. Students may not enter the program with advanced standing
2. Students are required to successfully complete, in sequence, all course work as full-time students
3. There is no opportunity to progress into an advanced semester
4. There is no opportunity to change the order of pre-clinical course work
5. Elective courses are limited to the clinical year

Students are expected to complete each semester on time as a cohort. Student progression will be a function of successfully passing all required courses in a semester. In the didactic phase of the program, any course failure after attempts at remediation will result in dismissal from the program. In the clinical phase, one rotation may be failed, but with remediation and a repeat of that rotation once only for the clinical phase. In that instance, the student's education may continue 5 more weeks. In the summative phase, the student must pass both the physical assessment exam and the comprehensive written final to pass PA 610 and to be recommended for graduation. If after remediation, a student cannot successfully pass either or both exams, they will not be recommended for graduation and will be released from the program.

Graduation Requirements

To graduate from the PA Program, and earn the Master of Science in Physician Assistant Studies degree (MS) candidates must:

- Achieve a grade of C or better for all courses in the program
- Achieve a minimum overall GPA of 3.00 or better at program completion
- Successful completion of All OSCE/history and physical skills assessments by score
- Successful completion of the comprehensive End of Curriculum written final exam by score
- Be recommended for graduation by the Program Chair and Clarkson University Faculty. This includes an evaluation of student professionalism.
- Student must file the appropriate graduation application
- Student must have paid all debts to the school and be in good standing

Accreditation

The program has been granted continuing accreditation by the ARC-PA as of March 2025. The program has also been registered by the New York State Education Department. Graduation from an accredited program is a requirement of states for licensing and healthcare systems for credentialing. Accreditation-Continued is an accreditation status. The granting of Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with ARC-PA Standards. Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the *Standards*.

Physical Therapy Doctorate

Samantha Marocco, Chair and Program Director

Physical Therapy is a health discipline that applies movement science to maintain or enhance quality of life through movement, activity and social participation. Physical therapists evaluate, alleviate and prevent impairments, functional limitations, and disability from injuries, disease and other causes. Physical therapists serve as movement system experts who promote health within a dynamic and comprehensive health care environment while engaging in diagnosis and interventions, consultation, education and research at the individual, community and societal levels.

The mission of the Clarkson Department of Physical Therapy is:

- To graduate physical therapists who emulate the core values of the profession in their physical therapy practice
- For faculty, graduates, and students to contribute to the profession, community, and society through education, scholarship, service, or practice.

Identity Statement:

We educate and empower the next generation of physical therapists to improve health and well-being in rural communities through leadership, critical thinking, and community engagement.

Doctor of Physical Therapy Application Requirements

1. Completion of baccalaureate degree (B.S., B.A., etc.) prior to matriculation into the professional curriculum with an overall grade point average greater than or equal to 3.0.
2. Take all the necessary prerequisite courses with a grade point average greater than or equal to 3.0 and no grade lower than a C in these courses.
3. Submit documentation of a minimum of 50 hours of observation/volunteer or work experience in a minimum of two different physical therapy and/or another healthcare settings, of which a minimum of 30 hours must be completed under the supervision of a physical therapist.
4. Submit three letters of recommendation. At least one must be from a physical therapist and one must be from a faculty member. None can be from family, friends, or clergy
5. Meet the technical standards of the Doctorate in Physical Therapy program, with or without reasonable accommodations

All applications to the doctor of physical therapy program *must* be submitted through the Physical Therapy Centralized Application Service (PTCAS) at www.ptcas.org.

Prerequisite Courses

3 Biology courses	
BY 160/ BY 162	Cellular and Molecular Biology/ Lab (5 credits)
BY 471/ BY 473	Human Anatomy and Physiology I/ Lab (5 credits)
BY 472/ BY 474	Human Anatomy & Physiology II/ Lab (5 credits)
2 Chemistry courses	
CM 131 OR CM 103/105	General Chemistry I with lab (4 credits) Structure and Bonding with lab (5 credits)
CM 132 OR CM 104/106	General Chemistry II with lab (4 credits) Chemical Equilibrium and Dynamics with lab (5 credits)
2 Physics courses	
PH 131/ PH 141	Physics I with lab (4 credits)
PH 132/ PH 142	Physics II with lab (4 credits)
1 Statistics course	
STAT 282, 284, 318, 383	Statistics (3 credits)
2 Psychology courses	
PY 151	General Psychology (3 credits)
PY 370	Developmental Psychology, Life Span (3 credits) (Recommended) Or any other 3 credit Psychology course

Academic Learning Experiences

The DPT curriculum utilizes a case-based experiential learning approach to education, providing students an active, exciting and effective way to learn. The concept of Master Adaptive Learning is student-centered, collaborative, and an active learning process based on patient case studies. Students are prepared for clinical practice and lifelong learning.

Clinical Learning Experiences

Clinical experiences are integrated into the curriculum throughout the educational process. To prepare students optimally for clinical practice in a variety of clinical settings, Clarkson has established over 250 clinical partnerships across the country that offer select rotations to supplement academic learning experiences. Students participate in integrated part time and 3 full time clinical experiences throughout the curriculum in various types of clinical settings across different geographic locations to prepare for the multitude of clinical environments available to physical therapists post graduation.

The DPT Curriculum

The DPT professional curriculum is a full-time program, starting in the fall semester. Each year is divided into three semesters (trimesters). The professional curriculum takes 2 and 2/3 years to complete, finishing in May of the third year.

Those who entered the program prior to the fall of 2024 will graduate using the following course progression:

Fall I		Credits	Spring I		Credit
PT 505	Foundational Sciences for Physical Therapy	9	PT 515	Cardiopulmonary/ Exercise Science	9
PT 506	Professional Foundations for Physical Therapy	2	PT 517	Professional Practice	2
PT 508	Literature Critique and Review	1	PT 518	Principles of Measurement and Testing	1
Total		12	Total		12
Summer I		Credits	Fall II		Credits
PT 525	Musculoskeletal Physical Therapy	9	PT 537	Professional Practice II	6

PT 527	Professional Practice Preparation	2	PT 604	Physical Therapy for Multiple Systems Disorders I	5
PT 528	Analytical Methods for Evidence Based Practice	1	PT 608	Research Methods	1
Total		12	Total		12
Spring II		Credits	Summer II		Credits
PT 614	Neuromuscular Physical Therapy	8	PT 616	Physical Therapy for Multiple Systems Disorders II	6
PT 613	Professional Practice III	1	PT 617B	Professional Practice IV	1
PT 617A	Professional Practice IV	1	PT 627A	Professional Practice V	5
PT 618	Research Practicum	1			
Total		12	Total		12

Fall III		Credits	Spring III		Credits
PT 627B	Professional Practice V	2	PT 667	Professional Practice VII	8

PT 645	Practice Management in the Autonomous Environment	8	PT 677	Professional Practice VIII	8
PT 648	Writing & Presenting Research	1			
PT 657	Advanced Clinical Skills	2			
Total		13	Total		16

Students entering the program August 2024 and moving forward will graduate using this course progression:

Fall 1		Credits	Spring I		Credits
PT500	Foundations of Movement	3	PT509	Applied Clinical Physiology	3
PT501	Examination of Movement	3	PT521	Health Systems II: Community Health	2
PT510	Health Systems I: Introduction to Global Health	2	PT523	Musculoskeletal I: Physical Therapy Management of Lower Quadrant Movement Disorders	3
PT511	Professional Formation I: The Physical Therapy Profession	2	PT524	Neuromuscular Physical Therapy I: Clinical Neuroscience	3
PT512	Critical Inquiry I: Evidence Based Questions	3	PT526	Human Anatomy II	4

PT516	Human Anatomy I	4	PT529	Cardiopulmonary Physical Therapy I: Health, Wellness, and Exercise Science	2
			PT558	Rehab technology I	1
Total		17	Total		18
Summer I		Credits	Fall II		Credits
PT530	Professional Formation II: Professional Engagement	2	PT640	Professional Formation III: Diversity and Teambuilding	2
PT533	Musculoskeletal II: Physical Therapy Management of Upper Quadrant Movement Disorders.	2	PT641	Health Systems III: Health Policy	2
PT535	Physical Therapy Management of Pediatric Conditions	3	PT642	Critical Inquiry II	1
PT539	Cardiopulmonary Physical Therapy II: Management of Cardiopulmonary Disorders	4	PT643	Musculoskeletal III: Physical Therapy Management of Spinal Movement Disorders	2
			PT646	Clinical Education I	5
Total		11	Total		12

Spring II		Credits	Summer II		Credits
PT650	Professional Formation IV: Leadership Practicum	1	PT660	Professional Formation V: Neurorehabilitation Integrated Clinical Experience	2
PT651	Health Systems IV: Community Engagement	1	PT662	Critical Inquiry IV	1
PT652	Critical Inquiry II	1	PT664	Neuromuscular Physical Therapy III: Management of Acquired Neurological Conditions	4
PT653	Musculoskeletal IV: Comprehensive Physical Therapy Management of Musculoskeletal Conditions	4	PT665	Management of Complex Conditions II	2
PT654	Neuromuscular Physical Therapy II: Management Degenerative Neuromuscular Conditions	3			
PT655	Management of Complex Conditions I	4			
PT658	Rehabilitation Technology II	1			

Total		16	Total		9
Fall III		Credits	Spring III		Credits
PT671	Health Systems V: Practice Management	3	PT686	Clinical Education III	9
PT672	Critical Inquiry V: Presenting Research	2			
PT675	Management of Complex Conditions III	3			
PT676	Clinical Education II	5			
PT698/699	Elective I / II	1			
Total		14	Total		9

Facilities

The Doctor of Physical Therapy (DPT) program is housed in Clarkson Hall. The Department of Physical Therapy supports health sciences education, clinical practice and research in physical therapy for the University and the community.

Program Length

Students complete the Doctor of Physical Therapy degree in 2 2/3 years or 8 consecutive semesters.

Accreditation Status

The Doctor of Physical Therapy program at Clarkson University is accredited by [the Commission on Accreditation in Physical Therapy Education \(CAPTE\)](#). The program was originally accredited on Nov. 16, 2001, reaffirmed on Oct. 28, 2009, and reaffirmed again on April 26, 2017. CAPTE is the sole accreditation agency for physical therapy programs

in the nation. It is our policy to maintain accreditation, and our next site visit is scheduled for the spring of 2027. Licensure through the state is required for practice as a physical therapist. Licensure is gained through successful completion of the National Physical Therapy Examination (NPTE) offered by the Federation of State Boards of Physical Therapy (FSBPT) following graduation.

Paramedic Program: Non-Degree Clock-Hour Program Certificate

Douglas Wildermuth, Director of EMS

Credential Awarded

Upon successfully completing this course, the student will be eligible to take the New York State Paramedic exam and the National Registry exam.

Program Description

The paramedic certificate program will provide students with the advanced knowledge and skills necessary to care for the sick and injured in the prehospital setting as a paramedic. This course does prepare entry-level paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession. Through performance of assessments and providing medical care, paramedics are able to recognize and treat a variety of ailments and trauma to the human body from the beginning of the healthcare continuum (outside the hospital). Their goal is to reduce the mortality and morbidity due to illness and injury. Paramedics are responsible and accountable to their patients, the emergency services field, and their peers. After successfully completing this course, the student will be eligible to take the New York State Paramedic exam and the National Registry exam. Once certified, students will be field trained ready to utilize their skills in multiple positions within the healthcare field or help prepare students for future healthcare studies and careers.

Admission Requirements

- Submission of an application and one letter of reference
- At least 18 years of age
- High school diploma, GED, or an unofficial college transcript*
- Ability to read, write, and speak English*
- Be able to meet the minimum requirements for the cognitive and psychomotor components of the examination with reasonable and appropriate accommodations for those persons with documented disabilities, as required by the Americans with Disabilities Act (ADA)*
- Active New York EMT, AEMT or NYS Critical Care Technician certification upon enrollment*
- Copy of a current driver license or government-issued ID
- Submit clinical health requirements to Clarkson University Student Health no later than 30 days prior to the start of class.

- Computer access (with audio and video), with internet access, camera and microphone (capable of working with remote meetings, i.e. Zoom), email, and printer for homework

*All students will need to establish a FEMA student identification to participate in required online learning activities. The FEMA student ID can be obtained by going to <https://cdp.dhs.gov/femasid>.

Tuition and Fees

- Tuition is \$10,600.00
- NREMT Written Exams (Post-course) \$152.00
- NREMT Psychomotor Exam (if taken off-site) \$250-\$350

Program Length and Class Schedule

A 9-month program divided up into two parts. The first 4 ½ months is classroom every Monday, Tuesday, Thursday and Friday from 8:30 am till 4:30 pm. The second half of the program requires good coordination from the student but they should dedicate about 36-40 hours per week to plan for clinical and field time.

Refund Policy

Students who voluntarily withdraw from the program or who are unable to meet the academic requirements of the program and are asked to withdraw are eligible for a refund of tuition according to the following schedule:

- Within the first week of class: 80%
- Within the second week of class: 50%
- Within the third week of class: 30%
- Within the fourth week of class: 10%
- After the fourth week of class: 0%

Enrollment Process

Applicants must submit an application and meet the required deadlines to be eligible for a spot in the class. Deadlines can be found on the website: [Paramedic Program | Clarkson University](#)

Licensing or Regulatory Body

New York State Department of Health Bureau of Emergency Medical Services.

Location of Instruction

Clarkson University
Clarkson Hall, Room 3009
59 Main Street
Potsdam, NY 13699

Didactic Portion

Fourth week of August till 3rd week of December is class from 8:30 am till 4:30 pm on Monday, Tuesday, Thursday and Friday.

Required Courses:

Introduction to Paramedicine - 119 hours

Paramedic Assessments - 77 hours

Paramedicine II - 63 hours with 35 hours of lab

Specialty Populations in Paramedicine - 77 hours

Advanced Trauma & Scene Operations - 119 hours

Clinical/Field Portion

First week of January till 3rd week of May. Good coordination and planning through the clinical coordinator and the student will place the student in a variety of venues to accomplish their skills, see patients and then later work under the guidance of a field training officer/preceptor in their field. These courses include:

Phase II Clinicals - 284 hours

Phase III Field & Capstone - 320 hours

INTERDISCIPLINARY PROGRAMS

In recent years, Clarkson University has built on its existing strengths in business, engineering, liberal arts, and the sciences to develop an increasing number of new interdisciplinary majors that combine learning from two or more traditionally distinct areas. Today, many of the most profound advances in knowledge are occurring at the intersections of previously separate academic disciplines and industrial fields. These innovative programs reflect not only the strength of the University's academic faculty and resources, but also the flexibility and vigor of Clarkson's highly collaborative academic environment.

Computer Science Program MS

Alexis Maciel, Department Chair

Christopher A. Lynch, Graduate Committee Chair

The Department of Computer Science offers a graduate program leading to the degree of Master of Science (offered interdisciplinary with the Department of Electrical and Computer Engineering) in Computer Science. The program is designed to increase fundamental knowledge in computer science, provide a strong background in programming, prepare students for specialization in industry and research through taking targeted electives, and provide students with end-to-end problem solving through project development or research and thesis writing. The department provides the

advantage of close personal association between graduate students and faculty, giving special attention to individual needs and interests.

MS Requirements

In addition to the general requirements for the MS degree that are established by the University, a student is required to satisfy the following set of requirements:

1. A minimum of 30 credit hours of graduate level work
2. Each student's program of study must be approved by the Graduate Committee

Those students who are not fully prepared to pursue graduate work in computer science may be required to take the course CS 511, Foundations in Computer Science. In addition, students with very little to no background in computer science may be required to take undergraduate computer science courses, for which graduate credit will not be given.

Two options are offered, the non-thesis option and the thesis option.

Non-thesis option overview

The non-thesis option requires a minimum of 30 credit hours, of which a minimum of 24 must be coursework and a minimum of 6 must be project work, done by taking a two-course project sequence consisting of CS 613 and CS 614, and culminating in a project in computer science with a project report.

Thesis option overview

A minimum of 30 credit hours, of which a minimum of 18 must be coursework, a minimum of 2 must be seminar credits, and 10 must be thesis work, done by taking thesis credits under course number CS 634.

Common Requirements Across the Thesis and Non-thesis Options

The following requirements are common to both options, and provide foundational knowledge and breadth of knowledge in programming:

1. One foundation course: CS 547 Computer Algorithms.
2. Two courses that qualify as requiring a substantial amount of programming.

Students are advised to consult the Graduate Committee of the Department of Computer Science to obtain a full listing of courses that qualify as requiring a substantial amount of programming. Under certain circumstances, the Graduate Committee may waive the requirement that the student take one or more of the above courses. Students are recommended to consult the Graduate Committee to determine if

and what requirements can be waived. For each course waived, students will be required to take an alternate course in its stead in order to fulfill the requirement for 18 credit hours of coursework.

Additional Program Requirements for the Non-thesis Option for MS in Computer Science

1. At least five restricted elective courses will be taken from the courses offered in the Computer Science or Electrical and Computer Engineering Departments. Of these five courses, one must be a computer engineering course with relevant emphasis on computer science topics. Four are recommended to be courses that focus on attaining specialization in a field of computer science. The department has strengths in theory, artificial intelligence, software, graphics & visualization, security, systems, and network. Students are advised to consult with the Computer Science Graduate Committee to determine appropriate specialization courses for the area of the student's interest.
2. Project work credit will comprise of a minimum of six credit hours, and will involve working on a two-semester project done by taking a two-course sequence (CS 613 and CS 614). Project ideas from all faculty affiliated with the program will be made available to MS students. The student will be responsible for submitting an end-to-end implementation of a project in computer science, together with a project report. The report will be turned in to the Computer Science Graduate Committee for evaluation.

Additional Program Requirements for the Thesis Option for MS in Computer Science

1. At least three restricted elective courses will be taken from the courses offered in the Computer Science or Electrical and Computer Engineering Departments, as selected by the student and their advisor. Of these three restricted elective courses, one must be a computer engineering course with relevant emphasis on computer science topics. Of the remaining two, one must be a 600-level course that focuses on research topics in computer science, and it is recommended that the courses be in a focused area of specialization. Students should consult with their advisors to identify courses in these categories.
2. Two seminar credits: To earn a seminar credit, students must enroll in a seminar course in Computer Science (CS 707 and CS 708).
3. Thesis credit will comprise a maximum of 10 credit hours of the 30 credit hour minimum. All students must have a research advisor by the end of their first semester of study and must submit a research proposal to the Examination Committee by the end of the semester before they plan to graduate. The research advisor will be a faculty

member in the Department of Computer Science, or affiliated with the department through a courtesy appointment. The department has strengths in theory, artificial intelligence, software, graphics & visualization, security, systems, and networks. An overview of research areas in the department can be found [here](#). The Examination Committee shall consist of a minimum of three faculty members. All students must complete a thesis and defend it orally to their Examination Committee. Two copies of the completed thesis must be submitted to the University.

Program Length

All work done for the master's degree in computer science is to be completed within five calendar years, although it is normative to complete the non-thesis option in 1 to 1.5 years, and the thesis option 1.5 to 2 years.

Applied Data Science MS

Boris Jukic, Director

The MS-Applied Data Science degree provides students with the skills to be effective professionals in a highly sought-after field of identifying, acquiring, managing, presenting, analyzing and interpreting large amounts of data in a variety of professional fields and organizational settings. The program offers close faculty student interaction with core courses ensuring that students acquire a common set of key critical skills in areas of data management, decision analysis, statistics, data mining and knowledge discovery. In addition, the program offers a variety of elective courses in various areas of data science and analytics from which students can build additional levels of proficiency and expertise. Upon completion of this program students will possess skills and demonstrate proficiency in the core areas of data analytics and will be able to apply them to one or more specialized contexts of business, engineering or science. Students will develop a deep understanding of how to identify and satisfy data requirements of a variety of stakeholders, working closely across organizational boundaries to create, analyze and present valuable information. Their acquired expertise will enable them to manage, review, analyze, and evaluate data at a very advanced level for critical decision making purposes. These skills will enable them to secure positions in private enterprises as well as government and other institutions with job titles such as Data Engineer, Data Analyst, Data Solution Analyst and Data Scientist, among many others.

Prerequisites

The MS program requires completion of foundation courses in two specific areas: Mathematical Statistics and Basic Programming. These courses can be completed as part of the regular undergraduate degree program or through pursuing the Summer

Analytics Foundation program offered by this program, lasting from June to August preceding the start of the regular fall semester.

Degree Requirements

The (36) thirty-six credits of the MS ADS degree program consist of six three-credit core graduate courses, four three-credit graduate elective courses, and a six-credit capstone course based on a sponsored project work. The core course titles are:

IA 510 - Database Modeling, Design and Implementation

IA 530 - Probability and Statistics for Analytics

IA 605 – Data Warehousing

IA 640 – Information Visualization

IA 650 -Data Mining

IA 651 – Machine Learning

Some of the core courses may be waived if the students can demonstrate that their previous undergraduate or graduate coursework contains equivalent material. In those cases, students will be required to take a greater number of elective courses to satisfy the 36-credit program requirement.

Graduate elective courses are offered in a variety of areas and they include but are not limited to the following:

IA 626 - Big Data Processing and Cloud Services

IA 628 - Introduction to Big Data Architecture and Applications

IA 637 - Data Driven Application Development

IA 653 - Natural Language Processing

CE 502 - Applications in Geospatial Analytics, Science, & Engineering

EM 680 - Decision Analysis and Risk Management

EM 620 - Introduction to Artificial Intelligence: Principles and Techniques

CS 502 - Business Intelligence

CS 503 - Systems Analysis and Design Methods

CS 570 - Deep Learning

CS 572 - Image Understanding

OM 680 - Strategic Project Management

MK 696 – Marketing Research Methods

EC 611- Econometrics

ES 505 - Design of Experiments

EE 574 - Pattern Recognition

ME 529, Stochastic Processes for Engineers

CS 551 - Artificial Intelligence
CS 559 - Human Computer Interaction
EE 501 - Digital Signal processing
CS 549 - Computational/Machine Learning

The electives list is not exclusive. We anticipate that students entering the program will have an interest in working in a focused area of data analytics. Students will build an individualized plan of study through the selection of course electives that align with their intended focus. Faculty advisors will work with individual students to choose proper electives by exploring all graduate courses offered in the curriculum of the different schools at Clarkson University.

IA690 - Capstone Project is a course centered on sponsored data analytics projects with interdisciplinary teams. Capstone projects, depending on project parameters could consist of a 2 unit seminar w/4 unit project (consistent with engineering curriculum as currently offered) and/or be a mentored capstone of 6 total units. Depending on the nature of the capstone and its sponsorship, projects could be on-site fieldwork intensive.

Program Length

Expected program length for the MS ADS (residential) is three semesters, but it can be extended and expected program length for the MS ADS (distance) is (5) five semesters, but it can be extended.

Engineering Science Programs

William Jemison, Dean

Clarkson University offers MS and PhD programs in Engineering Science for qualified students who desire interdisciplinary graduate study in engineering that does not fit within any of the four engineering departments shown below:

1. Chemical and Biomolecular Engineering
2. Civil & Environmental Engineering
3. Electrical & Computer Engineering
4. Mechanical & Aerospace Engineering

MS in Engineering Science Requirements

Students must have a BS in Engineering or Science (Chemistry, Computer Science, Math or Physics; other degrees considered on a case-by-case basis). Students must also have the minimum requirements of:

1. 30 credits beyond BS
2. 18 credits of graduate course work (12 credits in engineering)
3. An average grade of B or better by graduation, with an overall cumulative GPA of 3.00
4. 2 credits of seminar work (in engineering or science)
5. 6 credit hours of thesis
6. 20 of the 30 credit hours must be earned in residence
7. 1 academic year of full time study beyond the Baccalaureate

The research advisor must be a member of the Clarkson School of Engineering (CSoE) (may be a courtesy appointment).

MS Thesis Committee will consist of a minimum of 3 faculty members (PhD) with at least 2 from the CSoE.

PhD in Engineering Science Requirements

Students must have a MS in Engineering or Science (Chemistry, Computer Science, Math or Physics; other degrees considered on a case-by-case basis). Students must also have the minimum requirements of:

1. 60 credits beyond MS, 90 credits beyond the BS
2. 30 credits of graduate course work (minimum of 24 credits in engineering)
3. An average grade of B or better by graduation, with an overall cumulative GPA of 3.00
4. PhD Thesis committee must be a minimum of 5 faculty members (PhD) with at least 3 from the CSoE.
5. All work must be completed within 7 years after the candidacy procedure is completed
6. A maximum of 30 credit hours transfer credit (grade of B or better)
7. The research advisor must be a member of the CSoE (can be a courtesy appointment)

Sequence of Examinations

1. Qualifying Examination: A written qualifying exam is required within 1 year of admission to the PhD program. The qualifying exam will be administered by the Chair of the student's PhD Committee or the researcher advisor's departmental graduate committee. The outcome of the exam is determined by a vote of the respective committees, with no more than 1 dissenting vote permitted for passage. Failure to pass the qualifying examination twice is grounds for dismissal from the program

2. Research proposal defense examination: Administered by PhD Thesis Committee within 1 year of passing the qualifying exam
3. Examination on the dissertation: Administered by PhD Thesis Committee at least 1 year after passing the proposal defense

Engineering Management MS

Misty Spriggs, Associate Director of Professional & Interdisciplinary Graduate Programs

Clarkson University's Master of Science in Engineering Management brings together world-class engineering and technology expertise with best practices in business to deliver an unparalleled education and an exceptional degree, specifically for rising engineering and technical professionals. Our mission is accomplished by focusing on the three areas key to professional education including curriculum & instruction, people, and learning environment.

MS Prerequisites

The MS in Engineering and Management (MSEM) program requires an engineering/technical degree OR relevant experience in an engineering/technology based organization.

MS in Engineering Management Requirements

The thirty credits required for the MS in Engineering and Management consists of 10 courses, 7 core and 3 electives. Program courses are illustrated below:

Required core classes:

Cost Management and Financial Analysis

Decision Analysis and Risk Management

Strategic Project Management

Operations Strategy and International Competitiveness

Negotiations and Relationship Management

Quality Management and Process Improvement

Capstone Project

Elective classes:

Advanced Construction Engineering

Sustainable Infrastructure and Building

Special Topics in Construction Engineering Management

Operations Management and Factory Physics

Law for Engineers

Advanced Topics in Supply Chain Management

Enterprise Sustainability

Introduction to Artificial Intelligence: Principles and Techniques

Leading Organizational Change

Optimization Methods

Marketing Management for Innovation

Database Modeling, Design, and Implementation

Information Visualization

Data Warehousing

Modeling for Insight

Geospatial Systems

Leading and Managing Organizations

Analytics for Decision Making

EM 997 ST: Engineering Management

EM 998 ST: Engineering Management

EM 999 ST: Engineering Management

SB 687: Special Graduate Topics

Program Length

The program has two models: a 24-month part-time program model designed for working professionals and a 12-month full-time model designed for recent graduates and those in career transition.

More Interdisciplinary Programs

For information on the Interdisciplinary Programs of Environmental Politics and Governance MS and the Environmental Science and Engineering MS and PhD, please refer to the Institute for a Sustainable Environment.

Materials Science & Engineering PhD Program

MSE Key Contact

Devon A. Shipp, Director

The Doctor of Philosophy (PhD) degree in Materials Science and Engineering (MSE) focuses on advanced materials and their application across the full spectrum of technical challenges around the world. The objective of this program is to offer students from diverse science and engineering backgrounds the opportunity to develop special competence in one or more of the MSE application areas and to demonstrate their ability to conduct research and add to the body of knowledge in materials science or materials engineering. This MSE program is designed to provide graduate students with an in-depth, fundamental understanding of metals/alloys, polymers, ceramics, composites, and advanced materials, as well, an understanding of the relationships among structure, properties and processing. Applications of advanced materials in areas of biotechnology, electronic devices, alternative energy, and the environment, are at the forefront of technology development. Companies such as Corning, General Electric, IBM, and GLOBALFOUNDRIES (to name only a few) and the Federal Government seek scientists and engineers with MSE degrees to sustain their competitive edge.

The MSE graduate program is administered through its Director (materials@clarkson.edu), who works closely with the Dean of Engineering and the Dean of Arts & Sciences. The MSE graduate program is closely associated with Clarkson's Center for Advanced Materials Processing, whose mission is "to perform innovative research and conduct educational efforts on the synthesis and processing of advanced materials of interest to industry." PhD MSE students are advised and mentored by faculty from appropriate underpinning disciplines and/or faculty with MSE degrees and experience.

Given the complex nature of advanced materials an interdisciplinary program has been developed, underpinned by courses from several academic disciplines, including physics (PH), chemistry (CM), mechanical engineering (ME), chemical engineering (CH), electrical engineering (EE) and engineering science (ES).

Students seeking the MSE PhD must complete:

1. 30 hours of classwork (courses)
2. A comprehensive qualifying examination (usually taken in the 3rd semester of matriculation)
3. 54 hours of research, completing dissertation on an appropriate MSE topic
4. 6 hours of Seminar (MAE, CBS, Physics or CBE)

Students seeking a PhD in MSE may enter the program with either a MS/ME in MSE or one of the supporting disciplines or a BS/BE in MSE or in one of the supporting disciplines (mechanical engineering, chemical engineering, civil engineering, chemistry or physics). Those entering with a MS/ME degree may transfer up to 30 credit hours from the completed courses of their MS/ME program, if the MSE program director deems these courses equivalent to the courses listed below.

PhD in Materials Science & Engineering Requirements †

PhD students are required to take 10 courses (30 hours) from the 3 areas below.

Materials Science Required core classes

MSE 551	Advanced Characterization of Materials (3 credits)
----------------	--

MSE 560	Advanced Materials Science and Engineering (3 credits)
----------------	--

Materials Properties and Applications (Select 4)

CM 530	Colloids and Interfaces (3 credits)
---------------	-------------------------------------

CM 553	Introduction to Biomaterials (3 credits)
---------------	--

CM 566	Bioelectronics and Bionanotechnology (3 credits)
---------------	--

CM 583	Introduction to Polymer Science (3 credits)
---------------	---

CM 584	Functional Polymer Systems (3 credits)
---------------	--

CM 585	Nanostructured Materials (3 credits)
---------------	--------------------------------------

CH 515	Polymer Materials (3 credits)
---------------	-------------------------------

EE 539	Dielectrics (3 credits)
EE 541	Electronic Devices for IC Simulation (3 credits)
ES 552	Biomaterials and Biomedical Engineering Applications (3 credits)
ME 503	Additive Manufacturing (3 credits)
ME 557	Advanced Mechanics of Composite Materials (3 credits)
ME 590	Advanced Welding Metallurgy (3 credits)
ME 591	Selected Topics in Materials Engineering (3 credits)
ME 595	Principles of Physical Metallurgy (3 credits)
PH 528	Intermolecular Forces in Modern Nanotechnology (3 credits)
PH 589/EE 543	Physics of Semiconductor Devices (3 credits)

Materials Processing and Characterization (Select 2)

CM 551	Manufacturing Implications of Advanced Materials Processing (3 credits)
ES 557	Microelectronic Circuit Fabrication (3 credits)
ES 564	Corrosion Engineering (Spring semesters) (3 credits)
ME 637	Particle Transport, Deposition and Removal (3 credits)
PH 636	Scanning Probe Techniques in Soft Condensed Matter Physics

† Other courses not listed here may be credited toward the degree requirements by approval of the thesis advisor and the Director of the MSE program.

Program Length

Students entering with an MS/ME may expect to reach completion of the program within three to five years. Students entering with a BS/BE may expect to complete the program within five years.

Materials Science & Engineering Faculty

The program is multi-disciplinary in its approach and engages faculty in the School of Engineering to offer a diverse perspective on research and study relating to the Materials Science & Engineering curriculum.

Bioscience and Biotechnology Programs

Thomas Lufkin, Bayard and Virginia Clarkson Endowed Chair of Biology

The Department of Biology offers graduate programs leading to the MS and PhD degrees in Interdisciplinary Bioscience and Biotechnology (IBB-PhD, IBB-MS). The goal of these programs is to train students with the skills needed to work on complex problems in the biosciences. To support this aim, the graduate program faculty includes biologists, chemists, physicists, mathematicians, and engineers who serve as dissertation advisors. The program also requires participation of social scientists and ethicists who teach graduate courses in bioethics. In addition to the general program requirements described below, students are expected to acquire a significant specialized body of knowledge in at least one of the following four areas of specialization to provide intellectual depth to their education: (1) Molecular Bioscience and Biotechnology, (2) Biomedical Sciences and Neuroscience, (3) Computational Biology and Bioinformatics, or (4) Ecology, Evolution, and the Environment.

The program faculty are engaged in research covering a wide range of subjects in Bioscience and Biotechnology. Expertise of core program faculty include developmental genetics, tissue regeneration, tissues and biomaterials, biotechnology, plant molecular biology, toxicology, microbial evolution, genomics, cell and molecular biology, neurophysiology, pharmacology, bioinformatics, biomathematics, zoology and evolutionary parasitology, stem cell biology, animal behavior, conservation biology, ecology, and limnology.

Requirements for Admission

Applicants must possess a baccalaureate (4-year) degree in a Bioscience, Chemistry, or other Math, Science or Engineering affiliated-discipline that included coursework in cell & molecular biology, genetics, and organic chemistry.

Submitted application materials must include a statement of purpose including the names of 2-3 Biology faculty members who could serve as advisor, The admissions committee will select candidates on the basis of aptitude, programmatic needs, and overall excellence of academic qualifications.

PhD in Interdisciplinary Bioscience & Biotechnology Requirements

Clarkson University requirements include:

1. Completion of a minimum of 90 total credit hours including a minimum of 24 credits of coursework,
2. A minimum of 6 credit hours in research seminars, and
3. An original doctorate thesis research project submitted as a written dissertation defended orally and approved by a committee of five PhD faculty members

Specific Course Requirements for the Interdisciplinary Bioscience & Biotechnology (IBB) PhD Program include:

1. Two core courses in Cell and Molecular Biology (BY 580 and BY 582)
2. One Biotechnology or Molecular Biology lab course (BY 512 or CM 570)
3. Two specialization elective courses from one of four categories (Molecular Bioscience and Biotechnology; Biomedical Science and Neuroscience; Computational Biology and Bioinformatics; Ecology, Evolution, and the Environment)
4. One free elective course from any category
5. One course from the Computational Biology category, and
6. One course on Bioethics, Policy, or Law.
7. A minimum cumulative GPA of 3.0 in courses used to meet graduate requirements.

The IBB Program director maintains a list of courses that fulfill each category. For further details on the objectives, outcomes, and detailed requirements of the IBB-PhD program, please refer to the IBB Graduate Program Handbook.

MS in Interdisciplinary Bioscience & Biotechnology Requirements

Clarkson University requirements include:

1. Completion of a minimum of 30 total credit hours including a minimum of 20 credits of coursework,
2. A minimum of 2 credit hours in research seminars,
3. A minimum cumulative GPA of 3.0 in courses used to meet graduate requirements, and
4. An original masters thesis research project submitted as a written dissertation and defended orally and approved by a committee of three PhD faculty members or an appropriate professionally-oriented special project .

Specific Course Requirements for the Interdisciplinary Bioscience & Biotechnology (IBB) M.S. Program include:

1. Two core courses in Cell and Molecular Biology (BY 580 and BY582)
2. One Biotechnology or Molecular Biology lab course (BY 512 or CM 570)
3. Two free elective courses
4. One course from the Computational Biology category, and
5. One course on Bioethics, Policy, or Law.

Each and every candidate for the IBB M.S. or IBB Ph.D. must enroll in BY622 and present at least one seminar or more for every year they are in the program as part of their degree requirement.

The IBB Program director maintains a list of courses that fulfill each category. For further details on the objectives, outcomes, and detailed requirements of the IBB-MS program, please refer to the IBB Graduate Program Handbook.

Please see [Detailed Degree Requirements](#) for Clarkson University Graduate Program for more information.

Program Length

The PhD may be completed in a minimum of three years and a maximum of seven years of post-undergraduate study. The M.S. degree may be completed in a minimum of one year and a maximum of five years of post-undergraduate study.

Environmental Policy (MS)/Master of Business Administration Dual Degree MS

Susan Powers, Director and the Spence Professor in Sustainable Environmental Systems
Joshua LaFave, Director, Graduate Operations, Reh School of Business

Program Description

Clarkson's 2-year dual-degree program leading to a Master of Science in Environmental Policy (MSEP) degree and a Master of Business Administration (MBA) degree integrates the study of the function and management of complex environmental systems.

The MSEP course work prepares students to understand and negotiate the complex process of policy making in order to promote science-based environmental policy regulations (e.g., energy policies and decisions). Students learn about strategies to further an interest in a political, social, or economic outcome. They also learn how to develop policy within the public and private sectors.

The MBA program course work emphasizes teamwork, leadership, and managerial skills. Classes, projects, and other opportunities focus on development of effective communication skills, including oral, written, and multimedia methods.

There are 12 credits of overlapping coursework between the MSEP and MBA programs, allowing for the 38 credit hour MBA program and 30 credit hour MSEP program to be completed together in a combined 50-52 credit program of study spanning two years, including an MS thesis (6 credits) or Project (4 credits) supporting the EP degree.

Together the MSEP and MBA double degree prepares our graduates to be exceptional leaders in solving the most challenging environmental issues of today and the future including climate change, access to affordable and clean energy and water, controlling air pollution, and maintaining sustainable habitats and communities.

MS in Environmental Policy Prerequisites

If the students have not taken a course on American Politics or American Society (sociology) and/or introduction to environmental science, they must take, for no graduate credit, POL 220: American Politics, and/or EV 280: Environmental Science or a relevant Environmental Science graduate elective (if permitted enrollment by course instructor).

MBA Prerequisites

Our prerequisites represent the foundation business coursework that we require all students to have before beginning the MBA program. They can be completed during undergraduate study, our **Summer Business Concepts Program** (all courses are offered on our campus at no cost), or over the summer at a different institution. The prerequisites are as follows:

- Microeconomics
- Macroeconomics
- Organizational Behavior/Principles of Management
- Financial Accounting
- Managerial Accounting
- Statistics
- Corporate Finance
- Operations Management
- Marketing
- Business Law
- Information Systems/Computer Science

Required Course List (34 credits)
EC660 Environmental Economics (3 Credits, EP)
POL570 Environmental Policy OR POL571 Energy Policy (3 credits, EP)
Research Methods Course (3 credits, EP)
EV610 ISE Graduate Seminar (2 credits total, 1 credit each semester, EP)
OS608 Organizational Behavior and Performance Management (2 Credits, MBA)
OM606 Supply Chain Management (2 Credits, MBA)
SB693 Seminar in International Business or SB696 Global Business Strategies (3 credits, MBA)
EC604 Applied Economics (2 Credits, MBA)
FN607 Financial Management (2 Credits, MBA)
OS610 Strategic Planning (2 Credits, MBA)
MK609 Marketing Management (2 Credits, MBA)
OM602 Decision Analysis and Supply Chain Design (2 Credits, MBA)
IS605 Information Systems (2 Credits, MBA)
AC603 Management Accounting (2 Credits, MBA)
SB609 Corporate Ethics (2 credits, MBA)
EV612 MS Project (minimum 4 credits) or MS Thesis (minimum 6 credits)
Total of 4 electives (12 credits); 3 of which must have environmental content
<i>Elective Courses with Environmental Content:</i>
OM671 Supply Chain Environmental Management (3 Credits, EP and MBA)
POL570 Environmental Policy or POL571 Energy Policy (3 Credits, EP and MBA)
EV532 Risk Analysis (3 credits, EP and MBA)

POL572 Environmental Law (3 credits, EP and MBA)
Or other courses as approved by the MSEP/MBA joint graduate committee

Applied Data Science (MSADS)/Master of Business Administration (MBA)

Boris Jukic, Director of Data Analytics

Program Description

Clarkson's dual degree program leading to a Master of Science in Applied Data Science (MSADS) degree and a Master of Business Administration (MBA) degree integrates the study of all functional areas of business and aspects of management practice with the with the skills of identifying, acquiring, managing, presenting, analyzing and interpreting large amounts of information for the purpose of data driven strategic and tactical decision making. The degree program is advised by an interdisciplinary committee that will include faculty representatives from the School of Business, School of Engineering and the School of Arts and Sciences.

The MSADS PROGRAM coursework enables students to develop a common set of key critical skills in areas of data management, decision analysis, statistics, data mining and knowledge discovery. Students develop a deep understanding of how to identify and satisfy data requirements of a variety of stakeholders, working closely across organizational boundaries to create, analyze and present valuable information. Their acquired expertise will enable them to manage, review, analyze, and evaluate data at a very advanced level for critical decision making purposes.

The MBA PROGRAM course work emphasizes teamwork, leadership, and managerial skills. Classes, projects, and other opportunities focus on development of effective communication skills, including oral, written, and multimedia methods. There are 18 credits of overlapping coursework between the MSADS and MBA programs, allowing for the 38 credit hour MBA program and 36 credit hour MSADS program to be completed together in a combined 54 credit program of study spanning two years, including an MS capstone course (6 credits) supporting the MSADS degree. Together the MSADS and MBA double degree prepares our graduates to be exceptional leaders in many different functional areas of business with high level of skill and ability to use large amounts of structured and unstructured data for enhanced decision making

Admission Requirements

Applicants must meet the admission requirements for both the MSADS and MBA programs, summarized below:

- No minimum grade point average is required for admission, however in general a GPA > 3.25 is expected in combination with a superior record of academic achievement.
- Submission of official GMAT or Graduate Record Examination (GRE) test scores (Note: This requirement may be waived for any applicant that has previously completed a Master's or Doctoral degree program). The results of this test, together with the academic record and professional recommendations, form the basis for admission decisions and the awarding of financial assistance. Applicants with an MS degree from accredited institutions and/or 5+ years of relevant work experience may request a waiver, to be granted at the discretion of the admission committees
- Applicants are expected to have completed a bachelor's degree, preferably but not limited to a field that relies on quantitative methods (business, economics, engineering, sciences, mathematics)
- Any degree earned internationally must be deemed equivalent to a U.S. bachelor degree.
- Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended. All transcripts must be submitted regardless of how many credits were earned.
- Resume (when using our online application tool, you will be required to submit this along with your application).
- Three letters of recommendation.
- Two Essays (when using our online application tool, you will be required to submit this along with your application) that are one page each in length, double spaced:
 - Describe your career progress to date and your future short-term and long-term career goals. How do you expect an MBA from Clarkson University to help you achieve these goals and why now? (NOTE: This is the general MBA application essay; applicants are expected to incorporate their expectations of how the MSADS will facilitate achieving this goal).
 - Describe a personal characteristic or something in your background that will help the Graduate Admission Committee to get to know you better.
 - OPTIONAL: If you feel there are extenuating circumstances of which the Committee should be aware, please explain them here (i.e. gaps in work experience, academic performance, choice of references, significant strengths or weaknesses to your application, etc.).

MSDA Prerequisites

Students are expected to have complete equivalents of the following courses. They can be completed during undergraduate study, or through our summer prerequisites program.

- Elementary Calculus
- Mathematical Statistics
- Programming Fundamentals

MBA Prerequisites

Our prerequisites represent the foundation business coursework that we require all students to have before beginning the MBA program. They can be completed during undergraduate study, our SUMMER BUSINESS CONCEPTS PROGRAM (all courses are offered on our campus at no cost), or over the summer at a different institution. The prerequisites are as follows:

- Microeconomics
- Macroeconomics
- Organizational Behavior/Principles of Management
- Financial Accounting
- Managerial Accounting
- Statistics
- Corporate Finance
- Operations Management
- Marketing
- Business Law
- Information Systems/Computer Science

Application Process

Applicants will complete the MBA APPLICATION, which will be reviewed by both programs' Graduate Admissions Committees. Both programs must independently accept the student for admission.

Notes

The MBA and MSADS schedule do not directly correspond. For example, the MBA program typically begins prior to the start of the MSADS semester and the MBA program has a two week Spring break (to allow for international travel), while the MSADS semester has a one-week break. Students are expected to be available to start with the earliest starting program. Breaks (including the two-week MBA spring break) will be accommodated, however students are expected to communicate with faculty regarding missed course work and make up any work/assignments during missed

class. This policy holds for students traveling to attend conferences or for any-other school-related activity.

IA/IS 510 - Database Modeling, Design and Implementation

IA 651 Applied Machine Learning

IA/IS 605 - Data Warehousing

IA 530 - Probability and Statistics for Analytics

IA 650 - Data Minings

IA 630 - Modeling for Insight

EC 611 – Econometrics

OM 680 - Strategic Project Management

MK 696 – Marketing Research Methods

Fall Year 1	Spring Year 1
OS 608 Organizational Behavior and Performance Management (2 Credits, MBA)	OM 680 Strategic Project Management (3 Credits MBA and DA)
IA/IS 510 Database Modeling, Design and Implementation (3 Credits, DA and MBA)	IA 626 Big Data Processing and Cloud Services (3 Credits MBA and DA)
EC 604 Applied Economics (2 Credits, MBA)	MK 696 Marketing Research Methods (3 Credits MBA and DA)
MK 609 Marketing Management (2 Credits, MBA)	IA/IS 605 Data Warehousing (3 Credits MBA and DA)
IS 605 Information Systems (2 Credits, MBA)	

Fall Year 2	Spring Year 2
IA 530 - Probability and Statistics for Analytics (3 Credits, DA)	IA 651 Applied Machine Learning

OM 606 Supply Chain Management (2 Credits, MBA)	IA 650 Data Mining (3 Credits, DA)
FN 607 Financial Management (2 Credits, MBA)	OS 610 Strategic Planning (2 Credits, MBA)
IA 530 Probability and Statistics (3 Credits, DA)	EC 611 Econometrics (3 Credits, MBA and DA)
AC 603 Management Accounting (2 Credits, MBA)	
SB 609 Corporate Ethical Decision Making (2 Credits, MBA)	

Summer after year 2: 6 credits of IA690 - Capstone Project

Program Length

Two years

Master of Arts in Teaching

Clarkson University is no longer accepting applications for Master of Arts in Teaching Programs. Interested parties may reference historical University Catalogs by program for degree requirements and related information.

ACADEMIC CENTERS

Center for Advanced Materials Processing (CAMP), a New York State Center for Advanced Technology

Devon A. Shipp, Director

The Center for Advanced Materials Processing (CAMP) is a Center for Advanced Technology (CAT) funded by New York's Empire State Development Division of Science Technology and Innovation (ESD-NYSTAR).

CAMP's mission is to offer companies, industries and entrepreneurs a vibrant, collaborative, trusted environment in which to engage in focused applied research and technology development activities intended to advance innovation, improve products, solve manufacturing challenges and/or develop new products. CAMP's overarching goal is to contribute significantly to economic growth in New York State. Our main objectives are to:

1. Form collaborative relationships with industry, corporations and entrepreneurs in NYS to assist them in accelerating innovation, discovering and implementing next generation materials, addressing real-world challenges and fostering growth of their businesses.
2. Perform applied research, technology development and technology transfer activities related to the synthesis, processing and design of advanced materials to benefit industry and corporations.
3. Develop the next-generation, high tech workforce by providing excellent education and real-world research/development experiences needed by NY industry and companies.

CAMP relies on faculty and students in four core capability areas:

1. Materials synthesis and functionalization
2. Materials processing
3. Materials-by-design, and
4. Chemical mechanical planarization, underpinned by materials characterization and computational modeling and simulation

CAMP's industry-sponsored research program provides numerous materials science and engineering research opportunities to enrich undergraduate and graduate students' educational experience.

Center for Excellence in Healthy Water Solutions (CoEHWS)

Stefan Grimberg, Director

Ensuring a healthy and sustainable future through the protection and conservation of water resources, CoEHWS' mission is to generate solutions that help protect and

improve waters for sustainable natural environments healthy populations, resilient communities and sound economies. Additional information can be found at <https://www.healthywaters.org/>

Center for Air and Aquatic Resources Engineering and Sciences (CAARES)

Thomas M. Holsen, Director

Suresh Dhaniyala, Co-Director

The presence of contaminants in the environment can have a wide variety of negative effects including impacting public health, degrading ecosystems, harming lakes and rivers, and damaging forests and crops. Although, environmental quality has significantly improved over the past 40 years, there are still a number of problems that are attributed to the release of contaminants including the widespread loss of environmental services, climate change, harmful algal blooms, and emerging contaminants including per- and polyfluoroalkyl substances (PFAS). Clarkson University has significant resources in people and equipment that focus on the management of air, water and soil pollution. CAARES is the center that brings together this world-class expertise. CAARES laboratory, office space, and equipment including an aerosol wind tunnel; aerosol sensors, analyzers, and spectrometer; air and water field sampling platforms including Clarkson's 25 foot coastal research vessel, the R.V. Lavinia; and, world class analytical equipment are available for research and education programs at Clarkson. Specific analytical instruments include high-resolution gas and liquid chromatographs, high resolution instruments for trace metals analysis, mercury analytical instrumentation, ion chromatographs and sample preparation instrumentation. Additional information can be found at <https://www.clarkson.edu/caares>.

Center for Rehabilitation, Engineering, Science, & Technology (CREST)

The Center for Rehabilitation Engineering, Science and Technology was established at Clarkson University in 2005. Its mission is to educate, mentor and train students to be able to integrate and apply a combined scientific, analytic, technological and business approach to emerging biomedical engineering and biomedical science areas. It is of note that biomedical engineering is the most rapidly growing field of engineering, with outstanding biomedical job prospects.

The Center for Rehabilitation Engineering, Science and Technology takes a unique approach to the study of rehabilitation problems. First, through its focus on biomedical engineering, the Center studies how the nervous and skeletal muscle systems of the human body normally work. Secondly, through its rehabilitation science and technology components, it models the mechanisms by which these systems become impaired through disease or injury. Within its rehabilitation technology aspects, the Center investigates how technology can help to restore or replace functions such as hearing, speaking, seeing or moving through the use of artificial assistive or substitutive devices. Through a clinical link with Clarkson's Physical Therapy and Occupational Therapy

programs, the Center investigates the outcome of the applications of this assistive technology. The Center also organizes and presents seminars, campus lectures and classroom discussions by visiting leaders in the field of rehabilitation.

Medical and health care have become increasingly technology-based in recent years, with an increased demand for engineers with skills that integrate engineering principles with an understanding of the human physical and psychosocial characteristics. The Center for Rehabilitation Engineering, Science and Technology offers a Minor in Biomedical Engineering to meet this need. Combining a traditional engineering degree with this BmE Minor is an attractive opportunity for engineering students who have a strong desire to use their talents to improve the quality of life for people with medical conditions or disabilities. Clarkson offers this Minor to augment a degree from a traditional engineering department. A similar Minor in Biomedical Science and Technology (BS&T) is available to non-engineers. Both Minors are multi-disciplinary, and will include courses from multiple schools or departments across the University. The Biomedical Engineering Minor is just one of the examples addressing Clarkson's Coulter School of Engineering's motto "Technology Serving Humanity."

Center for Identification Technology Research (CITeR)

Stephanie Schuckers, Director

Clarkson University is the lead university for an NSF Industry/University Cooperative Research Center, called the Center for Identification Technology Research (CITeR). Other sites include West Virginia University, University at Buffalo, Michigan State University, and IDIAP (Switzerland). CITeR focuses on biometrics, identity, and human analytics <https://citer.clarkson.edu/> Over 20 affiliates, including the FBI, DOD, DHS, Qualcomm, CVS Health, and other industrial and government partners, cooperatively define, fund, and execute work to meet common needs. Applications include defense, homeland security, forensics, consumer electronics, financial services, and humanitarian applications.

Research focus areas in identification technology include:

1. Human sensing and acquisition
2. Feature extraction and processing
3. Machine learning and analytics
4. Performance and modeling
5. Multispectral and cross spectral imaging
6. Novel modalities
7. Mobile & computing
8. Social signal processing
9. Authentication & cybersecurity
10. Behavioral and soft biometrics
11. Science of Biometrics

Students are key team members for research projects which are cooperatively defined by industrial and government affiliates. At the completion of their degree, students often go to work for organizations that funded their research project. Educational programs which CITEr researchers pursue include electrical, computer, and software engineering, computer science, mathematics, among others.

Center for Metamaterials

David Crouse, Director

The Center for Metamaterials (CfM) is an NSF-sponsored Industry/University Cooperative Research Center. The CfM's mission is to provide a collaborative, multi-university one-stop shop to research, design, fabricate and test a wide range of metamaterials, photonic crystals, and plasmonic structures. These structures and materials are nano and micro composite structures that are engineered to control light in unusual ways that are not possible with naturally occurring materials; behavior such as cloaking, channeling and stopping light, and complex light filtering are possible with such structures. Industry interest in metamaterials is growing as these materials are being used to develop new or higher performing optical, electronic and acoustic devices.

Researchers at the Center focus on precompetitive topics jointly identified by the university and industry participants as being of high value, and include fundamental research, metamaterials processing, and device and system development. The CfM projects advance the knowledge base through fundamental and applied metamaterials research and development. The projects involve research teams composed of academic researchers (professors, postdocs, research staff, graduate students and undergraduate students), industry researchers at large and small companies, and researchers from government agencies (e.g., Air Force Research Laboratory (AFRL) and U.S. Army). The intent is to nurture long-term relationships and collaborations among the university, industry, and government laboratories. The intent is also to develop and perform technology transfer of metamaterials-based technologies to the applications of renewable energy, sensing and imaging, antennas, and communication systems. Industry members participating in the Center share in the products of the research and development, the generated intellectual property, have access to laboratories, equipment and expertise, and the resulting economic benefits.

Center for Complex Systems Science

Erik Bollt, Director

Complex systems science involves the study of how many elements develop behaviors that are beyond those behaviors possible by considering the individual elements alone. While the behavior of each individual component of a system in isolation may support intricate dynamics, together the individual components interact to support group

behaviors and system dynamics well beyond those possible from individual components alone.

Complex systems science is a rapidly growing and emerging field that is inherently interdisciplinary. It can be applied to a wide variety of fields including biology, medicine and cognitive science, mechanical, chemical, electrical, and civil engineering, physics and astronomy, economics and social sciences. The future of research in these fields lies in understanding not just the isolated components of a given system, but the manner in which the individual components interact to produce “emergent” group behavior.

In contrast to “data mining” or “big data”, where a primary focus is to understand hidden patterns or structure in large data sets, complex systems science attempts to identify “causality” and uncover “universality” that exists in large scale systems. Causality and universality are due to peer and hierarchical interactions, patterns, and scaling of individual system components. Universality has been observed across a wide range of fields such as brain science, insect swarming, social science, and fluid dynamics.

Key to the advancement of complex systems science is the development and use of mathematical tools designed to understand the resultant outcome of group behaviors that are not evident when studying the behavior of individual elements alone. Mathematical tools for complex systems science are drawn from the following fields:

1. Information dynamics. The study of interaction of elements and the information flow between elements. Of particular interest is the minimum information needed to produce an outcome of important behaviors
2. Algorithmic complexity. In contrast to information dynamics and entropy of evolving systems is the concept of algorithmic complexity, Kolmogorov complexity, and the concept of minimality of description, as a contrast that intricate behavior is often opposite to simplicity of design
3. Structure and dynamics on networks, as a large number of interacting parts can give rise to behaviors that emerge from the group interactions and not implicit in any one element. Consider that collective behaviors and capabilities of an ant swarm, which is clearly not understood in terms of the behaviors of the parts. Considering networks brings in the mathematics of graph theory, but well beyond this when understanding dynamics on networks, comes complexity theory.
4. Criticality and scaling, modeling of random networks, the implications of critical phenomena to complexity, and the recent approaches to evolutionary dynamics are all part of this field. As such, understanding interactions from food webs to economies all have a universality that can be understood in terms of the science that includes hierarchical interactions. It is the characterization of such universalities that lead to complex systems as a unifying field across such disciplines

5. Technical details and the tool-sets include areas of dynamical systems and chaos theory, network theory and graph theory, information theory, thermodynamics and statistical mechanics, cellular automata, information theory, activated processes including glasses, fractals, scaling and renormalization

Center for Electric Power Systems

Thomas Ortmeyer, Director

Electric Power System Engineering is a recognized strength of Clarkson University. The electric power system is undergoing rapid dynamic change due to the development of clean energy sources, the deployment of smart grid technologies, the deregulation of the industry, and the developing growth of the electric vehicle industry. There is a strong need for research, development, and workforce training across the breadth of research areas that focus on electric power systems.

The Center for Electric Power System Research mission is to foster research collaborations across the university, and to grow our power systems research capability. The Center goal is to work closely with industry, and the Industry Advisory Board has an important role in the Center governance.

The center has a strong education mission, at the undergraduate and graduate levels, as well as in programs for practicing professionals. Our undergraduates can select the Electrical Power Engineering Concentration. This concentration is a set of 6 courses that prepare our students for careers in the electric power industry, whether working for electric power utilities, generation and utilization industries, equipment manufacturers, consultants, and government. The large majority of students in the Concentration complete one or more internships in the power industry before graduating.

Kate Krueger, Director

Stephen Casper, Associate Director

Lorriane Harper, Assistant Director of Student Support

Human Resources

Jeff Taylor, Vice President of People Resources

Diane Letourneau, Assistant Director of Human Resources

Institute for a Sustainable Environment

Susan E. Powers, Director / Associate Director of Sustainability / Jean '79 and Robert '79

Spence Professorship in Sustainable Environmental Systems

Alan Rossner, Associate Director for Education

Institute for STEM Education

Kathleen Kavanagh, Director

Seema Rivera, Associate Director

Institutional Effectiveness

Jasmine Johnson, Director

Institutional Operations & Student Achievement Services (SAS)

Amanda J. Pickering, Associate Vice President of Academic Affairs & Student Achievement

Kara Pitts, Registrar

Angie Shatraw, Associate Registrar

Travis Dox, Bursar / Associate Director of Undergraduate Services

Kevin Cook, Assistant Bursar

International Students & School

Tess Casler, Director

Rebecca Brown, Assistant Director

Lewis School of Health and Life Sciences

Lennart Johns, Dean

Tom Langen, Associate Dean

Library

Alex Cohen Director of Libraries

Anna Kelly, Collections and Reference Librarian

Gina LaPointe, Coordinator of Library Service

Jess Leja, Collections and Reference Librarian

Bonnie Oemcke, Senior Library Paraprofessional for Technical Services & Archives

Marketing

Tara Treffiletti, Associate Vice President of Institutional Comm & Reputation Strategy

Stacey Brekke, Director of Communications

Jessica Carista, Director of Interactive Marketing

Jacob Newman, Media Relations Director

Office of Information Technology

Joshua Fiske, Vice President of Information Technology & Libraries

Christopher Cutler, Director of Administrative Computing

Julie Davis, Director of Web Development

Bob Keenan, Director IT / CRC

Office of the Dean of Students

Kelsey Pearson, Dean of Students

Troy Lassial, Assistant Dean of Students

David D. Reh School of Business

Stephen Standifird, Interim Dean

Floyd Ormsbee, Associate Dean of Operations & Student Success

Risk Management

Debra Drescher, Vice President of Legal Affairs & General Counsel

Diane Felitte, Assistant Director of Legal Affairs

Sponsored Research Services

Steve McDonald, Director of Research Operations

Student Organizations

Kristen Avery, Director of Student Life & Community Engagement

Ryleigh Gage, Assistant Director of Student Life

Student Success Center

Cathy McNamara, Associate Vice President of Academic Support & Student Engagement

Marjorie Warden, Director of HEOP & CUPO

Kathleen Mikel, Associate Director and Tutor Coordinator

Jeremy Riedl, Associate Director of HEOP

Deborah Shipp, Associate Director Student Success

Katie Boczarski, Assistant Director Student Success

Madeline Masi, Assistant Director of HEOP

Hannah Mott, Assistant Director of Student Support Services

Transfer Admission

Matthew Rutherford, Assistant Vice President of Admission

Katherine Catimon, Associate Director of Undergraduate Admissions & Communications

FACULTY DIRECTORY

Professors

ACHUTAN, Ajit

BS, Tech Calicut University
MS, Indian Institute of Technology
ME, National University of Singapore
PhD, Purdue University
Professor of Mechanical and Aerospace Engineering

AHMADI, Goodarz

BS, Tehran University
MS, PhD, Purdue University
Clarkson Distinguished Professor / Robert H. Hill Professor of Mechanical and Aerospace Engineering

AIDUN, Daryush

BS, MS, Syracuse University
PhD, Rensselaer Polytechnic Institute
Professor of Mechanical and Aerospace Engineering

ANDREESCU, Silvana

BS, MS, University of Bucharest
PhD, University of Bucharest and University of Perpignan
NATO-NSF Postdoctoral Fellowship - State University of New York at Binghamton
Professor / Chair of Chemistry & Biochemistry / Egon Matijevic Endowed Chair

BANAVAR, Mahesh Krishna

BE, Visvesvaraya Technological University
MS, PhD, Arizona State University
Professor of Electrical and Computer Engineering

BALL, Jennifer

BA, Saint Vincent College
MA, PhD, Purdue University
Professor of History & Social Documentation

BOHL, Douglas

BS, University of Connecticut

MS, PhD, Michigan State University

Professor /Associate Dean of the Wallace H. Coulter School of Engineering and Applied Sciences

BOLLT, Erik

BS, University of California, Berkeley

MA, PhD, University of Colorado

W. Jon Harrington Professor of Mathematics / Professor of Electrical and Computer Engineering / Director of the Clarkson Center for Complex Systems Science

BOWMAN, R. Alan

BS, Arizona State University

MBA, Arizona State University

PhD, Cornell University

Professor, Operations and Information Systems

CASPER, Stephen

BS, University of Minnesota

PhD, University College of London

Professor of History

CETINKAYA, Cetin

BS, Istanbul Technical University

MS, PhD, University of Illinois-Urbana

Professor of Mechanical and Aerospace Engineering / Michael '78 and Janet Jesanis Endowed Chair

CHENG, Ming-Cheng

BS, National Chiao Tung University

MS, PhD, Polytechnic University

Professor of Electrical and Computer Engineering

COHEN, Alexander

Ph.D., University of Iowa

BA, University of New York

Professor of Political Science

CRIMI, Michelle

BS, Clarkson University

MS, Colorado State University

PhD, Colorado School of Mines

Dean of the Graduate School / Professor of Environmental Engineering

CROUSE, David

BS, Purdue University

PhD, Cornell University

Professor of Electrical and Computer Engineering

DARIE, Costel

BS, MS, AI, Cuza University, Iasi, Romania

PhD, University of Freiburg, Germany

Professor of Chemistry & Biochemistry

DEMPSEY, John

BE, PhD, University of Auckland

Professor of Civil and Environmental Engineering

DHANIYALA, Suresh

BS Tech, Indian Institute of Technology

MS, University of Delaware

PhD, University of Minnesota

Bayard D. Clarkson Distinguished Professor / Co-Director of CAARES

ETTINGER, Laura

BA, Vassar College

MA, PhD, University of Rochester

Professor of History

FELZENSZTEIN, Christian

M.Sc, PhD, University of Strathclyde

MBA, Universidad Austral

Professor, Consumer & Organizational Studies / Reh Chair in Entrepreneurial Leadership

FERRO, Andrea

BS, University of Massachusetts-Amherst

MS, PhD, Stanford University

Professor of Civil and Environmental Engineering

GARCIA, Michael

BA, University of Nebraska
MA, PhD, Cornell University
Professor of Literature

GONTZ, Allen

BS, Lock Haven University Pennsylvania
MS, PhD University of Maine
Professor of Civil and Environmental Engineering

GRAVANDER, Jerry

BS, Illinois Institute of Technology
A.B., University of Tennessee
PhD, University of Texas at Austin
Distinguished Service Professor of Humanities & Social Sciences / Co-Chair of Arts, Culture & Technology Department

GRIMBERG, Stefan

Diplomingenieur, Technical University Munich
MS, PhD, University of North Carolina at Chapel Hill
Professor of Civil and Environmental Engineering

HELENBROOK, Brian

BS, University of Notre Dame
PhD, Princeton University
Paynter-Krigman Endowed Professor in Engineering Science Simulation / Professor of Mechanical and Aerospace Engineering / Associate Dean of Graduate School

HOLSEN, Thomas

BS, MS, PhD, University of California at Berkeley
Jean S. Newell Distinguished Professor of Engineering / Professor of Civil and Environmental Engineering

JEMISON, William

BS, Lafayette College
MS, Penn State University
PhD, Drexel University
Dean of the Wallace H. Coulter School of Engineering and Applied Sciences / Tony Collins Professor of Innovation Engineering Culture

JOHNS, Lennart

BS, Lock Haven University

MS, Bucknell University

PhD, University of Vermont

Founding Dean of the Lewis School of Health and Life Sciences

JUKIC, Boris

BS, University of Zagreb

MBA, Grand Valley State University

PhD, University of Texas at Austin

Professor, Operations and Information Systems / Director of Data Analytics

KATZ, Evgeny

BS, MS, Mendeleyev Chemical Engineering University

PhD, Frumkin Institute of Electrochemistry, Russian Academy of Sciences

Professor of Chemistry & Biochemistry / Milton Kerker Chair in Colloid Science

KAVANAGH, Kathleen

BA, SUNY Plattsburgh

MS, PhD, North Carolina State University

Professor of Mathematics / Director, Institute for STEM Education / Robert A. Plane Endowed Chair

KOCHO-WILLIAMS, Alastair

BA, MA, PhD, University of Manchester

Professor of History

KRISHNAN, Sitaraman

BChemEng, University Institute of Chemical Technology

PhD, Lehigh University

Professor / Executive Officer of Chemical and Biomolecular Engineering

KRUEGER, Kate

BA, Gustavus Adolphus College

MA, PhD, University of Iowa

Professor of Literature / Director of Honors Program

LADO, Augustine

BS, University of Khartoum

MBA, Arkansas State University

PhD, University of Memphis

Professor Consumer and Organizational Studies Systems / Richard '55 and Joy Dorf Chair in Entrepreneurship & Innovation

LANGEN, Tom

BS, Purdue University

PhD, University of California, San Diego

Professor of Biology / Associate Dean of Lewis School of Health and Life Sciences

LEGAULT, Lisa

PhD, University of Ottawa

Professor / Chair of Psychology

LIANG, Chunlei

BS, Xi'an Jiaotong University

PhD, University of London

Professor of Mechanical and Aerospace Engineering

LIU, Chen

BE, University of Science and Technology of China

MS, University of California, Riverside

PhD, University of California, Irvine

Professor of Electrical and Computer Engineering

LUFKIN, Thomas

BS, University of California at Berkeley

PhD, Cornell University Medical College

Professor / Bayard and Virginia Clarkson Endowed Chair of Biology

LYNCH, Christopher

BS, Syracuse University

MA, State University of New York at Binghamton

PhD, Boston University

Professor of Computer Science

MAHAPATRA, Santosh

BS, Sambalpur University
MT, Indian Institute of Technology
PhD, Michigan State University
Professor, Operations and Information Systems

MAHMOODI, Farzad

BS, MS, PhD, University of Minnesota
Professor, Operations & Information Systems / Joel Goldschein '57 Chair in Supply Chain Management/ Director of Supply Chain Management Programs

MAROCCO, Samantha

BS, DPT, Russell Sage College
MS, Clarkson University
EdD, Logan University
Professor / Chair of Physical Therapy

MARTINEZ, Marcias

BS, MS, PhD, Carleton University
Professor / Chair of Mechanical and Aerospace Engineering

MATTHEWS, Jeanna

BS, Ohio State University
MS, PhD, University of California at Berkeley
Professor of Computer Science

MCRATH, Paul

BS, ENG PhD Queen Mary College, London
Professor / Chair of Electrical and Computer Engineering

MEDEDOVIC, Selma

BS, University of Zagreb
PhD, Florida State University
Professor of Chemical and Biomolecular Engineering / Richard and Helen March Endowed Professor

MELVILLE, Sarah

AB, Smith College
MA, Univ. of Missouri at Columbia
PhD, Yale University
Professor of History

MONDAL, Sumona

BS, MS, University of Calcutta

MS, PhD, University of Louisiana

Professor of Mathematics / Co-Director of the MS Program in Applied Data Science

MOOSBRUGGER, John

BS, Wright State University

Professor of Mechanical and Aerospace Engineering

PEETHAMPARAN, Sulapha

MS, Indian Institute of Technology Madras

ME, National University of Singapore

PhD, Purdue University

Professor of Civil and Environmental Engineering

PEPLOSKI, James

BS, PhD, Clarkson University

Professor and Executive Officer of Chemistry & Biochemistry / Director of Freshman Chemistry

PODLAHA-MURPHY, Elizabeth

BS, MS, University of Connecticut

PhD, Columbia University

Professor / Chair of Chemical and Biomolecular Engineering

POWERS, Susan

BS, MS, Clarkson University

PhD, University of Michigan

Director of the Institute for a Sustainable Environment / Associate Director of Sustainability /

Jean '79 & Robert '79 Spence Professorship in Sustainable Environmental Systems

RAMSDELL, Michael

BS, MS, PhD, Clarkson University

Professor of Physics, Institute for STEM Ed / Director of First Year Physics

ROBINSON, Christopher

BA, Siena College

MA, PhD, SUNY Albany

University Professor, Arts, Culture & Technology Department

ROGERS, Shane

BS, MS, PhD, Iowa State University

Professor of Civil and Environmental Engineering

ROSSNER, Alan

BS, Clarkson College

MS, University of Washington

PhD, McGill University, Canada

Professor, Institute for a Sustainable Environment / Associate Director for Education

ROULSTON, Benjamin

PhD, MS Boston University

BS, Clarkson University

Professor of Physics

ROY, Dipankar

BS, MS, Calcutta University

PhD, Rensselaer Polytechnic Institute

Professor / Chair of Physics

SHIPP, Devon

BS, PhD, University of Melbourne

Professor of Chemistry & Biomolecular Science / Director, CAMP

SOWDER, John

Professor / Chair of Military Science

STANDIFIRD, Stephen

BS, Purdue University

MBA, Northwestern University

PhD, University of Oregon

Professor, Interim Dean of David D. Reh School of Business

SYPNIEWSKI, HOLLY

BA, University of Cincinnati

MA, PhD, University of Wisconsin-Madison

Professor of History

TAYLOR, Ross

BS, MS, PhD, University of Manchester, England

Liya Regel and Bill Wilcox Distinguished Professor of Engineering

TAMON, Christino

BS, PhD, University of Calgary
MSc, University of Toronto
Professor of Computer Science

THEW, Spencer

BS, MS Clarkson University
Distinguished Service Professor of Civil and Environmental Engineering

THORPE, Charles

BA, North Park College
PhD, Carnegie Mellon
Professor of Computer Science

WALLACE, Kenneth

BS, University of Rochester
PhD, Ohio State University
Professor, Biology

WASHBURN, Andrew

Lt Col, U.S. Air Force
BS, United States Air Force Academy
MA, Trident University Intl.
MA, Air University
Professor / Chair of Air Space & Cyberspace Studies

WILKE, Andreas

MA, PhD, Free University of Berlin, Germany
Professor, Psychology

WILLMERT, Kenneth

BS, Iowa State University
MS., PhD, Case Western Reserve University
Professor of Mechanical and Aerospace Engineering

WOJTKIEWICZ, Steven

BS, MS, PhD, University of Illinois at Urbana-Champaign
Professor / Chair of Civil and Environmental Engineering

WU, Weiming

BS, MS, PhD, Wuhan University, China

James K. Edzwald Professor of Water Engineering / Professor of Civil and Environmental Engineering

YAO, Guangming

BS, MS, Harbin Normal University

PhD, University of Southern Mississippi

Professor / Chair of Mathematics

YU, Zhenxin “Dennis”

BE, Xi’an Jiao Tong University

PhD, Hong Kong Polytechnic University

MS, PhD, Washington University in St. Louis

Professor, Operations and Information Systems

Associate Professors**ANDREESCU, Daniel**

BS, MS, PhD, University of Bucharest

Associate Professor of Chemistry & Biochemistry / Instrumentation Manager

ASANTE-ASAMANI, Emmanuel

BS, University of Science and Technology (KNUST)

MS, PhD, University of Wisconsin-Milwaukee

Associate Professor of Mathematics

ATHAVALE, Prashant

BE, University of Mumbai

MS, University of Toledo

MS, PhD, University of Maryland

Associate Professor of Mathematics

BAILEY, Susan

BS, McMaster University

MS, University of Calgary

PhD, University of Ottawa

Associate Professor, Biology

BAKI, Abul Basar

AB, BS, MS Bangladesh University of Engineering & Technology
PhD, University of Alberta
Associate Professor of Civil & Environmental Engineering

BENSON, Catherine

BS, MS, PhD, Clarkson University
Associate Professor, Biology

BICKNELL, Jaime

BS, MSPT, DPT, Clarkson University
Clinical Associate Professor, Physical Therapy / Director of Clinical Education

BROWN, Anna

BA, Wesleyan University
MBA, PhD, Baruch College, University of New York
Associate Professor, Economics and Financial Studies

CALDWELL, Ellen

BA Guilford College
MA, PhD, University of North Carolina at Chapel Hill
Associate Professor of Humanities

CARLSON, Jay

BS, Ferris State University
MBA, Minnesota State University at Moorhead
PhD, University of South Carolina
Associate Professor, Consumer and Organizational Studies

CARROLL, James

BS, Syracuse University
MS, Georgia Institute of Technology
PhD, Clemson University
Associate Professor of Electrical and Computer Engineering

CHAUDHRY, Shafique

BS, MS, University of Punjab
PhD, Ajou University
Associate Professor, Operations and Information Systems

DEJOY, John

BBA, Pace University
CPA, New York MBA, Marist College
MS, PhD, University of Idaho
Associate Professor, Economics and Financial Studies

DEWATERS, Jan

BS, University of New Hampshire
MS, University of North Carolina at Chapel Hill
PhD, Clarkson University
Associate Professor, Institute for STEM Education

DISALVO, Brittany

BS, MS Keuka College
OTD, Chatham University
Clinical Associate Professor, Occupational Therapy

FENG, Zhilan

BS, Fudan University
MBA, PhD, University of Connecticut
Associate Professor, Economics and Financial Studies

FITE, Kevin

BE, MS, PhD, Vanderbilt University
Associate Professor / Executive Officer of Mechanical and Aerospace Engineering

GRACHEVA, Maria

MS, PhD, Moscow State Engineering Physics Institute (MEPhI)
Associate Professor of Physics

GRAVELINE, Ashleigh

BS, Syracuse University
MS, Utica College
OTD, Chatham University
Clinical Associate Professor, Occupational Therapy / Academic Fieldwork Coordinator

HOOVER, Carl

BS, University of Virginia
MS, PhD, Clarkson University
Associate Professor of Mechanical and Aerospace Engineering / Director of MAE Laboratories

HUSSAIN, Faraz

BE, Birla Institute of Technology and Science

MS, Iowa State University

PhD, University of Central Florida

Associate Professor of Electrical and Computer Engineering

ISSEN, Kathleen

BS, University of Illinois

MS, PhD, Northwestern University

PE, Illinois

Associate Professor of Mechanical and Aerospace Engineering

JIANG, Yazhou (Leo)

BS, Huazhong University of Science and Technology

PhD, Washington State University

Associate Professor of Electrical and Computer Engineering

KHONDKER, Abul

BS, MS, Bangladesh University of Engineering and Technology

PhD, Rice University

Associate Professor / Executive Officer, Electrical and Computer Engineering

KOPLWITZ, Jack

BEE, City College of New York

MEE, Stanford University

PhD, University of Colorado

Associate Professor of Electrical and Computer Engineering

KRING, Stefanie

BS, SUNY Potsdam

BS, MS, PhD, Clarkson University

Associate Professor / Chair of Biology

LIU, Yu

BS, MS, Sichuan University

PhD, Southern Illinois University Carbondale

Associate Professor of Electrical and Computer Engineering

MACIEL, Alexis

BSc, PhD, McGill University

Associate Professor of Computer Science / Chair of Computer Science

MACKINNON, William

BPS, MS, Clarkson University

PhD, Carleton University

Associate Professor, Operation and Information Systems

MANIERRE, Matt

BA, Eastern Connecticut State University

MA, Ph, University of Delaware

Associate Professor of Sociology

MASTORAKOS, Ioannis

BS, PhD, Aristotle University of Thessaloniki

Associate Professor of Mechanical and Aerospace Engineering

MICHALEK, Arthur

BS, MS, Clarkson University

PhD, University of Vermont

Associate Professor of Mechanical and Aerospace Engineering

MILNE, R. John

BS, M.Eng, Cornell University

PhD, Rensselaer Polytechnic Institute

Associate Professor, Engineering & Management / Neil '64 and Karen Bonke Endowed Chair

OHL, Alisha

BS, MS, Ithaca College

PhD, New York University

Associate Professor / Program Director of Occupational Therapy

ORMSBEE, Floyd

BS, SUNY Potsdam

MS, Clarkson University

PhD, Carlton University

Associate Professor, Consumer and Organizational Studies / Associate Dean of Operations & Student Success

PEDERSEN, Steven

BA, Goldsmiths College, University of London

MFA, Alfred University

Associate Professor, Arts, Culture, and Technology Department

PRISBE, Neil

Major, U.S. Air Force
BS, Ferris State University
Associate Professor, Air Space & Cyberspace Studies

PROPST, Lisa

BS, McGill University
M.Phil, D.Phil, Oxford University
Associate Professor of Literature / Co-Chair of Arts, Culture, and Technology Department

RANDALL, Beth

BS, Elizabethtown College
OTD, Chatham University
Clinical Associate Professor, Occupational Therapy

RIVERA, Seema

BS, Binghamton University
MS, College of Saint Rose
PhD, University at Albany
Associate Professor / Associate Director, Institute for STEM Education

ROGERS, JoAnn

BS, MS, PhD, Iowa State University
Associate Professor of Sociology

SAMWAYS, Damien

BS, University of Southampton, UK
PhD, University of Bristol
Associate Professor, Biology

SCHELLY, David

BS, Colorado State University
MS, PhD, University of Wisconsin
Associate Professor, Occupational Therapy / Director of Undergraduate Healthcare

SCRIMGEOUR, Jan

M. Phys., Heriot-Watt University
D.Phil., University of Oxford
Associate Professor, Physics

SHATTUCK, Heather

BS, MS D'Youville College

DPT, Utica College

Clinical Associate Professor, Physical Therapy

SMITH, Tyler

BS, MS, PhD, Montana State University

Associate Professor / Executive Officer of Civil and Environmental Engineering

SUR, Shantanu

MBBS, University of Calcutta

MMST, PhD, Indian Institute of Technology Kharagpur

Associate Professor, Biology

THOMAS, Robert

BS, MS, PhD, Clarkson University

Associate Professor of Civil and Environmental Engineering

TOWLER, Christopher

BS, DPT, Clarkson University

Clinical Associate Professor, Physical Therapy

TRENZ, Rebecca

BS, MS, St. Bonaventure University

PhD, Fordham University

Associate Professor of Psychology

WEIMER, Steven

BS, Frostburg State University

MA, PhD, Bowling Green State University

Associate Professor of Philosophy, Honors Program

WHITE, Diana

BS, Memorial University of Newfoundland

MS, PhD, University of Alberta, Canada

Associate Professor of Mathematics

WULANDARI, Elisabeth Arti

BA, Gadjah Mada University

MA, Cornell University

MA, PhD, University of Wisconsin-Madison

Associate Professor, Arts, Culture, and Technology Department

YANG, Yang

BS, South China University of Technology

PhD, Tsinghua University

Associate Professor of Civil and Environmental Engineering

YUYA, Phillip

BS, MS, PhD, University of Nairobi

Associate Professor of Mechanical and Aerospace Engineering

ZEBEDEE, Allan

BA, Colby College

MA, PhD, University of California at San Diego

Associate Professor, Economics and Financial Studies

Assistant Professors**ALMEIDA, Bethany**

BS, Worcester Polytechnic Institute

PhD, Brown University

Assistant Professor in Chemical and Biomolecular Engineering

APPIAH-KUBI, Kwadwo

BS, PT University of Ghana

MS, PT Cardiff University

PhD Temple University

Assistant Professor, Physical Therapy

AUSSEIL, Rosemonde

BS, Arts & Metiers ParisTech

Assistant Professor, Engineering & Management

BAZZOCCHI, Michael

BAS, PhD, University of Toronto

Assistant Professor of Mechanical and Aerospace Engineering

BELLOU, Aikaterini

BS, MS Aristotle University of Thessaloniki

PhD Washington State University

Assistant Professor, Mechanical and Aerospace Engineering

COATES, Alison

BScm, Mount Allison University

MBA, MS, Clarkson University

PhD, Telfer School of Management, University of Ottawa

Assistant Professor, Health Care Management

DIPASQUALE, Robin

MS, University of Indianapolis

PhD, University at Buffalo

Assistant Professor - Anatomist, Physical Therapy

FERNANDEZ, Lissette

BS, MS, PhD, Clarkson University

Assistant Professor, Civil and Environmental Engineering

FOURNIER, Dale

BS, MS, MSPT, PhD, The University of Western Ontario

Assistant Professor, Physical Therapy

GEARY, Amanda

Juris Doctor, Maurice A. Deane School of Law

BS, Clarkson University

Assistant Professor, Economics & Financial Studies

GREENE, James

BS, The Pennsylvania State University

MS, PhD, University of Maryland

Assistant Professor of Mathematics

GOLIBER, Nikita

BS,MS, Clarkson University

FNP, State University of New York Upstate Medical University

Clinical Assistant Professor, Physician Assistant Studies

GOOD, Tiara

BA, Willamette University

MA, Syracuse University

PhD, The Pennsylvania State University

Assistant Professor of Communication

GUO, Zhujin

MS, PhD, University of Missouri
BA, Southwestern University
Assistant Professor, Economics & Financial Studies

HARRIS, Matthew

BS, University of Evansville
MS, University of Alaska Fairbanks
PhD, University of Waterloo
Assistant Professor of Mathematics

HOOVER, Karen

BS, Ithaca College
MS, Columbia University
OTD, Chatham University
Clinical Assistant Professor / Chair of Occupational Therapy

IMTIAZ, Masudul

BS, MS, University of Dhaka
PhD, University of Alabama
Assistant Professor of Electrical and Computer Engineering

KIM, Taeyoung

BS, PhD, Seoul National University
Assistant Professor of Chemical and Biomolecular Engineering / Institute for a Sustainable Environment

KING, Melissa

BS, Central Connecticut State University
PhD, Wesleyan University
Assistant Professor of Chemistry & Biochemistry

KRAUS, Petra

PhD, University of Ulm
Assistant Professor, Biology

KRULL-GOSS, Krista

Pharm D, Wilkes University
Clinical Assistant Professor, Physician Assistant Studies

LAPOINT, Christopher

BS, Alfred University

Clinical Assistant Professor / Chair of Physician Assistant Studies

LAW-PENROSE, Jared

BA, Messiah College

PhD, Purdue University

Assistant Professor, Consumer and Financial Studies

LI, Gangqiang

BS, MS, Zhejiang Ocean University

PhD, Shanghai Jiaotong University

PhD, York University

Assistant Professor of Mechanical and Aerospace Engineering

LIGUORI, Simona

BS, MS, PhD, University of Calabria

Assistant Professor of Chemical and Biomolecular Engineering

LIN, Guoyu

BA, MS, Peking University

MS, University of Texas at Austin

PhD, Carnegie Mellon University

Assistant Professor, Economics and Financial Studies

LU, Xiaocun

BS, Peking University

PhD, The University of Akron

Assistant Professor of Chemistry & Biochemistry

LUCAS, Samantha

BA, SUNY Potsdam

MS, Clarkson University

Clinical Assistant Professor, Physician Assistant Studies

MACKINNON, Heather

BS, MS, Clarkson University

DMSc, University of Lynchburg

Clinical Assistant Professor, Physician Assistant Studies

MARKO, Moshe

BPT, University of Tel-Aviv

MHS, Washington University

DPT, Massachusetts General Hospital Institute of Health Professions

PhD, Syracuse University

Clinical Assistant Professor, Physical Therapy

MARTIN, Jessica

BS, University at Albany

MS, Clarkson University

Clinical Assistant Professor, Physician Assistant Studies

MARTIN, Jonathan

BSc, Memorial University of Newfoundland

PhD, University of Alberta

Assistant Professor of Mathematics

MCCRUM, Ian T

BS, Clarkson University

PhD, The Pennsylvania State University

Assistant Professor of Chemical and Biomolecular Engineering

MELNIKOV, Dmitriy

BS, MS, Moscow Engineering- Physics Institute

PhD, Lehigh University

Assistant Professor of Physics

MEYSAMI, Mohammad

BS, MS, Indiana University

PhD, University of Colorado Denver

Assistant Professor of Mathematics

PETLEY, Lauren

BSC, Laurentian University

PhD University of Ottawa

Assistant Professor of Psychology

RAAD, Nima Golghamat

BSc, Isfahan University of Technology

MSc, Amirkabir University of Technology

PhD, University of Missouri-Columbia

Assistant Professor, Engineering and Management

RICHARDS, Melissa

AS, Nassau Community College
BS, MS, PhD Clarkson University
Assistant Professor, Institute for STEM Education

SACKS, Michael

BS, Towson University
MA, PhD, University of California, Irvine
Assistant Professor, Economics and Financial Studies

SANDS, Kylie

BS, SUNY Potsdam
MBA, Northcentral University
Clinical Assistant Professor, Physician Assistant Studies

SEKELJ, Gasper

BS, MBA, Clarkson University
Assistant Professor, Economics and Financial Studies

SEO, Jihoon

PhD, BE, Hanyang University
Assistant Professor Chemical and Biomolecular Engineering

SIRSAT, Tushar

MBBS, Maharashtra University of Health Sciences
PhD, University of North Texas
Assistant Professor, Physician Assistant Studies

SOWA, Feimatta

MPH, St. George's University
MD, Latin American American School of Medicine
Clinical Assistant Professor, Physician Assistant Studies

TEPYLO, Nicholas

PhD, M.A.SC., B.ENG., Carleton University and INSA Toulouse
Assistant Professor of Mechanical and Aerospace Engineering

THAPA, Mishal

BS, NUAA, China
MS, PhD, University of Alabama
Assistant Professor of Mechanical and Aerospace Engineering

TOTH, Scott

BS, Shippensburg University
Assistant Professor of Military Science

TRIVEDI, Dhara

BSc, MSc, Gujarat University
MA, PhD, University of Rochester
Assistant Professor of Physics

WANG, Siwen

BS, MS, Tsinghua University
PhD, California Institute of Technology
Assistant Professor of Civil and Environmental Engineering

WANG, Wenting

BA, Beijing Forestry University
MS, PhD, McMaster University
Assistant Professor, Operations and Information Systems

XIAO, Suguang

BS, Chang'an University
MS, Tongji University
PhD, Lehigh University
Assistant Professor of Civil and Environmental Engineering

YOO, Michelle

BS, MS, Seoul National University
PhD, University of Florida
Assistant Professor of Biology

ZEIGLER, Stacey

BS, State University of New York Health Science Center
MS, California College for Health Sciences
DPT, Simmons University
PhD, Clarkson University
Assistant Professor, Director of HealthCare Management

ZHANG, Jianhua

BS, Jimei University
MS, Xiamen University; MS, New Mexico Institute of Mining and Technology
PhD, North Carolina State University
Assistant Professor of Electrical and Computer Engineering

ZHANG, Ying

B.E., Jinan University

MS, Jilin University

PhD, Syracuse University

Assistant Professor of Psychology

Professors of Practice**BACKUS, Erik C.**

BS, Clarkson University

MS, University of Missouri- Rolla

PhD, Clarkson University

Professor of Practice of Civil and Environmental Engineering / Director of CEM

BARKER, Philip

Professor of Practice and Distance Power Engineering / MS Program Coordinator, Electrical and Computer Engineering

BUCKINGHAM, Ronald

Professor of Practice in Mechanical and Aerospace Engineering

COMPEAU, Marc

BS, SUNY Potsdam

MS, Clarkson University

Professor of Practice, Consumer & Organizational Studies / Co-Director Reh Center Entrepreneurship

ISSEN, Marshall

BS, University of Illinois, Urbana

MS, Roosevelt University

P.E., Illinois

Professor of Practice, Engineering and Management

OLSEN, William

BA, University of Buffalo

Professor of Practice, Civil and Environmental Engineering

RODRIGUEZ, Luis

PhD, University of Texas at El Paso

Professor of Practice, Mechanical and Aerospace Engineering

Instructors

BROOKSBY, Evan

BS, Brigham Young University
MBA, Union Graduate College
Instructor, Healthcare Management

CONLON, Tyler

Instructor of Operations & Information Systems / Director of Projects & IT Infrastructure
Data Science Program

HUGHES, Cassandra

Instructor, Air Space & Cyberspace Studies

LAROCK, Krista

BS, SUNY Potsdam
MS, MBA, Clarkson University
Instructor, Consumer and Organizational Studies

MARTIN, Christopher

BS, Clarkson University
MS, SUNY Potsdam
Instructor of Mathematics

MORRISON, Sara

BS, St. Lawrence University
MS, University of Vermont
Instructor of Mathematics

SAJNA, Catherine

Instructor / Director of the Writing Center & ESL Program
Center for Excellence in Comm

SULLIBAN, Wylee

Instructor, Military Science

WOZNY, Andrew

Instructor, Military Science

WULTSCH, Elisabeth

Instructor, School of Engineering

ACADEMIC CALENDARS

The academic calendar contains the dates of major academic events occurring each academic year and serves as an information source and planning tool for students, faculty, staff, families, and outside organizations. The academic calendar is published once a year, and is subject to change at any time.

Graduate Semester Based Programs Calendar

The academic calendar for semester-based programs includes all graduate residential programs in Potsdam, excluding the Health Sciences, as well as Engineering Management MS.

	2025-2026	2026-2027
Fall Semester Events	Fall 2025	Fall 2026
New Student Move-in*	21-22 August	20-21 August
Returning Student Move-In*	23-24 August	23 August
Classes Begin	25 August	24 August
Career Fair	17 September	TBA
Fall Recess	13–14 October	12-13 October
Classes Resume & Midterm grades due	15 October	14 October
Family Weekend Begins	31 October - 2 November	TBA
Enrollment For Spring Classes Begin	5 November	4 November
Thanksgiving Recess	26-27 Nov	25-27 November
Classes Resume	1 December	30 November
Last Day of Class	5 December	4 December
Final Exams	8-12 Dec	7-11 Dec
Fall Graduates Recognition Ceremony	13 December	12 December
Final Grades Due at 9:00am	15 December	14 December

	2025-2026	2026-2027
Spring Semester Events	Spring 2026	Spring 2027
New Student Move-In	6 January	5 January
Returning Student Move-In	7 January	6 January
Classes Begin	8 January	7 January
Career Fair	TBD	TBA
February Break	19 -22 February	18-21 February
Classes Resume	23 February	22 February
Midterm Grades Due	6 March	5 March
Spring Recess	16-20 March	15-19 March
Classes Resume	23 March	22 March
Enrollment For Fall Classes Begin	30 March	29 March
Last Day of Class	24 April	23 April
Reading Days	27-28 April	26-27 April
Final Exams	29 April -5 May	28 Apr-4 May
Final Grades Due at 9:00am	8 May	7 May
Graduate Commencement Ceremony	7 May	6May
Undergraduate Commencement Ceremony	9 May	8 May

The Earl R. and Barbara D. Lewis School of Health Sciences Calendar

The academic calendar for The Earl R. and Barbara D. Lewis School of Health Sciences programs includes the Doctor of Physical Therapy program, the Master of Science in Occupational Therapy program, and the Master of Science in Physician Assistant Studies program. Students should refer to their program handbook for specific information about clinical rotation or fieldwork schedules.

Fall Trimester 2025

Occupational Therapy

- **New Student Orientation** - August 21-22, 2025
- **Classes Begin** – August 25, 2025
- **Fall Recess** – October 13-14, 2025
- **Classes Resume** – October 15, 2025
- **Midterm Grades Due (12pm, noon)** – October 15, 2025
- **Enrollment in Spring Classes Begins** – November 5, 2025
- **Thanksgiving Recess** - November 26-28, 2025
- **Classes Resume** – December 1, 2025
- **Last Day of Classes** - December 5, 2025
- **Final Exams** – December 8-12, 2025
- **Fall December Recognition Ceremony** - December 13, 2025
- **Final Grades Due (9am)** – December 15, 2025

Physician's Assistant

- **Classes Begin** – September 8, 2025
- **Fall Recess** – October 9-13, 2025
- **Classes Resume** – October 14, 2025
- **Midterm Grades Due (12pm, noon)** – October 15, 2025
- **Enrollment in Spring Classes Begins** – November 5, 2025
- **Thanksgiving Recess** - November 26-28, 2025
- **Classes Resume** – December 1, 2025
- **Last Day of Classes** - December 5, 2025
- **Final Exams** - December 8-12, 2025
- **Fall December Recognition Ceremony** - TBA

- **Final Grades Due (9am)** – December 15, 2025

Physical Therapy

- **New Student Orientation** - August 21-22, 2025
- **Classes Begin** – August 25, 2025
- **Fall Recess** – (2026 and 2028 Cohort) October 13 & 14, 2025
- **Fall Recess** – (2027 Cohort) October 16-17, 2025
- **Classes Resume** (2026 and 2028 Cohort) October 15
- **Classes Resume** (2027 Cohort) October 20
- **Midterm Grades Due (12pm, noon)** – October 15, 2025
- **Enrollment in Spring Classes Begins** – November 5, 2025
- **Thanksgiving Recess** - November 26-28, 2025
- **Classes Resume** – December 1, 2025
- **Last Day of Classes** - December 5, 2025
- **Final Exams** - December 8-12, 2025
- **Fall December Recognition Ceremony** - December 13, 2025
- **Final Grades Due (9am)** – December 15, 2025

Spring Trimester 2025

Occupational Therapy

- **Classes Begin** – January 5, 2026
- **Winter Recess** – February 19-20, 2026
- **Classes Resume** – February 23, 2026
- **Midterm Grades Due (12pm, noon)** – March 2, 2026
- **Spring Recess** – March 16 – 20, 2026
- **All Classes Resume** – March 23, 2026
- **Summer & Fall Enrollment Begins** - March 30, 2026
- **Last Day of Classes** – April 24, 2026
- **Final Exams** – April 27 -May 1, 2026
- **Graduate Commencement Ceremony** – N/A
- **Final Grades Due (9am)** – May 8, 2026

Physician Assistant Program

- **Orientation** January 6, 2026
- **Classes Begin** – January 8, 2026
- **Midterm Grades Due (12pm, Noon)**- March 2, 2026
- **Spring Recess** - March 16 – 20, 2026
- **All Classes Resume** – March 23, 2026
- **Summer & Fall Enrollment Begins** - March 30, 2026
- **Last Day of Classes** – April 17, 2026
- **Final Exams**- April 20 – 24, 2026
- **Graduate Commencement Ceremony** - May 7, 2026
- **Final Grades Due (9am)** - May 8, 2026

Physical Therapy

- **Classes Begin** – January 8, 2026
- **Winter Recess** – February 12 – 13, 2026
- **Classes Resume** – February 16, 2026
- **Midterm Grades Due (12pm, noon)** -
- **Spring Recess** – March 16 – 20, 2026
- **All Classes Resume** – March 23, 2026
- **Summer & Fall Enrollment Begins** – March 30, 2026
- **Last Day of Classes** – May 8, 2026
- **Final Exams**- N/A
- **Graduate Commencement Ceremony** – May 7, 2026
- **Final Grades Due (9am)** – May 8, 2026

Quarter Programs

The academic calendar for the quarter-based programs includes all remaining graduate programs not referenced above.

Summer Quarter Events	Summer 2025	Summer 2026
Classes Begin	June 16	June 15
Enrollment in Fall Classes Begins	May 9	May 8
Last Day of Classes	August 22	August 21
Final Exams	August 25-29	August 24-28
Final Grades Due (9AM)	September 2	September 1

Fall Quarter Events	Fall 2025	Fall 2026
Enrollment in Winter Classes Begins	October 17	October 16
Last Day of Classes	November 11	November 10
Final Exams	November 12-18	November 11-17
Final Grades Due (9AM)	November 24	November 23
December Recognition Ceremony	December 13	December 12

Winter Quarter Events	Winter 2026	Winter 2027
Enrollment in Spring Classes Begins	February 13	February 12
Last Day of Classes	March 13	March 12
Final Exams	March 16-20	March 15-19
Final Grades Due (9AM)	March 24	March 23

Spring Quarter Events	Spring 2026	Spring 2027
Classes Begin	March 30	March 29
Enrollment in Summer Classes Begins	May 8	May 7
Last Day of Classes	June 5	June 4
Final Exams	June 8-12	June 7-11
Final Grades Due (9AM)	June 16	June 15
June Commencement Ceremony	TBA	TBA

POLICIES

Clarkson University Non-Discrimination Policy

Clarkson University does not discriminate on the basis of race, color, religion, sex, sexual orientation, gender identity, gender expression, national or ethnic origin, age, disability, veteran status, predisposing genetic characteristics, domestic violence victim status, marital status, parental status, ancestry, source of income, or other classes protected by law in provision of educational opportunity or employment opportunities.

Clarkson University does not discriminate on the basis of sex or disability in its educational programs and activities, pursuant to the requirements of Title IX of the Educational Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973, and the American Disabilities Act of 1990 respectively. This policy extends to both employment by and admission to the University.

Inquiries concerning Section 504 and the Americans with Disabilities Act of 1990 should be directed to ADA504@clarkson.edu.

Inquiries concerning Title IX, the Age Discrimination Act, or other discrimination concerns should be directed to Chief Inclusion Officer/Title VI and IX Coordination/ADA and 504 Coordinator Jen Ball at jball@clarkson.edu , ERC 1003A, or 315-268-4208.

Information on the processing of grievances and charges relating to the above policies can be obtained from the Chief Inclusion Office.

Clarkson University is making a special effort to identify employment opportunities and participation in its educational programs for a broad spectrum of candidates including women, minorities, and people with disabilities.

Student Complaint Process (HEOA)

In compliance with the Higher Education Opportunity Act of 2008 and the state complaint processes as prescribed for under 34 CFR 600.0, the following resources are provided: Filing a Grievance with NY State New York State Education Department Office of College and University Evaluation EBA Room 969 89 Washington Avenue, Albany, New York, 12234.

For more information, please visit:

<http://www.nysed.gov/college-university-evaluation/filing-complaint-about-college-or-university>

Online Student Consumer Protection

Clarkson University is a member of the National Council for State Authorization Reciprocity Agreements (NC-SARA) and follows the complaint resolution policies and

procedures outlined within the SARA Policy Manual and summarized here. For a list of NC SARA participating states and institutions, you may visit the NC-SARA directory.

Any complaints made regarding grades or student conduct are governed by Clarkson University policy and are not subject to NC-SARA involvement.

Students outside of New York State:

Consumer protection complaints resulting from distance education courses, activities, and operations from students outside of New York State may be submitted to the office of the Associate Vice President of Academic Affairs & Student Achievement for investigation and resolution. If a student is dissatisfied with the institution-based resolution, a concern may be submitted, within two years of the incident about which the complaint is made, to the New York State Education Department as outlined here.

Students within New York State:

Any complaints made by students residing within New York State are not subject to NC-SARA involvement, and should follow the Grievance Procedures detailed in the Clarkson Student Regulations.

Campus Crime Statistics

The Advisory Committee on Campus Safety will provide upon request all campus crime statistics as reported to the United States Department of Education. Contact the Director of Campus Safety and Security, 315-268-6666, or visit www.clarkson.edu/campussafety.

Protection of Privacy

Clarkson University abides by the provisions of the Family Educational Rights and Privacy Act of 1974 (Buckley Amendment). The University will release or withhold information under these provisions, which are published annually in the Clarkson Regulations.

Nonimmigrant Students

Clarkson is authorized under federal law to enroll nonimmigrant students.

Student Regulations

Each student is responsible for knowing the contents of the Clarkson Regulations. The Regulations contain information on registration, class absences, the grading system, scholastic requirements, the method for removing course deficiencies, special examinations, and the Code of Student Conduct, campus policies, and other information regarding University operations. For a link to the Clarkson student regulations, please visit:

<https://www.clarkson.edu/student-administrative-services-sas/clarkson-regulations>.

HEGIS CODES OF GRADUATE PROGRAMS/CERTIFICATES

The number following the degree program is the Higher Education General Information Survey (HEGIS) code for classifying academic areas designated by the New York State Education Department. Enrollment in other than registered or otherwise approved programs may jeopardize a student's eligibility for certain student aid awards.

Program	Degree(s)	HEGIS Code
---------	-----------	------------

Applied Data Science	MS	0702
Basic Science	MS	4902
Biomedical Engineering	MS	0905
Bioscience & Biotechnology (Interdisciplinary)	MS, PhD	0499
Business Administration	MBA	0506
Business Analytics	MBA	0503
Chemical Engineering	MS, PhD	0906
Chemistry	MS, PhD	1905
